Dam Safety Management / Gestion de la Sécurité des Barrages Cigb Icold, 2021-06-11 Dam Safety Management is a major concern during the entire lifetime cycle of a dam scheme This is particularly true for the operational phase of the scheme that represents by far the longest period in its lifetime cycle Bulletin 154 presented a general approach and concepts to be applied to dam operation The current Bulletin 175 extends the developed concepts to all phases preceding the operational phase Many risks associated with the operation of existing dams have their origins in other phases preceding the actual operation Although there are numerous ICOLD Bulletins addressing technical aspects of planning design construction and commissioning of dams there is not a single Bulletin which covers the subject in a comprehensive manner The current document is a first attempt to capture all relevant dam safety aspects in all preoperational phases by systematically characterizing the actors involved their roles the activities and complex interactions present in different phases of the dam lifecycle An Overarching Safety Management System is specifically developed that can be applied to all actors involved La gestion de la sécurité des barrages est une préoccupation majeure pendant tout le cycle de vie d'un projet de barrage Cela est particulièrement vrai pour la phase opérationnelle du système qui représente de loin la période la plus longue de son cycle de vie Le Bulletin 154 présente une approche générale et des concepts à appliquer à l'exploitation des barrages Le Bulletin 175 actuel tend les concepts à développer dans toutes les phases précédant la phase d'exploitation De nombreux risques associés à l'exploitation des barrages existants ont leur origine dans d'autres phases précédant l'exploitation proprement dite Bien qu'il existe de nombreux bulletins ICOLD traitant des aspects techniques de la planification de la conception de la

construction et de la mise en service des barrages il n existe pas un seul bulletin qui couvre le sujet de manière exhaustive Le document actuel est une première tentative de capturer tous les aspects pertinents de la sécurité des barrages dans toutes les phases préopératoires en caractérisant systématiquement les acteurs impliqués leurs rôles les activités et les interactions complexes présentes dans les différentes phases du cycle de vie du barrage Un système global de gestion de la sécurité est spécifiquement développé et peut être appliqué à tous les acteurs impliqués
