Takeovers and the European Legal Framework Jonathan Mukwiri, 2009-05-07 Since the implementation of the European Directive on Takeover Bids a European common legal framework governs regulation of takeovers in EU Members States The European Directive on Takeover Bids was adopted in April 2004 and implemented in the UK and in other Member States on 20th May 2006 The Directive seeks to regulate takeovers by way of protecting investors and harmonising takeover laws in Europe In facilitating the restructuring of companies through takeovers the Directive aims at reinforcing the free movement of capital Takeovers and the European Legal Framework studies the European Community Directive on Takeover Bids in order to provide greater understanding of both the impact and effect of the European legal framework of takeover regulation It firstly looks at the Directive from a British perspective focusing on the impact of the transposition of the Takeover Directive into the UK The book examines the provisions of the City Code on Takeovers and Mergers and discusses the takeover provisions in the Companies Act 2006 that implement the Takeover Directive in the UK arguing that the Directive will provide a new basis for UK takeover regulation and that the system will work well Jonathan Mukwiri goes on to consider the Directive in relation to the EU arguing that despite its deficiencies in that Member States are free to opt to restrict takeovers the Directive provides a useful legal framework by which takeovers are regulated in different jurisdictions Mukwiri highlights how the freedoms of the EC Treaty and EU Directives interact and the effects of the Takeover Directive on political considerations in the law making process in European Community Moreover he argues that the future of EU takeover regulation is likely to follow the lead of the UK making this book relevant to a wide range of policy makers and academics across Europe

debt equity or mezzanine securities to a small group of investors *Towards a Sustainable European Company Law* Beate Sjøfjell, 2009-01-01 No one doubts any longer that sustainable development is a normative imperative Yet there is unmistakably a great reluctance to acknowledge any legal basis upon which companies are obliged to forgo shareholder value when such a policy clearly dilutes responsibility for company action in the face of continuing environmental degradation Here is a book that boldly says Shareholder primacy is wrong Such a narrow short term focus the author shows works against the achievement of the overarching societal goals of European law itself The core role of EU company and securities law is to promote economic development notably through the facilitation of market integration while its contributory role is to further sustainable development through facilitation of the integration of economic and social development and environmental protection There is a clear legal basis in European law to overturn the poorly substantiated theory of a market for corporate control as a theoretical and ideological basis when enacting company law With rigorous and persuasive research and analysis this book demonstrates that European companies should have legal obligations beyond the maximization of profit for shareholders human and environmental interests may and should be engaged with in the realm of company law and company law has a crucial role in furthering sustainable development As a test case the author offers an in depth analysis of the Takeover Directive showing that it neither promotes economic development nor furthers the integration of the economic social and environmental interests that the principle of sustainable development requires This book goes to the very core of the ongoing debate on the function and future of European company law Surprisingly it does not make an argument in favour of changing EU law but shows that we can take a great leap forward from where we are For this powerful insight and the innumerable recognitions that support it this book is a timely and exciting new resource for lawyers and academics in both camps those on the activist side of the issue and those with company or official policymaking responsibilities

foreign subsidiaries in the Indian market as well as competitive pressure on domestic firms The increased foreign investment through M As brought new dimensions to the fore such as the implications on technological performance efficiency and more importantly competition in the Indian market The Globalisation of Indian Business Cross Border Mergers and Acquisitions in Indian Manufacturing provides an in depth analysis of these issues specifically aiming to understand whether the M As strategies helped the firms to achieve their desired objectives in terms of improvement in technology efficiency and market power in the context of the increase of M As in India using appropriate statistical and econometric techniques The book is of additional importance in the context of the recently implemented Competition Act replacing the thirty year old MRTP Act in India The new Act aims to maintain competition and protect consumers interests without harming that of the producers Based on the analysis broadly the study cautions the regulators to rethink the efficiency defence argument and become more vigilant on the creation of monopolies On the other side it suggests firms should reconsider their post merger integration strategy since consolidation has not led to a sustainable increase in market share of the surviving firms
