Mercy Under Fire War And The Global Humanitarian Community:

Mercy Under Fire Larry Minear, Thomas G Weiss, 1995-05-07 An examination of the humanitarian practices of private aid agencies international organizations and governments Case studies and examples from around the world are used to support the authors arguments that the global community should make greater efforts at conflict prevention *Debating a Post-American World* Sean Clark, Sabrina Hoque, 2013-06-17 The United States is currently the linchpin of global trade technology and finance and a military colossus extending across the world with a network of bases and alliances This book anticipates the possible issues raised by a transition between American dominance and the rise of alternative powers While a post American world need not be any different than that of today the risk associated with such a change provides ample reason for attentive study Divided into four parts 50 international relations scholars explore and discuss Power Transitions addressing issues including the rise of China the passing of American primacy and the endurance of American leadership War and Peace addressing nuclear weapons the risk of war security privatization and global insecurity Global Governance addressing competition trade the UN sovereignty humanitarian intervention law and power Energy and the Environment addressing resource conflict petrol climate change and technology This unique project offers a compilation of disparate arguments by scholars and policy practitioners encompassing a plurality of disciplines and theoretical perspectives By providing clarity and focus to this essential debate on the future of the world in the next several decades *Debating a Post American World* will be of interest to students and scholars of International Relations and global politics American politics US Foreign policy and International Security **The International Protection of Internally Displaced Persons** Catherine Phuong, 2005-01-27 Despite the fact that there are up to 25 million internally displaced persons around the world their plight is still little known Like refugees internally displaced persons have been forced to leave their homes because of war and human rights abuses but they have not left their country This has major consequences in terms of the protection available to them This 2005 book aims to offer a clear and easily accessible overview of this important humanitarian and human rights challenge In contrast with other books on the topic it provides an objective evaluation of UN efforts to protect the internally displaced It will be of interest to all those involved with the internally displaced as well as anyone seeking to gain an overall understanding of this complex issue **The World Bank's Experience with Post-conflict Reconstruction** , 1998-01-01 Clearing landmines rehabilitating and integrating of excombatants rebuilding the infrastructure coordinating aid sources these are just some of the issues confronting the Bank in post conflict reconstruction The explosion of civil conflicts in the post Cold War world has tested the World Bank s ability to address unprecedented devastation of human and social capital This study covers post conflict reconstruction in nine countries assessing relevant recent Bank experience It also presents case studies for ongoing and future operations which analyze 1 the Bank s main strengths or comparative advantages 2 its partnership with other donors international organizations and NGOs 3 its role in reconstruction strategy and damage and

needs assessment 4 its role in rebuilding the economy and institutions of governance 5 its management of resources and processes 6 implications for monitoring and evaluation **Subcontracting Peace** Henry F. Carey, 2017-11-28 Non governmental organizations NGOs have emerged as crucial actors in peacebuilding processes in post conflict zones contributing to the liberal state building project NGOs like any other organizations have certain strengths and weaknesses and face tradeoffs and contradictions in peacebuilding Given increasing NGO experience in peacemaking and peacebuilding this volume examines their relatively positive record as well as the constraints limitations and sometimes contradictory impact of their activities and interventions *NGOs and Transnational Networks* William E. DeMars, 2005-04-20 Non Governmental Organisations and their networks are proliferating in all regions of the world They address every transnational issue from population to peace human rights to species rights genocide to AIDS Supporters claim NGOs are effective in achieving their goals while detractors counter that NGO power is paltry compared to governments and corporations Challenging both views DeMars irreverently reveals the political claims implicit in every transnational NGO They are best conceptualised he argues not in terms of either principles or power but through the partners they make in transnational society and politics NGOs and transnational networks institutionalise conflict as much as cooperation and reshape states and societies often inadvertently NGOs have overthrown dictators provided life support for collapsed states and reengineered the family Their historical origins contrast sharply with current realities and show signs of radical change in the future

