**Reception and Renewal in Modern Spanish Theatre, 1939-1963** John London, 1997 The book constitutes the first attempt to provide an overview of the reception of foreign drama in Spain during the Franco dictatorship John London analyses performance stage design translation censorship and critical reviews in relation to the works of many authors including Noel Coward Arthur Miller Eugene Ionesco and Samuel Beckett He compares the original reception of these dramatists with the treatment they were given in Spain However his study is also a reassessment of the Spanish drama of the period Dr London argues that only by tracing the reception of non Spanish drama can we understand the praise lavished on playwrights such as Antonio Buero Vallejo and Alfonso Sastre alongside the simultaneous rejection of Spanish avant garde styles A concluding reinterpretation of the early

plays of Fernando Arrabal indicates the richness of an alternative route largely ignored in histories of Spanish theatre

Emilia Pardo Bazan Maurice Hemingway,1983      *Forty Miles from the Sea* Rachel A. Moore,2022-12-06 While the literature on Atlantic history is vast and flourishing few studies have examined the importance of inland settlements to the survival of Atlantic ports This book explores the symbiotic yet conflicted relationships that bound the Mexican cities of Xalapa and Veracruz to the larger Atlantic world and considers the impact these affiliations had on communication and ultimately the formation of national identity Over the course of the nineteenth century despite its inland location Xalapa became an important Atlantic community as it came to represent both a haven and a place of fortification for residents of Veracruz Yellow fever foreign invasion and domestic discord drove thousands of residents of Veracruz as well as foreign travelers to seek refuge in Xalapa At the same time these adverse circumstances prompted the Mexican government to use Xalapa as a bulwark against threats originating in the Atlantic The influence of the Atlantic world thus stretched far into central Mexico thanks to both the instability of the coastal region and the desire of government officials to protect central Mexico from volatile Atlantic imports The boundaries established at Xalapa however encouraged goods information and people to collect in the city and thereby immerse the population in the developments of the Atlantic sphere Thus in seeking to protect the center of the country government authorities more firmly situated Xalapa in the Atlantic world This connection would be trumped by national affiliation only when native residents of Xalapa became more comfortable with their participation in the Mexican public sphere later in the nineteenth century The interdisciplinary and comparative nature of this study will make it appeal to those studying Atlantic history including historians of Britain the United States Latin America and Africa as well as those studying communication print culture and postal history more broadly

**Spanish Women Writers and Spain's Civil War** Maryellen Bieder,Roberta Johnson,2016-12-01 The Spanish Civil War 1936 1939 pitted conservative forces including the army the Church the Falange fascist party landowners and industrial capitalists against the Republic installed in 1931 and supported by intellectuals the petite bourgeoisie many campesinos farm laborers and the urban proletariat Provoking heated passions on both sides the Civil War soon became an international phenomenon that inspired a number of literary works reflecting the impact of the war on foreign and national writers While the literature of the period has been the subject of scholarship women s literary production has not been studied as a body of work in the same way that literature by men has been and its unique features have not been examined Addressing this lacuna in literary studies this volume provides fresh perspectives on well known women writers as well as less studied ones whose works take the Spanish Civil War as a theme The authors represented in this collection reflect a wide range of political positions Writers such as Maria Zambrano Merc Rodoreda and Josefina Aldecoa were clearly aligned with the Republic whereas others including Mercedes Salisachs and Liberata Masoliver sympathized with the Nationalists Most however are situated in a more ambiguous political space although the ethics and character portraits that emerge in their works might suggest Republican sympathies Taken together

the essays are an important contribution to scholarship on literature inspired by this pivotal point in Spanish history

Modern Language Forum ,1926      Otherness in Hispanic Culture Teresa Fernandez Ulloa,2014-06-26 This book addresses contemporary discourses on a wide variety of topics related to the ideological and epistemological changes of the 19th 20th and 21st centuries and the ways in which they have shaped the Spanish language and cultural manifestations in both Spain and Hispanic America The majority of the chapters are concerned with otherness in its various dimensions the alien Other foreign immigrant ethnically different disempowered female or minor as well as the Other of different sexual orientation and or ideology Following Octavio Paz otherness is expressed as the attempt to find the lost object of desire the frustrating endeavour of the androgynous Plato wishing to embrace the other half of Zeus who in his wrath tore off from him Otherness compels human beings to search for the complement from which they were severed Thus a male joins a female his other half the only half that not only fills him but which allows him to return to the unity and reconciliation which is restored in its own perfection formerly altered by divine will As a result of this transformation one can annul the distance that keeps us away from that which not being our own turns into a source of anguish The clashing diversity of all things requires the human predisposition to accept that which is different Such a predisposition is an expression of epistemological ethical and political aperture The disposition to co exist with the different is imagined in the de anthropocentricization of the bonds with all living realms And otherness is in some way the reflection of sameness mismidad The other is closely related to the self because the vision of the other implies a reflection about the self it implies consciously or not a relationship with the self These topics are addressed in this book from an interdisciplinary perspective encompassing arts humanities and social sciences

**The Representation of the Political in Selected Writings of Julio Cortázar** Carolina Orloff,2013 Orloff shows that Cort zar did not become a political writer as a result of the Cuban Revolution as is often claimed but rather that the representation of the political was present in Cort zar s very first writings The book analyses the evolution of the representation of distinct political elements throughout Cort zar s writings mainly with reference to the novels and the so called collage books which have so far received only limited critical attention The author also alludes to some short stories and refers to many of Cort zar s non literary texts Through this chosen corpus the book follows a thematic thread showing that politics was present in Cort zar s fiction from his very first writings and not as he himself tended to claim only following his conversion to socialism The study aims to show that contrary to what many critics have argued this political conversion did not divide the writer into an irreconcilable before and after the apolitical versus the political but rather it simply shifted the emphasis of the representation of the political that already existed in Cort zar s writings Carolina Orloff is an independent scholar working on research projects in the UK and in Argentina
