Seeing Writing :

Writing and Seeing Rui Manuel G. de Carvalho Homem, Maria de Fátima Lambert, 2006 The essays in this volume are informed by a variety of theoretical assumptions and of critical methodologies but they all share an interest in the intersections of word and image in a variety of media This unifying rationale secures the present collection's central position in the current critical context defined as it predominantly is by ways of reading that are based on a relational nexus The intertextual the intermedial the intersemiotic are indeed foregrounded and combined in these essays conceptually as much as in the critical practices favoured by the various contributions Studies of literature in its relation to pictorial genres enjoy a relative prominence in the volume but the range of media and of approaches considered is broad enough to include photography film video television comic strips animated film public art material culture The backgrounds of contributors are likewise diverse culturally academically linguistically The volume combines contributions by prominent scholars and critics with essays by younger scholars from a variety of backgrounds The resulting plurality of perspective is indeed a source of new insights into the relations between writing and seeing and it contributes to making this collection an exciting new contribution to word and image studies

Seeing Chekhov Michael C. Finke, 2005 Chekhov's keen powers of observation have been remarked by both memoirists who knew him well and scholars who approach him only through the written record and across the distance of many decades To apprehend Chekhov means seeing how Chekhov sees and the author's remarkable vision is understood as deriving from his occupational or professional training and identity But we have failed to register let alone understand just what a central concern for Chekhov himself and how deeply problematic were precisely issues of seeing and being seen from the Introduction Michael C. Finke explodes a century of critical truisms concerning Chekhov's objective eye and what being a physician gave him as a writer in a book that foregrounds the deeply subjective and self-reflexive aspects of his fiction and drama In exploring previously unrecognized seams between the author's life and his verbal art Finke profoundly alters and deepens our understanding of Chekhov's personality and behaviors provides startling new interpretations of a broad array of Chekhov's texts and fleshes out Chekhov's simultaneous pride in his identity as a physician and devastating critique of turn of the century medical practices and ideologies Seeing Chekhov is essential reading for students of Russian literature

The Function of Theory in Composition Studies

Raul Sanchez, 2012-02-01 How can theory improve our knowledge of writing Raul Sanchez answers this question by examining dominant theoretical trends in composition studies over the last fifteen years citing their common origins in a narrow representational metatheory of writing He argues that this adherence actually leads the field away from its objects of study writing and the writing subject Through this extended critique he elaborates an alternative metatheory one that restores writing to the conceptual center of composition studies by emphasizing its generative rather than its representational characteristics particularly in increasingly networked and textualized cultures

Writing Technology

Christina Haas, 2013-11-05 Academic and practitioner journals in fields from electronics to business to language studies as well as the popular press have for over a decade been proclaiming the arrival of the computer revolution and making far reaching claims about the impact of computers on modern western culture Implicit in many arguments about the revolutionary power of computers is the assumption that communication language and words are intimately tied to culture that the computer s transformation of communication means a transformation a revolutionizing of culture Moving from a vague sense that writing is profoundly different with different material and technological tools to an understanding of how such tools can and will change writing writers written forms and writing s functions is not a simple matter Further the question of whether and how changes in individual writers experiences with new technologies translate into large scale cultural revolutions remains unresolved This book is about the relationship of writing to its technologies It uses history theory and empirical research to argue that the effects of computer technologies on literacy are complex always incomplete and far from unitary despite a great deal of popular and even scholarly discourse about the inevitability of the computer revolution The author argues that just as computers impact on discourse discourse itself impacts technology and explains how technology is used in educational settings and beyond

Writing without Teachers Peter Elbow, 1998-06-25 In *Writing Without Teachers* well known advocate of innovative teaching methods Peter Elbow outlines a practical program for learning how to write His approach is especially helpful to people who get stuck or blocked in their writing and is equally useful for writing fiction poetry and essays as well as reports lectures and memos The core of Elbow's thinking is a challenge against traditional writing methods Instead of editing and outlining material in the initial steps of the writing process Elbow celebrates non stop or free uncensored writing without editorial checkpoints first followed much later by the editorial process This approach turns the focus towards encouraging ways of developing confidence and inspiration through free writing multiple drafts diaries and notes Elbow guides the reader through his metaphor of writing as cooking his term for heating up the creative process where the subconscious bubbles up to the surface and the writing gets good 1998 marks the twenty fifth anniversary of *Writing Without Teachers* In this edition Elbow reexamines his program and the subsequent influence his techniques have had on writers students and teachers This invaluable guide will benefit anyone whether in the classroom boardroom or living room who has ever had trouble writing
