Merit Pay Robert L. Heneman, 1992 Of all U S organizations 80 percent now use merit pay In his book Robert Henemann summarizes current research which can be used to develop new merit pay plans or to increase the effectiveness of existing plans He also shows how performance appraisal research should be expanded to include certain situational factors such as the administrative purpose of the appraisal organizational politics the type of organization and the goals of the compensation systems Major sections of the book include an assessment of the desirability and feasibility of the merit pay development and administration of a merit pay plan and the evaluation of relevant outcomes Henemann s book is a summary of the current knowledge of merit pay that emphasizes three perspectives a balanced perspective an interdisciplinary perspective and recommendations for merit pay policy and practice

Merit Pay Robert L. Heneman, Jon M. Werner, 2004-12-01 This book was written to bring together a summary of the current knowledge on merit pay and to further advance understanding of this type of incentive pay plan When the writing of the first edition was begun in 1989 there were no books devoted exclusively to the subject of merit pay Thus this book was written to fill a void in the compensation literature Since then surveys have shown that merit pay remains a frequently used method of incentive compensation and research into the merit pay process continues to grow However other forms of incentive pay such as gainsharing continue to receive the most attention as evidenced by the number of books and articles on this topic in the popular press In response to the frequent use of merit pay in organizations and the growing body of research a book length treatment of merit pay was needed What we hope to do with this second edition beyond updating is to link merit pay with the many changes going on in total compensation or reward management R Heneman 2001a 2002 We also will argue that even among all the challenges and changes that organizations currently face there is still merit in appropriately conceived and implemented merit pay plans Bates 2003c

Management,2002 Strategic Reward Management Robert L. Heneman,2002-06-01 The contents of this book center around the management of strategic reward systems In particular the book focuses in on the following elements of managing a reward system design implementation and evaluation It is my belief that too much time is spent on the administration of strategic reward systems at the expense of these other activities that add more value than does administration to the

organization Moreover it is very important to remember that the management of reward systems takes place in a larger context that must be accommodated when designing implementing and evaluating strategic reward systems This larger context includes the business environment business strategy and compensation strategy Elements of the environment include the internal environment organizational structure business processes HR systems and external environment laws and regulations labor markets and unions The collection of articles presented throughout the book is very concerned with the fit of strategic reward management with the business environment business strategy and compensation strategy Research has clearly documented the importance of this fit to organizational effectiveness Gomez Mejia Balkin 1992 A practical illustration makes the point as well Taco Bell was found guilty in a class action suit by current and former employees In order to keep the number of labor hours low in a productivity formula used to grant bonuses to managers employee time sheets failed to account for overtime hours by employees Failure to pay attention to the legal context in designing implementing and evaluating a strategic reward program cost Taco Bell millions of dollars Gatewood 2001 Although all of the readings in the book focus in on the management of strategic rewards in the larger business context the readings are organized by topical area The selection of topics is simply based on my writing interests and do not reflect the entire domain of important topics in strategic reward management
