**Context Management for Distributed and Dynamic Context-Aware Computing** Ricardo Couto Antunes da Rocha,Markus Endler,2012-05-03 Research in context aware computing has produced a number of middleware systems for context management However development of ubiquitous context aware applications is still a challenge because most current middleware systems are still focused on isolated and static context aware environments Context aware environments are inherently dynamic as a result of occasional additions or upgrade of sensors applications or context inference mechanisms Context Management for Distributed and Dynamic Context Aware Computing proposes a novel architecture for context management based on the concept of context domains allowing applications to keep context interests across distributed context management systems The authors describe a distributed middleware that implements the aforementioned concepts without compromising scalability and efficiency of context access

**Context in Computing** Patrick Brézillon,Avelino J. Gonzalez,2014-12-09 This volume explores how context has been and can be used in computing to model human behaviors actions and communications as well as to manage data and knowledge It addresses context management and exploitation of context for sharing experience across domains The book serves as a user centric guide for readers wishing to develop context based applications as well as an intellectual reference on the concept of context It provides a broad yet deep treatment of context in computing and related areas that depend heavily on computing The coverage is broad because of its cross disciplinary nature but treats topics at a sufficient depth to permit a reader to implement context in his her computational endeavors The volume addresses how context can be integrated in software and systems and how it can be used in a computing environment Furthermore the use of context to represent the human dimension individually as well as collectively is explained Contributions also include descriptions of how context has been represented in formal as well as non formal structured approaches The last section describes several human behavior representation paradigms based on the concept of context as its central representational element The depth and breadth of this content is certain to provide useful as well as intellectually enriching information to readers of diverse backgrounds who have an interest in or are intrigued by using context to assist in their representation of the real world *Computer Assisted Instruction* Gerald L. Comparable Corpora and Computer-assisted Translation Estelle Maryline Delpech, 2014-07-22 Computer assisted translation CAT has always used translation memories which require the translator to have a corpus of previous translations that the CAT software can use to generate bilingual lexicons This can be problematic when the translator does not have such a corpus for instance when the text belongs to an emerging field To solve this issue CAT research has looked into the leveraging of comparable corpora i.e. a set of texts in two or more languages which deal with the same topic but are not translations of one another This work had two primary objectives The first is to assess the input of lexicons extracted from comparable corpora in the context of a specialized human translation task The second objective is to identify bilingual lexicon extraction methods which best match the translators needs determining the current limits of these techniques and suggesting improvements The author focuses in particular on the identification of fertile translations the management of multiple morphological structures and the ranking of candidate translations The experiments are carried out on two language pairs English French and English German and on specialized texts dealing with breast cancer This research puts significant emphasis on applicability methodological choices are guided by the needs of the final users This book is organized in two parts the first part presents the applicative and scientific context of the research and the second part is given over to efforts to improve compositional translation The research work presented in this book received the PhD Thesis award 2014 from the French association for natural language processing ATALA
