Sg Experimental Psychology:

Mathematics Education: The Singapore Journey Khoon Yoong Wong, Peng Yee Lee, Berinderjeet Kaur, Pui Yee Foong, Swee Fong Ng, 2009-02-19 This comprehensive book is a state of the art review of research and practices of mathematics education in Singapore. It traces the fascinating journey from the original development of the Singapore mathematics curriculum in the 1950s to the present day and reports on diverse findings about the Singapore experience that are not readily available in print. All of the authors are active mathematics educators or senior mathematics teachers in Singapore, thus adding authenticity and distinctiveness to the stories covered in this book. The issues they so earnestly explore in this book will undoubtedly be of interest to graduate students, mathematics educators, and the international mathematics education community.

Handbook of Human Factors Testing and Evaluation Samuel G. Charlton, Thomas G. O'Brien, 2019-09-25 Like the first edition, the revision of this successful Handbook responds to the growing need for specific tools and methods for testing and evaluating human system interfaces. Indications are that the market for information on these tools and applications will continue to grow in the 21st century. One of the goals of offering a second edition is to expand and emphasize the application chapters providing contemporary examples of human factors test and evaluation. HFTE enterprises across a range of systems and environments. Coverage of the standard tools and techniques used in HFTE have been updated as well. New features of the Handbook of Human Factors Testing and Evaluation include new chapters covering human performance testing, manufacturing ergonomics, anthropometry, generative design methods, and usability testing; updated tools and techniques for modeling simulation, embedded testing, training, assessment, and psychophysiological measurement; new applications chapters presenting human factors testing examples in aviation and avionics, forestry, road safety, and software systems; and more examples, illustrations, graphics, and tables have been added. The orientation of the current work has been toward breadth of coverage rather than in-depth treatment of a few issues or techniques. Experienced testers will find much that is familiar as well as new tools, creative approaches, and a rekindled enthusiasm. Newcomers will discover the diversity of issues, methods, and creative approaches that make up the field. In addition, the book is written in such a way that individuals outside the profession should learn the intrinsic value and pleasure in ensuring safe, efficient, and effective operation as well as increased user satisfaction through HFTE.

The Oxford Handbook of Social Influence Stephen G. Harkins, Kipling D. Williams, Jerry M. Burger, 2017 The Oxford Handbook of Social Influence restores this important field to its once preeminent position within social psychology. Editors Harkins, Williams, and Burger lead a team of leading scholars as they explore a variety of topics within social influence, seamlessly incorporating a range of analyses including intrapersonal, interpersonal, and intragroup, and examine critical theories and the role of social influence in applied settings today.

Memory Development from Early Childhood Through Emerging Adulthood Wolfgang Schneider, 2014-09-03 Based on decades of established research findings in cognitive and developmental psychology, this volume explores and integrates the

leading scientific advances into infancy and brain memory linkages as well as autobiographical and strategic memory. In addition, given that the predominantly classic research on memory development has recently been complemented by more cutting edge applied research e.g. eyewitness memory, memory development in educational contexts in recent years, this volume also provides in depth and up to date coverage of these emerging areas of study.

Individual Motivation within Groups Steven Karau, 2019-10-18. *Individual Motivation within Groups: Social Loafing and Motivation Gains in Work, Academic, and Sports Teams* explores the state of our scientific understanding of when and why individuals are most and least likely to work hard as members of groups and work teams. This book addresses key psychological phenomena such as social loafing, social dilemmas, social facilitation, and ostracism, with each chapter creating connections to related topics such as leadership, performance in learning groups, isolated teams, and more. This volume provides a summary of the field's history, synthesizes related research, and using the Collective Effort Model and other key motivational theories, looks at the current level of understanding of both motivation losses and gains in groups. *Individual Motivation within Groups* is a vital resource for social, organizational, and applied psychologists, as well as academics and researchers in these fields and related areas such as leadership and team performance. Explores individual motivation in multiple contexts such as work teams, educational settings, sports teams, and more. Highlights recent research, advances, future directions, and linkages with related research areas. Discusses cross-cultural and international implications. Examines factors that detract from and contribute to group motivation. Individual motivation within groups.

Language and Society in Singapore Evangelos A. Afendras, Eddie C. Y. Kuo, 1980. *The Oxford Handbook of Social Cognition, Second Edition* Donal E. Carlston, Kurt Hugenberg, Kerri L. Johnson, 2024. This revised edition overhauls the first edition with a majority of chapters reconceptualized, focusing on offering a comprehensive review and a new multigenerational perspective. The chapter also includes a multitude of new topics including gender identity, intersectionality, prejudice, happiness, and wellbeing, questionnaire methodology, and more.

Teaching Chinese Language in Singapore Kay Cheng Soh, 2018-05-17. This book presents the experiences of Chinese Language researchers in Singapore to Chinese Language researchers and teachers in other countries and regions such as the USA, the UK, and Asia, that are home to a large number of learners young and old. As such, the innovative ideas it provides can be applied in practising teachers' classrooms to promote more effective and efficient student learning. Beyond pedagogical innovations, the book also includes papers on the assessment of Chinese Language learning and teacher literacy, two areas that have been largely neglected by the Chinese Language research and teaching communities, not only here in Singapore but also around the world. This book is the sequel to *Teaching Chinese Language in Singapore: Retrospect and Challenges* (Springer, 2016), is future-oriented, highlighting ideas that merit further attention from researchers and practitioners alike.

Metacognition and Cognitive Neuropsychology Giuliana Mazzoni, Thomas O. Nelson, 2014-05-12. Control processes are those mental functions that allow us to initiate, monitor, and prioritize mental activities. They are crucial

to normal mental functioning A better understanding of the nature of control processes and their deficits is important for clinical work and for an adequate theory of consciousness Previously control processes have been examined within the frameworks of two parallel but independent paradigms those of cognitive psychology and of neuropsychology Cognitive psychologists have stressed the theoretical and empirical nature of normal unimpaired control processes neuropsychologists have focused on the relationships between damage to specific functional areas of the brain and deficits in specific control processes Both have contributed extensively to our understanding of control processes However they have tended to operate independently with little if any cross talk between disciplines despite the potential benefits such dialogue is likely to generate This book represents the first attempt to synthesize cognitive and neuropsychological perspectives on control processes It contains state of the art reports on various aspects of control processes by experts from both disciplines
