**Consent to Sexual Relations** Alan Wertheimer, 2003-09-18 An important discussion of philosophical issues surrounding consent to sexual relations     The Ethics of Consent Franklin Miller, Alan Wertheimer, 2010 Consent is a basic component of the ethics of human relations making permissible a wide range of conduct that would otherwise be wrongful Consent marks the difference between slavery and employment permissible sexual relations and rape borrowing or selling and theft medical treatment and battery participation in research and being a human guinea pig This book assembles the contributions of a distinguished group of scholars concerning the ethics of consent in theory and practice Part One addresses theoretical perspectives on the nature and moral force of consent and its relationship to key ethical concepts such as autonomy and paternalism Part Two examines consent in a broad range of contexts including sexual relations contracts selling organs political legitimacy medicine and research     **Perfectionism and Contemporary Feminist Values** Kimberly A.

Yuracko, 2003-02-26 Although formal barriers to women's social and political participation have crumbled society remains to a significant degree gendered in the roles that women and men play Women's and men's choices regarding work and family are largely responsible for maintaining and reinforcing the differences While feminists recognize the need to criticize women's choices too often they focus on restrictive conditions rather than the choices themselves Kimberly A Yuracko argues instead that encouraging women to make choices in accordance with a grounded and well defined conception of perfectionism a philosophy concerned with human flourishing is the most effective way to redress persistent gender inequality To this end Yuracko seeks not only to expose the perfectionism underlying current choice critiques but to articulate a concrete set of feminist perfectionist principles that would improve the quality of individual women's lives and improve the social standing of women as a whole     *Coercion* Alan Wertheimer, 2014-07-14 Wertheimer attempts to move beyond previous theories of coercion by conducting a fairly extensive survey of the way in which cases involving coercion have been treated by American courts This impressive project occupies the first half of the book where he makes a convincing case that there is a fairly unified theory of coercion at work in adjudication past and present This legal theory however is not entirely adequate for the purposes of social and political philosophy and the last half of the book develops Wertheimer's more comprehensive philosophical theory Originally published in 1988 The Princeton Legacy Library uses the latest print on demand technology to again make available previously out of print books from the distinguished backlist of Princeton University Press These editions preserve the original texts of these important books while presenting them in durable paperback and hardcover editions The goal of the Princeton Legacy Library is to vastly increase access to the rich scholarly heritage found in the thousands of books published by Princeton University Press since its founding in 1905     **A Seductive Offer** Kathryn

Smith, 2002 When Rachel Ashton falls into an icy Yorkshire river Lord Braven dives in to save her Then when her stepfather sells her into marriage Braven comes to the rescue again offering to wed her himself Jacket     **Rethinking the Ethics of**

**Clinical Research** Alan Wertheimer, 2011 Clinical research requires that some people be used and possibly harmed for the benefit of others What justifies such use of people This book provides an in depth philosophical analysis of several crucial issues raised by that question Much writing on the ethics of research with human subjects assumes that participation in research is a distinctive activity that requires distinctive moral principles In most contexts we allow people to choose the activities in which they engage By contrast people are permitted to participate in research only after Institutional Review Boards determine that it is appropriate for them to do so Although we assume that consent to participate in research must be preceded by an elaborate disclosure of information we make no such assumption in many other areas of life Although it is thought to be morally problematic to provide financial inducements to prospective subjects we make no such assumptions when we hire people as loggers fishermen and fire fighters Although we readily accept the off shoring of manufacturing many regard the off shoring of medical research with great skepticism This book seeks to widen the lens through which we consider such issues When we do so we will find that many standard principles of research ethics are difficult to defend The book first argues that because respect for autonomy has been a central tenet of research ethics many have failed to recognize that the structure of the regulation of research is deeply paternalistic and have therefore failed to justify such paternalism The book then rejects the autonomous authorization model that characterizes most writing in bioethics and argues for a fair transaction model Although many worry that the use of financial payment to recruit research subjects is coercive or constitutes an undue inducement the book argues that most of those worries are misplaced Shifting its attention to research in developing societies the book considers the claim that international researchers exploit research abroad often exploits its subjects Finally the book considers the claim that because researchers benefit from their use of research subjects they acquire special obligations to them or their communities

