Merchant Ship Types:

Merchant Ship Types Alexander Arnfinn Olsen, 2023-01-24 Merchant Ship Types provides a broad and detailed introduction to the classifications and main categories of merchant vessels for students and cadets. It introduces the concept of ship classification by usage, cargo type and size and shows how the various size categories affect which ports and channels the types of vessels are permitted to enter. Detailed outlines of each major vessel category are provided including Feeder ship, General cargo vessels, Container ships, Tankers, Dry bulk carriers, Multi purpose vessels, Reefer ships, Roll on roll off vessels. The book also explains where these are permitted to operate, the type of cargoes carried and specific safety or risk factors associated with the vessel class as well as their main characteristics. Relevant case studies are presented. The textbook is ideal for merchant navy cadets at HNC, HND and foundation degree level in both the deck and engineering branches and serves as a general reference for insurance law, logistics, offshore and fisheries.

Cargo Access Equipment for Merchant Ships Ian Lyon Buxton, 2012-12-06

As President of International MacGregor I am deeply indebted to the authors of this excellent book for the very considerable amount of work and scholarship it contains. It is the first authoritative work on cargo access equipment to be published and I am sure that it will be greatly welcomed by the Marine Industries. You will see from the authors' preface that the book was commissioned by the Henri Kummerman Foundation which was established in 1976 to assist and promote internationally research and development in the field of marine transportation and cargo handling. The Foundation has already made a number of grants to universities and to students but this book is its first major contribution to the furthering of education in the Marine Industries. For me it is a rewarding fruition of a long involvement in maritime affairs. However much requires to be done in the future and the Foundation can only succeed if it is encouraged and assisted by people who are forward thinking. I should be pleased therefore to hear from any readers of this book if they feel that they can help or be
