Segregation Poverty And Mortality In Urban African Americans:

Segregation, Poverty, and Mortality in Urban African Americans Anthony P. Polednak, 1997 The potential impact of segregation on the health of African Americans is an intriguing and controversial issue that relates to the fields of epidemiology and the social sciences Epidemiologists have recently turned to the study of racism and health but epidemiologic studies have not dealt specifically with white black segregation and health This book brings together the results of several studies examining mortality rates for African Americans in selected U S urban areas in relation to both social class and the degree of black white residential segregation Despite allowances for economic disparity amongst the residents of the metropolitan areas studied mortality rates for African American infants and young adults traditional indicators of the level of social progress are shown to be especially high in certain highly segregated areas Beside the book's primary audience epidemiologists and public health practitioners this volume should appeal to sociologists especially medical sociologists who are likely to be familiar with segregation but not with its potential relevance to the health of African Americans as well as psychologists interested in racial discrimination Social workers urban studies experts and social and health policy makers will find much relevant material in this book as well

Gender, Ethnicity, and Health Research Sana Loue, 2007-05-08 Health researchers routinely evaluate health and illness across subgroups defined by their sex gender ethnicity and race All too often these classifications are proffered as an explanation for any differences that may be detected for example in access to care frequency of disease or response to treatment Relatively few researchers however have examined what these classifications mean on a theoretical level or in the context of their own research Assume for example that a researcher concludes from his or her data that African Americans utilize certain surgical procedures less frequently than whites This conclusion may mean little without an examination of the various underlying issues Is there such a construct as race at all How were whites and African Americans classified as such Does this finding reflect inappropriate overutilization of the specific procedures among whites or inappropriate

underutilization among African Americans To what extent are socioeconomic status and method of payment related to the less frequent use Are there differences in the manner in which health care providers present the various treatment options to whites and to African Americans that could account for these differences in utilization Are there differences in health care seeking and health care preferences between the two groups that would explain the difference in utilization Is the racial classification a surrogate measure for another variable that has remained unidentified and unmeasured All too often unfortunately such issues are ignored or lightly dismissed with an entreaty for additional research

Promoting Health
Institute of Medicine, Division of Health Promotion and Disease Prevention, Committee on Capitalizing on Social Science and Behavioral Research to Improve the Public's Health, 2000-03-01 At the dawn of the twenty first century Americans enjoyed better overall health than at any other time in the nation's history Rapid advancements in medical technologies breakthroughs in understanding the genetic underpinnings of health and ill health improvements in the effectiveness and variety of pharmaceuticals and other developments in biomedical research have helped develop cures for many illnesses and improve the lives of those with chronic diseases By itself however biomedical research cannot address the most significant challenges to improving public health Approximately half of all causes of mortality in the United States are linked to social and behavioral factors such as smoking diet alcohol use sedentary lifestyle and accidents Yet less than five percent of the money spent annually on U S health care is devoted to reducing the risks of these preventable conditions Behavioral and social interventions offer great promise but as yet their potential has been relatively poorly tapped Promoting Health identifies those promising areas of social science and behavioral research that may address public health needs It includes 12 papers commissioned from some of the nation's leading experts that review these issues in detail and serves to assess whether the knowledge base of social and behavioral interventions has been useful or could be useful in the development of broader public health interventions

The Heart of Long Term Care Rosalie A. Kane, Robert L. Kane, Richard C. Ladd, 1998 Long term care in the United States has taken the nursing home as its benchmark but the monetary social and psychological costs of nursing home care are all too high This book challenges the current dominance of nursing homes as the principal institution of long term care It offers a series of alternative models where both services and housing can be provided in a way that allows long term consumers to enjoy dignified normal lifestyles It addresses the political and economic consequences of making this decision The authors start with the premise that long term care is designed to assist people who lack the capacity to function fully independently They argue that no disabled person of any age should be required to forsake his her humanity in exchange for care The book rejects the artificial dichotomy between social and medical care asserting that both play important roles in psychological and physical well being of long term care patients The authors consider the need for competent and compassionate medicine and discuss the methods for improving both its coordination of care and its effectiveness The book redefines the meaning of safety and protection in long term care and how this goal can be accomplished without sacrificing quality of living As the new millennium and the aging of baby boomers approaches more creative approaches to providing better long term care are required This volume outlines a useful framework for the provision of effective and humane

community based programs that are both feasible and affordable It will be an invaluable guide for geriatricians public health professionals family physicians nurses and others who care for elderly patients *Health and Health Care Concerns among Women and Racial and Ethnic Minorities* Jennie Jacobs Kronenfeld,2017-08-31 This volume covers macro and micro level issues involving health and health care concerns for women and racial and ethnic minorities The book includes an examination of health and health care issues of patients providers of care especially those related to concerns for women and for racial and ethnic minorities in different countries

