Selection V Rhode Island School of Design. Museum of Art, 1975 **Graphics Recognition. Recent Advances and Perspectives** Josep Lladós, Young-Bin Kwon, 2004-09-23 1

This book contains refereed and improved papers presented at the 5th IAPR International Workshop on Graphics Recognition GREC 2003 GREC 2003 was held in the Computer Vision Center in Barcelona Spain during July 30 31 2003

The GREC workshop is the main activity of the IAPR TC10 the Technical 2 Committee on Graphics Recognition Edited volumes from the previous workshops in the series are available as Lecture Notes in Computer Science LNCS Volume 1072 GREC 1995 at Penn State University USA LNCS Volume 1389 GREC 1997 in Nancy France LNCS Volume 1941 GREC 1999 in Jaipur India and LNCS Volume 2390 GREC 2001 in Kingston Canada Graphics recognition is a particular field in the domain of document analysis that combines pattern recognition and image processing techniques for the analysis of any kind of graphical information in documents either from paper or electronic formats Topics of interest for the graphics recognition community are vectorization symbol recognition analysis of graphic documents with a grammatic notation like electrical diagrams architectural plans engineering drawings musical scores maps etc graphics based information retrieval performance evaluation in graphics recognition and systems for graphics recognition In addition to the classic objectives in recent years graphics recognition has faced up to new and promising perspectives some of them in conjunction with other scientific communities Examples of that are sketchy interfaces and on line graphics recognition in the framework of human computer interaction or query by graphic content for retrieval and browsing in large format graphic documents digital libraries and Web applications Thus the combination of classic challenges with new research interests gives the graphics recognition field an active scientific community with a promising future

Document Analysis Systems VI Simone Marinai, Andreas Dengel, 2004-12-10 This volume contains papers selected for presentation at the 6th IAPR Workshop on Document Analysis Systems DAS 2004 held during September 8 10 2004 at the University of Florence Italy Several papers represent the state of the art in a broad range of traditional topics such as layout analysis applications to graphics recognition and handwritten documents Other contributions address the description of complete working systems which is one of the strengths of this workshop Some papers extend the application domains to other media like the processing of Internet documents The peculiarity of this 6th workshop was the large number of papers related to digital libraries and to the

processing of historical documents a task which frequently requires the analysis of color documents A total of 17 papers are associated with these topics whereas two years ago in DAS 2002 only a couple of papers dealt with these problems In our view there are three main reasons for this new wave in the DAS community From the scientific point of view several research fields reached a thorough knowledge of techniques and problems that can be effectively solved and this expertise can now be applied to new domains Another incentive has been provided by several research projects funded by the EC and the NSF on topics related to digital libraries

Advances in Petri Nets 1991 Helmut Plünnecke, Wolfgang Reisig, 1991 The main idea behind the series of volumes Advances in Petri Nets is to present to the general computer science community recent results which are the most representative and significant for the development of the area The papers for the volumes are drawn mainly from the annual International Conferences on Applications and Theory of Petri Nets Selected papers from the latest conference are independently refereed and revised and extended as necessary Some further papers submitted directly to the editor are included Advances in Petri Nets 1991 covers the 11th International Conference on Applications and Theory of Petri Nets held in Paris France in June 1991 The volume contains the Bibliography of Petri Nets 1990 prepared by H Plünnecke and W Reisig with over 4000 entries PUBLISHER S WEBSITE *Catalog of Copyright Entries.