**From Bevan to Blair** Geoffrey Goodman, 2003-09-20 For

**Strings Attached** Ruth W. Grant, 2014-04-06 The legitimate and illegitimate use of incentives in society today Incentives can be found everywhere in schools businesses factories and government influencing people s choices about almost everything from financial decisions and tobacco use to exercise and child rearing So long as people have a choice incentives seem innocuous But Strings Attached demonstrates that when incentives are viewed as a kind of power rather than as a form of exchange many ethical questions arise How do incentives affect character and institutional culture Can incentives be manipulative or exploitative even if people are free to refuse them What are the responsibilities of the powerful in using incentives Ruth Grant shows that like all other forms of power incentives can be subject to abuse and she identifies their legitimate and illegitimate uses Grant offers a history of the growth of incentives in early twentieth century America identifies standards for judging incentives and examines incentives in four areas plea bargaining recruiting medical research subjects International Monetary Fund loan conditions and motivating students In every case the analysis of incentives in terms of power yields strikingly different and more complex judgments than an analysis that views incentives as trades in which the desired behavior is freely exchanged for the incentives offered Challenging the role and function of incentives in a democracy Strings Attached questions whether the penchant for constant incentivizing undermines active autonomous citizenship Readers of this book are sure to view the ethics of incentives in a new light

**Lost in Translation Vol 3** John Klein, Adam Spears, 2012-03 This is the final book in a three volume series that covers the entire book of Revelation in awe inspiring detail expounding and expanding on familiar verses in God's word that have been misunderstood and misconstrued for many years In this volume the authors explore the second half of Revelation from

the perspective they established so clearly in Volumes 1 and 2 that of a Hebrew God speaking through a Hebrew believer to an audience that was intimately familiar with the Hebrew language culture customs and concepts that form both the literal and the metaphorical foundation for vast portions of Revelation      **Exploitation and Developing Countries** Jennifer S. Hawkins, Ezekiel J. Emanuel, 2008-08-04 When is clinical research in developing countries exploitation Exploitation is a concept in ordinary moral thought that has not often been analyzed outside the Marxist tradition Yet it is commonly used to describe interactions that seem morally suspect in some way A case in point is clinical research sponsored by developed countries and carried out in developing countries with participants who are poor and sick and lack education Such individuals seem vulnerable to abuse But does this by itself make such research exploitative Exploitation and Developing Countries is an attempt by philosophers and bioethicists to reflect on the meaning of exploitation to ask whether and when clinical research in developing countries counts as exploitative and to consider what can be done to minimize the possibility of exploitation in such circumstances These reflections should interest clinical researchers since locating the line between appropriate and inappropriate use of subjects the line between exploitation and fair use is the central question at the heart of research ethics Reflection on this rich and important moral concept should also interest normative moral philosophers of a non Marxist bent In addition to the editors the contributors are Richard J Arneson Alisa L Carse Margaret Olivia Little Thomas Pogge Andrew W Siegel and Alan Wertheimer      Psychotherapy and Science Robert Langs, 1999-10-06 This book issues a challenge to anyone in the field of psychotherapy who is resigned to seeing psychotherapy as solely a service activity or an art or craft Instead Langs invites us to see that psychotherapy clinical technique and practice may have intricate and fundamental conditions to the scientific laws of nature and the universe This work will also be of value to those psychotherapists who are interested in asking research questions about the process and technique of psychotherapy It is also a refreshing read in a postmodern era where the pursuit of validity and fundamental laws seems to have gone out of fashion New Therapist      **Truth** ,1927      *Memoirs of Robert-Houdin* Jean-Eugène Robert-Houdin, 1859
