**Mergers and Acquisitions** Helén Anderson, Virpi Havila, Fredrik Nilsson, 2013. A merger or an acquisition is usually a challenging endeavor which aims to create value for the owner. However stakeholder theory shows how such a narrow and one-sided focus is detrimental to value creation in general not only for other stakeholders within and outside the organization but also for the owner. This book shows how different stakeholders internal and external may play a critical role during a merger or an acquisition process. It builds on empirical examples that illustrate how various stakeholders play active roles throughout the different phases and ultimately affect the outcome and the value formation process of the merger or the acquisition.

**Leading Professionals** Laura Empson, 2017-09-01. Professional organizations such as accounting and consulting firms law firms and investment banks are fundamental to the functioning of the global economy. Yet many of the most powerful are notoriously private. This book uncovers the complex messy and surprisingly emotional challenges of leading professional organizations revealing the realities that lie beneath the professional surface which these organizations present to the outside world. Individual professionals highly educated highly intelligent and highly opinionated are generally reluctant to see themselves as followers and may be equally reluctant to put themselves forward as leaders. They value their autonomy and confer authority on their leaders on a highly contingent basis. How does a professional come to be seen as a leader within a professional organization? How do leaders maintain their position once they have reached the top of their organization? How do they navigate the complex power relationships among their professional colleagues and actually get things done? **Leading Professionals: Power Politics and Prima Donnas** analyses the complex power dynamics and interpersonal politics that lie at the heart of leadership in professional organizations. It is based on Laura Empson's scholarly research into the world's leading professional organizations across a range of sectors including interviews with over 500 senior professionals in 16 countries. It draws on the latest organizational and leadership theory to analyse in detail exactly how professionals come together to create leadership. It identifies how change happens within professional organizations and
