Seeds From A Silent Tree:

The American Child Caroline Field Levander, Carol J. Singley, 2003 From the time that the infant colonies broke away from the parent country to the present day narratives of U S national identity are persistently configured in the language of childhood and family In *The American Child* A Cultural Studies Reader contributors address matters of race gender and family to chart the ways that representations of the child typify historical periods and conflicting ideas They build on the recent critical renaissance in childhood studies by bringing to their essays a wide range of critical practices and methodologies Although the volume is grounded heavily in the literary it draws on other disciplines revealing that representations of children and childhood are not isolated artifacts but cultural productions that in turn affect the social climates around them Essayists look at games pets adolescent sexuality death family relations and key texts such as *The Adventures of Huckleberry Finn* and the movie *Pocahontas* they reveal the ways in which the figure of the child operates as a rich vehicle for writers to consider evolving ideas of nation and the diverse role of citizens within it Seeds from a Silent Tree Tonya Bishoff, Jo Rankin, 1997

The Imprint of Another Life Adoption Narratives and Human Possibility addresses a series of questions about common beliefs about adoption Underlying these beliefs is the assumption that human qualities are innate and intrinsic an assumption often held by adoptees and their families sometimes at great emotional cost This book explores representations of adoption transracial transnational and domestic same race adoption that reimagine human possibility by questioning this assumption and conceiving of alternatives Literary scholar Margaret Homans examines fiction making s special relationship to themes of adoption an as if form of family making fabricated or fictional instead of biological or real Adoption has tended to generate

stories rather than uncover bedrock truths Adoptive families are made not born in the words of novelist Jeanette Winterson adopted children are self invented because we have to be In attempting to recover their lost histories and identities adoptees create new stories about themselves While some believe that adoptees cannot be whole unless they reconnect with their origins others believe that privileging biology reaffirms hierarchies such as those of race that harm societies and individuals Adoption is lived and represented through an irresolvable tension between belief in the innate nature of human traits and belief in their constructedness contingency and changeability The book shows some of the ways in which literary creation and a concept of adoption as a form of creativity manages this tension The texts examined include fiction e g classic novels such as *Silas Marner* *What Maisie Knew* and *Beloved* memoirs by adoptees adoptive parents and birthmothers drama documentary films advice manuals social science writing and published interviews with adoptees parents and birth parents Along the way the book tracks the quests of adoptees who whether or not they meet their original families must construct their own stories rather than finding them follows transnational adoptees as they return hopes held high to Korea and China looks over the shoulders of a generation of girls adopted from China as they watch Disney's iconic *Mulan* with its alluring story of destiny written on the skin and listens to birthmothers as they struggle to tell painful secrets held for decades This book engages in debates within adoption studies women's and gender studies transnational studies and ethnic studies it will appeal to literary scholars and critics including specialists in memoir or narrative theory and to general readers interested in adoption and in race

Global Families Catherine Ceniza Choy, 2013-10-11 In the last fifty years transnational adoption specifically the adoption of Asian children has exploded in popularity as an alternative path to family making Despite the cultural acceptance of this practice surprisingly little attention has been paid to the factors that allowed Asian international adoption to flourish In *Global Families* Catherine Ceniza Choy unearths the little known historical origins of Asian international adoption in the United States Beginning with the post World War II presence of the U S military in Asia she reveals how mixed race children born of Japanese Korean and Vietnamese women and U S servicemen comprised one of the earliest groups of adoptive children Based on extensive archival research *Global Families* moves beyond one dimensional portrayals of Asian international adoption as either a progressive form of U S multiculturalism or as an exploitative form of cultural and economic imperialism Rather Choy acknowledges the complexity of the phenomenon illuminating both its radical possibilities of a world united across national cultural and racial divides through family formation and its strong potential for reinforcing the very racial and cultural hierarchies it sought to challenge

Disrupting Kinship Kimberly D. McKee, 2019-03-02 Since the Korean War began Western families have adopted more than 200 000 Korean children Two thirds of these adoptees found homes in the United States The majority joined white families and in the process forged a new kind of transnational and transracial kinship Kimberly D McKee examines the growth of the neocolonial multi million dollar global industry that shaped these families a system she identifies as the transnational adoption industrial complex As she shows an alliance of the South Korean welfare state orphanages adoption agencies and American immigration laws powered transnational adoption between the two countries Adoption became a tool to supplement an inadequate social safety net for South Korea s unwed mothers and low income families At the same time it commodified children building a market that allowed Americans to create families at the expense of loving biological ties between Koreans McKee also looks at how Christian Americanism South Korean welfare policy and other facets of adoption interact with and disrupt American perceptions of nation citizenship belonging family and ethnic identity

From Orphan to Adoptee SooJin Pate, 2014-03-01 Since the 1950s more than 100 000 Korean children have been adopted by predominantly white Americans they were orphans of the Korean War or so the story went But begin the story earlier as SooJin Pate does and what has long been viewed as humanitarian rescue reveals itself as an exercise in expanding American empire during the Cold War Transnational adoption was virtually nonexistent in Korea until U S military intervention in the 1940s Currently it generates 35 million in revenue an economic miracle for South Korea and a social and political boon for the United States Rather than focusing on the families made whole by these adoptions this book identifies U S militarism as the condition by which displaced babies

became orphans some of whom were groomed into desirable adoptees normalized for American audiences and detached from their past and culture Using archival research film and literary materials including the cultural work of adoptees Pate explores the various ways in which Korean children were employed by the U S nation state to promote the myth of American exceptionalism to expand U S empire during the burgeoning Cold War and to solidify notions of the American family In From Orphan to Adoptee we finally see how Korean adoption became the crucible in which technologies of the U S empire were invented and honed
