*Security Issues and the Law of the Sea* David Larson, 1994 To find more information on Rowman Littlefield titles please visit us at [www.rowmanlittlefield.com](http://www.rowmanlittlefield.com) *Maritime Security and the Law of the Sea* Natalie Klein, 2012-10-04 *Maritime Security and the Law of the Sea* examines the rights and duties of states across a broad spectrum of maritime security threats. It provides comprehensive coverage of the different dimensions of maritime security in order to assess how responses to maritime security concerns are and should be shaping the law of the sea. The discussion sets out the rules regulating passage of military vessels and military activities at sea, law enforcement activities across the different maritime zones, information sharing and intelligence gathering as well as armed conflict and naval warfare. In doing so, this book not only addresses traditional security concerns for naval power but also examines responses to contemporary maritime security threats such as terrorism, weapons of mass destruction, piracy, drug trafficking, environmental damage and illegal fishing. While the protection of sovereignty and national interests remain fundamental to maritime security and the law of the sea, there is increasing acceptance of a common interest that exists among states when seeking to respond to a variety of modern maritime security threats. This book argues that security interests should be given greater scope in our understanding of the law of the sea in light of the changing dynamics of exclusive and inclusive claims to ocean use. More flexibility may be required in the interpretation and application of the UN Convention on the Law of the Sea if appropriate responses to ensure maritime security are to be allowed. *Maritime Security and the Law of the Sea* Sir Malcolm D. Evans, Sofia Galani, 2020-01-31 Exploring everything from contemporary challenges to ocean security, this book offers detailed insights into the increasing activities of state and non-state actors at sea. Chapters revisit the United Nations Convention on the Law of the Sea (LOSC), highlighting how not all maritime security threats can be addressed by this and further looking at the ways in which the LOSC may even hinder maritime security. *Non-Traditional Security Issues and the South China Sea* Shicun Wu, Keyuan Zou, 2016-05-23 While there is abundant literature discussing non-traditional security issues, there is little mention of such issues existing in the South China Sea. This area is vulnerable to natural hazards and marine environmental degradation. The marine ecosystem is threatened by various adverse sources including land-based pollution, busy shipping lanes and over-exploitation activities which threaten the security of the surrounding population. This area is also threatened by piracy and maritime crimes but law enforcement becomes difficult due to unclear maritime boundaries. This volume is designed to explore the security cooperation and regional approaches to these non-traditional security issues in the hope to build a peaceful environment and maintain international and regional security and order in the South China Sea region. *The Future of the Law of the Sea* Gemma Andreone, 2017-03-30 This book is open access under a CC BY-NC 4.0 license. It explores the diverse phenomena which are challenging the international law of the sea today using the unique perspective of a simultaneous analysis of the national, individual and common interests at stake. This perspective, which all the contributors

bear in mind when treating their own topic also constitutes a useful element in the effort to bring today's legal complexity and fragmentation to a homogenous vision of the sustainable use of the marine environment and of its resources and also of the international and national response to maritime crimes The volume analyzes the relevant legal frameworks and recent developments focusing on the competing interests which have influenced State jurisdiction and other regulatory processes An analysis of the competing interests and their developments allows us to identify actors and relevant legal and institutional contexts retracing how and when these elements have changed over time
