Seeking New Horizons A Perceptual Approach To Geographic Education:

Seeking New Horizons Henry W. Castner,1990-04-01 Castner developed this innovative perspective on geographic education through observation of the Orff Schulwerk technique of music education This pedagogical method provides an organizational framework within which the primitive elements and concepts of music can be introduced experienced and explored and auditory discrimination developed The process of improvisation is the focal point of the Schulwerk Castner suggests that the numerous educational benefits of improvisation can be obtained in geographic education by the process of mapping He defines mapping as graphic description analysis and presentation in a problem solving context After more than two decades of research in cartographic communication Castner concludes that success in examining and analysing landscapes and images representative of them is dependant upon developed skills in visual discrimination *Seeking New Horizons* describes a rationale for linking basic visual discriminations to their logical extensions in the concepts that are fundamental to geographic thinking thus providing challenging approaches to developing spatial awareness graphic literacy and geographic understanding In addition Castner identifies eight basic concepts which would allow students and teachers to work interactively with spatial information and over time with increasingly complex and sophisticated tools and at increasingly abstract levels of generalization

Seeking New Horizons Henry W. Castner,1990 Geography is often introduced to schoolchildren by having them look at maps as formal conventional objects rather than as tools for analysing and communicating ideas about geographic relationships But how effective is this Recent research in cartographic communication and map perception suggests that geographic literacy is generally quite low In *Seeking New Horizons* Henry Castner proposes another approach our focus should shift from maps to the ways in which geographic information and the relationships within it can be isolated and communicated graphically With the adoption of a perspective which focuses on the user children would be encouraged to discover the concepts underlying geographic thinking in its most elemental and natural forms

Geography in America at the Dawn of the 21st Century Gary L. Gaile,Cort J. Willmott,2005 *Geography in America at the Dawn of the 21st Century* surveys American geographers current research in their specialty areas and tracks trends and innovations in the many subfields of geography As such it is both a state of the discipline assessment and a topical reference It includes an introduction by the editors and 47 chapters each on a specific specialty The authors of each chapter were chosen by their specialty group of the American Association of Geographers AAG Based on a process of review and revision the chapters in this volume have become truly representative of the recent scholarship of American geographers While it focuses on work since 1990 it additionally includes related prior work and work by non American geographers The initial *Geography in America* was published in 1989 and has become a benchmark reference of American geographical research during the 1980s This latest volume is completely new and features a preface written by the eminent geographer Gilbert White

Learning and Teaching with Maps Patrick Wiegand,2006-01-31 A comprehensive and authoritative

account of how primary school children and teachers can use maps to enhance learning and deepen understanding of this essential skill. It includes all aspects of map use such as reading and interpreting maps and using maps to find the way covering maps of all scales including globes and atlases. The text is extensively illustrated with examples including maps made by children themselves using conventional materials as well as computer software. A particular feature of the book is the integration of digital and conventional mapping and Internet and CD ROM cartography together with simple applications of Geographic Information Systems GIS appropriate to the needs of children right through primary and secondary education. This book will be of great use to all primary teachers and subject teachers in secondary school as well as non specialist geography teachers and will enable children to use all types of maps in new compelling and thoughtful ways. **The Child's World** Margaret Robertson, Rodney Gerber, 2000 Young people who live most of their lives in the 21st century face dilemmas hardly experienced in the 20th century world the rapid compression of space and time an unprecedented rate of cultural and technological change the dissolution of many traditional boundaries. Already children live in a world unknown to us in our childhood they surf the net play virtual games and interact with cyberspace. What skills are required to help children navigate these very different spaces. How *Indian Geography* Anu Kapur, 1998 **International Encyclopedia of Human Geography**, 2009-07-16 The International Encyclopedia of Human Geography provides an authoritative and comprehensive source of information on the discipline of human geography and its constituent and related subject areas.