Parameters ,1996 *Aid in Danger* Larissa Fast, 2014-04-03 Humanitarian aid workers increasingly remain present in contexts of violence and are injured kidnapped and killed as a result Since 9 11 and in response to these dangers aid organizations have fortified themselves to shield their staff and programs from outside threats In *Aid in Danger* Larissa Fast critically examines the causes of violence against aid workers and the consequences of the approaches aid agencies use to protect themselves from attack Based on more than a decade of research *Aid in Danger* explores the assumptions underpinning existing explanations of and responses to violence against aid workers According to Fast most explanations of attacks locate the causes externally and maintain an image of aid workers as an exceptional category of civilians The resulting approaches to security rely on separation and fortification and alienate aid workers from those in need representing both a symptom and a cause of crisis in the humanitarian system Missing from most analyses are the internal vulnerabilities exemplified in the everyday decisions and ordinary human frailties and organizational mistakes that sometimes contribute to the conditions leading to violence This oversight contributes to the normalization of danger in aid work and undermines the humanitarian ethos As an alternative Fast proposes a relational framework that captures both external threats and internal vulnerabilities By uncovering overlooked causes of violence *Aid in Danger* offers a unique perspective on the challenges of providing aid in perilous settings and on the prospects of reforming the system in service of core humanitarian values

Preventing Deadly Conflict David A. Hamburg, 1998-06 *Globalization* Jan Aart Scholte, 2017-03-16 This highly

acclaimed bestselling textbook quickly established itself as one of the leading texts on the subject worldwide in its 1st edition. Now substantially revised and updated, Scholte provides students with a comprehensive introduction to globalization and questions why this phenomenon has occurred to what extent it changes the world and whether it is a force for good or ill. Accessibly written by a leading authority both as an academic researcher and a policy consultant, this second edition draws on the author's research in more than 20 countries over 5 continents. Split into 3 parts, the text first outlines a critical framework for understanding globalization, before exploring its impact on society and the key debates surrounding its normative impact. Exploring questions such as what globalization is, how it has emerged, and what effect it has had on society, this text is essential reading for undergraduate and postgraduate students seeking a thorough study of globalization. New to this Edition: A broader perspective on all the dimensions of globalization. Makes use of the extensive new data and research findings since the first edition was released. Draws more widely from other fields such as Business Studies, Law, and Economics.

Civil-Military Cooperation in Post-Conflict Operations Christopher Ankersen, 2007-10-04 Civil Military Cooperation (CIMIC) is the relationship between militaries and humanitarians. Largely conducted in post-conflict environments, CIMIC has become a key characteristic of military operations in the twenty-first century. However, the field is mostly understood through stereotype rather than clear, comprehensive analysis. The range and scope of the field is vast.

Human Rights in International Relations David P. Forsythe, 2006-05-04 New edition of successful textbook surveying international human rights in an age of terrorism.

Reconciliation Via the War Crimes Tribunal? Aleksandar Fatic, 2019-07-09 First published in 2000, this volume is an examination of the issues of reconciliation after civil wars and the role international war crimes tribunals play in facilitating that reconciliation, apart from enforcing justice against perpetrators of war crimes. It argues that a war crime tribunal is partial and operates with no regard for the policy purpose of reconciliation; it is likely to install all opposites of confidence and security in regions infested by civil warfare, and that their results will thus be counterproductive and will result in further loss of life and destruction.

