Merchants Of Vision People Bringing New Purpose And Values To Business:

Practical and Professional Ethics: Economic and business ethics Debashis Guha, 2008 Leadership in a Challenging World Barbara Shipka, 2012-08-06 Leadership in a Challenging World is about a journey to wholeness The whole self is sacred and required in order to lead well in the complex world of today and tomorrow Divided into 3 parts the book begins with the metaphor of the forest for the world with both its demanding challenges and its magnificent possibilities Part 2 uses the metaphor of walking on a path to suggest eight subjective human powers that are essential to leading in business today and tomorrow Finally part 3 describes an ancient basis for the powers and shows how they can serve to bring balance to each other that results in human wholeness Leadership in a New Era John Renesch, 1994-01-01 Leadership in a New Era is a collection of vision and wisdom for tomorrow's business leaders presented by a group of outstanding men and women in a joint collaboration This rare combination of business executives professional consultants successful authors and leadership scholars has come together with a common theme new times call for new leadership Their collective voice calls for a fundamental transformation in the way we lead the way we see leaders the way we allow ourselves to be led and how we think about leadership Topics include Difficult Issues and Challenging Times The Leader's New Responsibility Leadership in an Era of Paradox New Thinking for New Leaders and Implementing New Leadership Contributions by such successful authors on the subject of New Leadership as Warren Bennis Leaders and On Becoming a Leader Margaret Wheatley Leadership and the New Science James Autry Love Profit and Work Life Max DePree Leadership is an Art and Leadership Jazz and Ann Morrison The New Leaders and Breaking the Glass Ceiling highlight this rich collection of essays which is edited by John Renesch business futurist and author of Getting to the Better Future This book was created for the individual who recognizes that he or she could be doing more to improve or even transform their own role in their organizations or their organization's role in the world Whether the reader is a middle manager a CEO a sales rep or an accountant he or she will find incredible value from the treasure chest of ideas shared by these authors *Quantum Leaps* Charlotte Shelton, 2012-06-25 Quantum Leaps is a how to book for creating fundamental change in both ourselves and our organizations Charlotte Shelton's basic premise is that organizational change happens one person at a time Our workplaces simply mirror our individual and collective beliefs Therefore we change ourselves our workplaces and the world by changing our minds As our beliefs change we not only see the world differently we begin to be in the world in a different way thus creating a new reality Shelton uses the basic principles of quantum mechanics as the foundational metaphor for a new quantum skill set that recognizes the highly complex constantly changing totally unpredictable nature of life She demonstrates the inadequacy of our time honored skills of planning organizing directing and controlling She shows how these skills are directly tied to an obsolete view of reality ignoring the now fundamental requirements of extreme imagination and radical innovation Quantum Leaps introduces seven new skills skills that are compatible with life and work

