developing seed technology so as to produce high quality seed but performance of seed conditioning by maximizing the operator s knowledge of getting the best performance from each of his machines has not been carefully and completely developed Improving Seed Conditioning focuses on teaching the conditioning plant operator details of each machine and how to get maximum performance from it in terms of operating efficiency maximum removal of undesirable particles and minimum loss of good seed Organized in a manner that focuses on the specific machine models installed in each operator s specific plant this manual is set up to be used as text material in training classes or as a guide for operators employed by seed companies     Agricultural Students' Gazette - A Quarterly Journal Vol. III No. 1 Students at the College, Cirencester, 1881
