Understanding IBM Workplace Strategy and Products Ron Sebastian,Douglas W. Spencer,2005-10

Annotation IBM Workplace represents an entire portfolio of IBM products new and existing that focuses on increasing people's productivity in a new way. In this book IBM Software Live Program Director Douglas Spencer and Senior Lotus Consultant Ron Sebastian start with an introduction to people productivity in the context of IBM's On Demand Business vision. Then the IBM Workplace strategy and products are described. You will see how the underlying componentized software infrastructure of IBM Workplace provides the flexibility businesses need in the emerging on demand world. You will see how many users without traditional desks such as an outbound sales force, factory floor staff, airline pilots etc. can collaborate with others, boosting the productivity of the entire organization, trading partners and customers. The authors then provide an overview of the key product lines that implement the IBM Workplace vision including IBM Workplace WebSphere Portal, Lotus Notes and Domino and WebSphere Everyplace. You will learn how the new IBM Workplace client technology for these products combines the rich user experience of client server with the cost characteristics of Web based applications, giving users the best of both worlds. In the final chapter the authors explore industry specific people productivity solutions tailored for the needs of specific industries including aerospace, defense, automotive, banking, financial markets, consumer products, electronics, utilities, government, health care, insurance, life sciences, retail and telecommunications etc. The Foreword by IBM Software Group General Manager of Workplace Portal and Collaboration Software, Michael D Rhodin, provides an insider's perspective on the thinking behind IBM Workplace. To help you stay current, this book comes with your personal password for accessing the companion Web site which offers up to the minute IBM Workplace news. Handheld and Ubiquitous Computing Peter Thomas, Hans-W. Gellersen, 2003-07-31. The papers collected here are those selected for presentation at the Second International Symposium on Handheld and Ubiquitous Computing 2000 (HUC 2000) held in Bristol, UK, in September 2000. The symposium was the second in a series of symposia which explores new research in the area of emerging mobile, personal and handheld technologies. The first event, HUC 99, was held in Karlsruhe, Germany, organised by the Telecooperation Office (TecO) of the University of Karlsruhe in close collaboration with the Center for Arts and Media Technology (ZKM). This previous event, the first of its kind in the world, attracted a large number of paper submissions, was attended by over 200 international delegates and demonstrated the growing international interest in the area, with contributions from the United States, Japan and Europe. The 18 papers collected here were chosen from 70 submissions to HUC 2000 and represent a valuable resource for those wishing to understand the themes being pursued in this vibrant and exciting area of technology. The papers range from work on intelligent environment and devices, user experience and interface design to research in context aware systems, wearable computing and location based services. Together, the papers represent a snapshot of the state of the art in research in handheld and ubiquitous computing. The symposium also attracted a large number of short paper submissions and these are available in the Springer journal *Personal Technologies*, volume 4, number 4, which was published in tandem with these proceedings.