in the twenty first century These seven Quantum Skills enable us to see think feel know act trust and be radically different ways Collectively they form a comprehensive model for change These skills integrate quantum mechanical principles state of the art psychology and universal spiritual practices They balance the traditional left brain business skills with a new skill set that more fully utilizes both hemispheres of the brain As we master these skills Shelton states We create balanced lives and whole brain organizations and we become authentic change masters changing ourselves and our organizations from the inside out The Seven Quantum Skills are Quantum Seeing Quantum Thinking Quantum Feeling Quantum Knowing Quantum Acting Quantum Trusting and Quantum Being These 7 skills introduce a new way to access underutilized brain capacities as they acknowledge the role of intention intuition and interconnectivity Big Bang Being Isabel Rimanoczy,Ervin Laszlo,2017-09-08 When asked for the definition of mental health and fulfilment Sigmund Freud had two words lieben und arbeiten love and work In this book we will find how 16 business leaders brought together their compassion their caring for others and the world with their work True only on rare occasions are we able to meet the person behind initiatives that made a positive impact on the world even less have an in depth view into their feelings concerns hesitations doubts and most intimate thoughts What is seen publicly is the initiative the impact on the bottom line and the community or sometimes on the environment Yet it is their personal stories that can be most inspirational since they draw our attention to the fact that amazing achievements start in simple ways with just the thinking of one individual And when we find out that the exemplary individuals have many very human aspects that we identify with and find in ourselves it brings us closer and particularly it may even trigger in us the question If she could do it I wonder what could I do The interviews however were only the beginning of the journey The lessons of the interviews made it possible to identify how we can all develop a sustainability mindset in other words the thinking and the being that can take us from breakdown to breakthrough on this planet Each one of us can play a part in leading the change in fact we are already playing a part we are just not necessarily aware if that is the part we would like to play or aware that we choose the change we are contributing to unfold Part I presents the 16 leaders including a summary of their story and their initiatives Part II goes a little deeper as you will find two dimensions that were not obvious but which underlie the way these business leaders championed the initiatives the Thinking and the Being Part III explores why sustainability change is so slow and addresses the elephant in the room the values and beliefs that anchor our Western Weltanschauung or worldview Part IV addresses the alternatives that we have to convert the unsustainable values into opportunities that will permit humanity to thrive and to break through the obstructions that prevent us from stasis Finally Part V takes us beyond the tipping point and presents us with an opportunity to evolve as humans developing a new way of thinking and being on this planet This transformation is so radical and significant that the author calls it the Big Bang Being **Applied Ethics in Management** Shitangsu K. Chakraborty,Samir R. Chatterjee,2012-12-06 Ethical issues are emerging as the most important managerial challenge in all spheres of

organizational life from the wider issues of strategy making finance technology marketing information systems to the subtle concerns of gender demography or cultural diversity The competitive market economy model has widened the scope for managers in all countries to violate the fundamental values and integrity needed to maintain and enrich a civil society These violations stretch from personal lapses of bribery and corruption to the wider areas of moral questions related to an ethically grounded global business system This book grew out of a three day international workshop addressing these issues held at the Management Centre for Human Values MCHV Indian Institute of Management Calcutta during February 1998 The workshop explored topics of applied management by providing multiple perspectives Eighteen of the papers have been chosen for this volume covering business functions strategies and alliances One of the key objectives of the workshop was to integrate ideas of applied ethics developing from Asia Australia and Europe Any book on applied ethics must be founded on a multicultural base and be practically oriented This project has been greatly privileged in drawing together the work of 18 very senior and widely experienced academics and practitioners spanning four continents The two editors from different continents communicated regularly with each other and the contributors The book is a result of the support and encouragement of many individuals

Is The Future In Our Hands-My Experiences With Sukyo Mahikari Andris K Tebecis, **Prosperity ethics** Johann Walters,J.M. Vorster,2021-11-30 The paradigm shift from modernism to post modernism and the Fourth Industrial Revolution poses enormous challenges to universal moral codes and human life today The thesis of this manuscript is that human prosperity in the broad sense of human flourishing in this new environment could be enhanced by re defining and applying universal moral codes and practising related habits to guide people to prosper and flourish as dignified human beings In a relevant and vigorous discourse the book engages with issues regarding morality in an age of high technology It explores ways in which moral agents can contribute to leading post modernist people into an environment where humans can prosper and enjoy life in a changing world where many old moral directives are not feasible anymore This scholarly book contributes to the specific scientific discourse on studies regarding the relevant discipline and offers a new pattern of reasoning in the field of social ethics about moral agency aiming purposefully to address particular virtues and applicable habits beneficial for human prosperity and dignified life in a changing social environment From the perspective of applied methodology the book is the result of a comparative literary study done from the perspective of universal moral codes which flows from in created natural law Recent research results of empirical studies about the effects of the Fourth Industrial Revolution were consulted and applied to raise awareness of the deep rooted changes and challenges in society today Harvard Business School Core Collection Baker Library,1999 **World Business Academy**
