Entrepreneurship Policy David B. Audretsch,Isabel Grilo,A. Roy Thurik,2007 This book is a well written and handy source for readers Additionally it provides an overview of current issues relevant to the development of entrepreneurial policy which is based on interesting case studies across a number of nations Dessy Irawati *International Journal of Entrepreneurial Behaviour and Research* What is new in the world is the need to understand business dynamics the entry exit and growth of firms in the economy This dynamic firm structure as opposed to the static firm structure that dominated past thinking has spurred an outpouring of research The heart of the issue is that while many have identified the importance of business dynamics entry and exit we have only recently taken a closer look at the ecological system in which some companies must die for others to thrive Entrepreneurs are the predators of this system Public policy in an entrepreneurial economy dynamic must limit the forces that prevent firm exit and foster the forces that promote firm entry This book makes an important contribution to the debate Zoltan J Acs George Mason University US and Max Planck Institute of Economics Germany This

unique Handbook provides a solid foundation for essential study in the nascent field of entrepreneurship policy research. This foundation is initially developed via the exploration of two significant propositions underpinning the nature of entrepreneurship policy research. The first is that entrepreneurship has emerged as a bona fide focus of public policy particularly with respect to economic growth and employment creation. The second is that neither scholars nor policy makers are presently equipped to understand the public policy role for entrepreneurship. The contributors, experienced scholars, specialist researchers, and dynamic policy makers, thus grapple with novel questions of considerable policy relevance that few have previously posed. The Handbook therefore provides some of the first crucial systematic analyses of important issues and key questions to be raised in order to move entrepreneurship policy forward, are also presented. Written by academics and practitioners drawing examples from both North America and Europe, this stimulating new Handbook is a prerequisite for students, scholars, and practitioners in the incipient world of entrepreneurship policy.

Leveraging Gender, Youth and Social Networks for Inclusive and Transformative Livestock Production in the Tropics and Subtropics. Stefan Burkart, Renee Marie Bullock, Juan Andrés Cardoso Arango, Marcela Ramos, Natalia Triana Angel, 2024-10-14. Social research has provided critical insights into understanding gender and generational gaps and the ways that power relations create differentiated access to agricultural and livestock technologies and services. Many of these technologies and services, such as improved feed options, grass-legume associations, silvo-pastoral systems, improved animal genetics, health and welfare, grazing management, and associated water and soil health and manure management, have the potential to improve livelihoods, sustainability, food security, and generational transfer dynamics. Their adoption contributes to mitigating many of the impacts the livestock sector has on the environment, through, for example, reducing greenhouse gas emissions and deforestation, increasing biodiversity, restoration, and land sparing. Likewise, their adoption helps producers adapt to climate change.

Agripreneurship across Africa. Food and Agriculture Organization of the United Nations, 2019-05-01. This publication aims to inspire budding entrepreneurs in Africa to consider business opportunities in agriculture and agro-industry, broadly defined. It is intended to be a promotional tool, as a sort of call to arms, particularly for women and youth. It also aims to serve as an educational tool and knowledge product in business schools and entrepreneurship incubator programmes, for case study-based learning on operating an agribusiness or agro-industry enterprise in Africa. The publication offers guidance to agripreneurs on how to overcome or avoid potential pitfalls and learn from the paths set out by the 12 agripreneurs whose stories reflect real-life experiences of agribusiness development in Africa. It should be seen as a collection of resources on agripreneurship, focused on these four topical areas: scale, women, youth, and challenging environments, while providing guiding advice for agripreneurs and policy makers. In addition to

educating entrepreneurs it is important to highlight the fundamental role of policy makers in shaping the enabling environment for agripreneurship In this context the publication aims to provide concrete policy recommendations on how to improve the enabling environment for agripreneurship based on the advice of the 12 agripreneurs featured here The aim is to guide policy makers to improve these targeted areas and inspire them to do so by providing accounts of successful agripreneurs who have built businesses with positive economic social and environmental impacts on national development