Embodying Inequality Nancy Krieger,2016-12-05 To advance the epidemiological analysis of social inequalities in health and of the ways in which population distributions of disease disability and death reflect embodied expressions of social inequality this volume draws on articles published in the International Journal of Health Services between 1990 and 2000 Framed by ecosocial theory it employs ecosocial constructs of embodiment pathways of embodiment cumulative interplay of exposure susceptibility and resistance across the lifecourse and accountability and agency to address the question and who and what drives current and changing patterns of social inequalities in health *Social Epidemiology* Lisa F. Berkman,Ichiro Kawachi,2000-03-09 The authors of this groundbreaking text define social epidemiology as the study of the social determinants of health implying that an important goal of public health is to identify and address factors in the social environment that may be related to health outcomes In the first systematic account of this field they focus on the major social variables that influence health including socioeconomic position income distribution race ethnicity gender social networks social support social capital and community cohesion work environment life transitions and affective psychological states Individual chapters describe the conceptualization and measurement of each social variable as well as the empirical evidence linking them to a broad range of mental physical and behavioral health outcomes The volume draws on the expertise of an internationally renowned group of scholars representing the diversity of disciplines relevant to this emerging field from sociology and psychology to physiology and medicine The approaches covered by the chapters span the range from formulating and testing hypotheses about the links between social conditions and health to designing and implementing interventions and social policies to improve population health The challenge of persistent social inequalities in health across the globe makes this a timely publication The book will be an indispensable introduction to the field for students researchers practitioners and policy analysts

Passed On Karla FC Holloway,2002-01-30 Passed On is a portrait of death and dying in twentieth century African America Through poignant reflection and thorough investigation of the myths rituals economics and politics of African American mourning and burial practices Karla FC Holloway finds that ways of dying are just as much a part of black identity as ways of living Gracefully interweaving interviews archival research and analyses of literature film and music Holloway shows how the vulnerability of African Americans to untimely death is inextricably linked to how black culture represents itself and is represented With a focus on the death care industry black funeral homes and morticians the history of the

profession and its practices Holloway examines all facets of the burial business from physicians hospital chaplains and hospice administrators to embalming chemical salesmen casket makers and funeral directors to grieving relatives She uses narrative photographs and images to summon a painful history of lynchings white rage and riot medical malpractice and neglect executions and neighborhood violence Specialized caskets sold to African Americans formal burial photos of infants and deathbed stories unveil a glimpse of the graveyards and burial sites of African America along with burial rituals and funeral ceremonies Revealing both unexpected humor and anticipated tragedy Holloway tells a story of the experiences of black folk in the funeral profession and its clientele She also reluctantly shares the story of her son and the way his death moved her research from page to person In the conclusion which follows a sermon delivered by Maurice O Wallace at the funeral for the author s son Bem Holloway strives to commemorate through observation ceremony and the calling of others to remembrance and celebration

Community Health Nursing Karen Saucier Lundy, Sharyn Janes, 2009 Historically community health nursing has responded to the changing health care needs of the community and continues to meet those needs in a variety of diverse roles and settings *Community Health Nursing Caring for the Public s Health Second Edition* reflects this response and is representative of what communities signify in the United States a unified society made up of many different populations and unique health perspectives This text provides an emphasis on population based nursing directed toward health promotion and primary prevention in the community It is both community based and community focused reflecting the current dynamics of the health care system The Second Edition contains new chapters on disaster nursing and community collaborations during emergencies The chapters covering Family health ethics mental health and pediatric nursing have all been significantly revised and updated

Advancing Environmental Justice Through Community-based Participatory Research, 2002 *Public Health Reports*, 2001 **Social Epidemiology** Lisa F. Berkman PhD, Ichiro Kawachi MD, PhD, Maria Glymour ScD, 2014-07-09 Social epidemiology is the study of how the social world influences and in many cases defines the fundamental determinants of health This link was substantiated in the first edition of *Social Epidemiology* and the generation of research that followed has fundamentally changed the way we understand epidemiology and public health This much awaited second edition elevates the field again first by codifying the last decade of research then by extending it to examine how public policies impact health The new edition includes 11 fully updated chapters including entries on the links between health and discrimination income inequality social networks and emotion Four all new chapters on the role of policies in shaping health including how to translate evidence into action with multi level interventions Updated references detailing the best research over the last two decades The result is a bold brilliant text that will serve the new world of epidemiology in which scientists both observe health and design interventions to improve it *Social Epidemiology* again sets an intellectual agenda and provides an essential foundation for those interested in social determinants of health around the world *Neighborhoods and Health* Ichiro Kawachi, Lisa F. Berkman, 2003-03-20 Do

places make a difference to people's health and well-being. The authors of this groundbreaking textbook demonstrate convincingly how the physical and social characteristics of a neighborhood can shape the health of its residents. Drawing on the expertise of a renowned cast of researchers, this book presents a state-of-the-art account of the theories, methods, and empirical evidence linking neighborhood conditions to population health. Represented in the volume are contributions from the world's leading investigators in the field, including social epidemiologists, demographers, medical geographers, sociologists, and medical practitioners. This comprehensive textbook lays out for the first time the methodological approaches to conducting neighborhood research, including multi-level and contextual analysis, geocoding, and the use of small area-based measures of deprivation, as well as the evolving science of ecometrics. Substantive chapters present the case for the relevance of neighborhood effects on health outcomes throughout the life cycle, from infant mortality and low birthweight to childhood asthma, adult infectious diseases, and disability in old age. The approaches covered in the book range from testing the linkages between community-level variables such as social capital and residential segregation and population health to designing and implementing community interventions and policies to improve the health of the public. The book is a timely companion volume to *Social Epidemiology* (Oxford University Press, 2000), edited by the same authors, and an indispensable manual on neighborhood research for students, researchers, and practitioners.