Contemporary Security Studies Alan Collins, 2019 With in-depth coverage of a wide range of issues from terrorism, inter-state conflict, and nuclear deterrence to environmental security, health, and organized crime, *Contemporary Security Studies* Fifth Edition is the definitive introduction to security studies. Bringing together leading scholars, it provides a student-friendly guide to critical theoretical approaches and the most important issues that dominate the modern security agenda. Throughout the text, students are encouraged to question their own preconceptions and to use their own judgement to critically evaluate key approaches and ideas. To help them achieve this, each chapter is punctuated with helpful learning features including key ideas, think points, and case studies which demonstrate the real-world applications, relevance, and implications of the theory. The book is supported by online resources designed to help students take their learning further. For students: Explore relevant security issues in greater depth with additional online case studies. Civil-Military Cooperation in Response to a Complex Emergency Rietjens,2008-02-28 Modern peace support operations are challenged by an array of issues that are not at all military in nature Increasingly military and civilian actors like non governmental organisations ministries and contractors have to learn how to work together This book analyses civil military cooperation processes in disciplines such as logistics construction and security The analysis is based on multiple holistic case studies in Kosovo 1999 2000 Kabul 2003 2004 and the Afghan province Baghlan 2004 2005 Taking a business alliance approach the phases in a civil military cooperation process are identified Then the main factors influencing the process are highlighted Finally a framework is proposed for evaluating the quality of civil military cooperation The book concludes by recommending ways of improving the cooperation process

The Humanitarians David P. Forsythe,2005-08-11 The International Committee of the Red Cross ICRC coordinates the world s largest private relief system for conflict situations Its staff operates throughout the world and in recent years the ICRC has mounted large operations in the Balkans and Somalia Yet despite its very important role its internal workings are mysterious and often secretive This book examines the ICRC from its origins in the mid nineteenth century up to the present day and provides a comprehensive overview of a unique private organisation whose governing body remains all Swiss but which is recognized in international law as if it were an inter governmental organization David Forsythe focuses on the policy making and field work of the ICRC while not ignoring international humanitarian law He explores how it exercises its independence impartiality and neutrality to try to protect prisoners in Iraq displaced and starving civilians in Somalia and families separated by conflict in the Israeli Palestinian conflict David Forsythe received the Distinguished Scholar Award for 2007 from the Human Rights Section of the American Political Science Association

Purify and Destroy Jacques Semelin,2007-08-17 How can we comprehend the sociopolitical processes that give rise to extreme violence ethnic cleansing or genocide A major breakthrough in comparative analysis Purify and Destroy demonstrates that it is indeed possible to compare the Holocaust the Rwandan genocide and ethnic cleansing in Bosnia Herzegovina while respecting the specificities of each appalling phenomenon Jacques Semelin achieves this in part by leading his readers through the three examples simultaneously the unraveling of which sometimes converges but most often diverges Semelin s method is multidisciplinary relying not only on contemporary history but also on social psychology and political science Based on the seminal distinction between massacre and genocide Purify and Destroy identifies the main steps of a general process of destruction both rational and irrational born of what Semelin terms delusional rationality He describes a dynamic structural model with at its core the matrix of a social imaginaire that responding to fears resentments and utopias carves and recarves the social body by eliminating the enemy Semelin identifies the main stages that can lead to a genocidal process and explains how ordinary people can become

perpetrators He develops an intellectual framework to analyze the entire spectrum of mass violence including terrorism in the twentieth century and before Strongly critical of today's political instrumentalization of the genocide notion Semelin urges genocide research to stand back from legal and normative definitions and come of age as a discipline in its own right in the social sciences

Global Health Policy, Local Realities Linda M. Whiteford, Lenore Manderson, 2000 International health planners often design programmes based on the assumption that recipient nations share the same level playing field with regard to conceptions of health illness and at risk populations This volume analyzes why humanitarian projects fail to recognize ethnic identities

Saving the Security State Inderpal Grewal, 2017-10-27 In *Saving the Security State* Inderpal Grewal traces the changing relations between the US state and its citizens in an era she calls advanced neoliberalism Marked by the decline of US geopolitical power endless war and increasing surveillance advanced neoliberalism militarizes everyday life while producing the exceptional citizens primarily white Christian men who reinforce the security state as they claim responsibility for protecting the country from racialized others Under advanced neoliberalism Grewal shows others in the United States strive to become exceptional by participating in humanitarian projects that compensate for the security state's inability to provide for the welfare of its citizens In her analyses of microfinance programs in the global South security moms the murders at a Sikh temple in Wisconsin and the post 9 11 crackdown on Muslim charities Grewal exposes the fissures and contradictions at the heart of the US neoliberal empire and the centrality of race gender and religion to the securitized state
