Mainstone, 2024-10-28 All buildings must stand An adequate structure was as necessary for the simplest primitive hut as it is for the tallest or widest spanning modern building However this requirement became more difficult to satisfy as designers became more adventurous and the experience already gained became less directly applicable The present papers look at the consequent evolution of design methods and the types of understanding that have been essential guides A particular focus is the question of how earlier innovations made without the benefits of modern theory were possible Other papers look in detail at the most outstanding of these achievements such as the church of Hagia Sophia in Istanbul and the dome of Florence Cathedral **The Emperor's House** Michael Featherstone, Jean-Michel Spieser, Gülru Tanman, Ulrike Wulf-Rheidt, 2015-08-31 Evolving from a patrician domus the emperor's residence on the Palatine became the centre of the state administration Elaborate ceremonial regulated access to the imperial family creating a system of privilege which strengthened the centralised power Constantine followed the same model in his new capital under a Christian veneer The divine attributes of the imperial office were refashioned with the emperor as God's representative The palace was an imitation of heaven Following the loss of the empire in the West and the Near East the Palace in Constantinople was preserved subject to the transition from Late Antique to Mediaeval conditions until the Fourth Crusade attracting the attention of Visigothic Lombard Merovingian Carolingian Norman and Muslim rulers Renaissance princes later drew inspiration for their residences directly from ancient ruins and Roman literature but there

was also contact with the Late Byzantine court Finally in the age of Absolutism the palace became again an instrument of power in vast centralised states with renewed interest in Roman and Byzantine ceremonial Spanning the broadest chronological and geographical limits of the Roman imperial tradition from the Principate to the Ottoman empire the papers in the volume treat various aspects of palace architecture art and ceremonial *Advances in Utopian Studies and Sacred Architecture* Claudio Gambardella, Claudia Cennamo, Maria Luisa Germanà, Mohd Fairuz Shahidan, Hocine Bougdah, 2021-02-02 At a time dominated by the disappearance of Future as claimed by the French anthropologist Marc Augé Utopia and Religion seem to be two different ways of giving back an inner horizon to mankind Therefore this book on the one hand considers the importance of utopia as a tool and how it offers an economic and social resource to improve cities wealth future and livability On the other it explores the impact of religious and cultural ideals on cities that have recently emerged in this context Based on numerous observations the book examines the intellectual legacy of utopian theory and practices across various academic disciplines It also presents discussions theories and case studies addressing a range of issues and topics related to utopia The Architecture of the Renaissance in France William Henry Ward, 1926 **Architecture and the Image at the Turn of the 21st Century** Sanja Rodeš, 2024-06-28 This book examines architecture image and media relationships as productive for architecture and architectural discourses By arguing that the relationships between architecture and media cannot be dismissed via linear criticism of architecture and media or image these relations are instead seen as a part of a sphere a mediasphere of complex relationships In lieu of anything like a consensus on the contemporary condition of architecture referring to the late twentieth and the twenty first centuries the starting point of this book is that the relationships between architecture media and images continue to multiply owing to continuous technological advancements Contemporary architecture considered in this book is related to the selected circumstances of high visibility where architectural images are propelled into visibility and conflated with non architectural images This takes architecture outside of architectural only discourse and into the public realm By granting higher visibility to both the architectural images and architecture in the public realm architecture can also be influenced by the various perceptions of the general public and can enter public consciousness via non architectural media With increased visibility architecture's far reaching presence calls for more structured analysis of its nature and potential As the analysed architecture in this book is associated with the discourses outside of architecture some of which relate to terrorism natural disaster and branding and consumption the limits of contemporary architectural discipline are questioned and extended This book is written for academics and students in architectural history theory and criticism particularly those interested in visual and media studies **A History of Architecture, on the Comparative Method ...** Banister Fletcher, Sir Banister Fletcher, 1901
