*The Development of Capitalism in Africa* John Sender, Sheila Smith, 2013-05-13 First published in 1986 this work challenges underdevelopment analyses of Africa's past experiences and future prospects and builds upon a very wide range of recent historical research to argue that the impact of Capitalism has resulted in economic progress and significant improvements in living standards. In marked contrast to the dependency approach they propose that the important political and economic differences between the experiences of developing countries should be stressed and analysed. The argument is supported by a detailed look at the emergence since 1900 of capitalist social relations of production in nine different countries.

**An Economic History of West Africa** A. G. Hopkins, 2019-10-17 This pioneering and celebrated work was the first and remains the standard account of the economic history of the huge area conventionally known as West Africa. The book ranges from prehistoric times to independence and covers the former French territories as well as those colonised by the British. It criticises conventional beliefs about economic backwardness, offers an alternative account that explains the particular configuration of poverty that characterised the pre-colonial period and assesses the consequences of the region's interaction with the wider world from the growth of the Saharan and Atlantic trades to the rise and demise of colonial rule. This edition contains a substantial new Introduction that discusses the development of the subject during the past 50 years, evaluates the debate over the original interpretation and provides a valuable guide to additional reading, bringing the reader up to date with current scholarship on the subject as well as providing avenues for further independent research. Appearing at a time when the study of African economic history is enjoying a revival and is engaging economists as well as historians, the book fills a large gap in African studies, provides newcomers with a stimulating point of entry into the subject and contributes to our understanding of wider issues of global underdevelopment.

Custodians of the Land Gregory H. Maddox, James L. Gibling, Isaria N. Kimambo, 1996-04-15 Farming and pastoral societies inhabit ever-changing environments. This relationship between environment and rural culture, politics and economy in Tanzania is the subject of this volume, which will be valuable in reopening debates on Tanzanian history. In his conclusion Isaria N. Kimambo, a founding father of Tanzanian history, reflects on the efforts of successive historians to strike a balance between external causes of change and local initiative in their interpretations of Tanzanian history. He shows that nationalist and Marxist historians of Tanzanian history understandably preoccupied through the first quarter century of the country's post-colonial history with the impact of imperialism and capitalism on East Africa, tended to overlook the initiatives taken by rural societies to transform themselves. Yet there is good reason for historians to think about the causes of change and innovation in the rural communities of Tanzania because farming and pastoral people have constantly changed as they adjusted to shifting environmental conditions.

**A global history of early modern violence** Erica Charters, Marie Houlemare, Peter H. Wilson, 2021-01-26 This electronic version has been made available under a Creative Commons BY-NC-ND open access license. This is the first

extensive analysis of large scale violence and the methods of its restraint in the early modern world Using examples from Asia Africa the Americas and Europe it questions the established narrative that violence was only curbed through the rise of western style nation states and civil societies Global history allows us to reframe and challenge traditional models for the history of violence and to rethink categories and units of analysis through comparisons By decentring Europe and exploring alternative patterns of violence the contributors to this volume articulate the significance of violence in narratives of state and empire building as well as in their failure and decline while also providing new means of tracing the transition from the early modern to modernity

*Africa* Tom Young, 2012-12-01 Vast diverse dynamic and turbulent the true nature of Africa is often obscured by its poverty stricken image In this controversial and gripping guide Tom Young cuts through the emotional hype to critically analyse the continent's political history and the factors behind its dismal economic performance Maintaining that colonial influences are often overplayed Young argues that much blame must lie with African governments themselves and that Western aid can often cause as much harm as good

*Property, Institutions, and Social Stratification in Africa* Franklin Obeng-Odoom, 2020-03-26 In this book Franklin Obeng Odoom seeks to carefully explain engage and systematically question the existing explanations of inequalities within Africa and between Africa and the rest of the world using insights from the emerging field of stratification economics Drawing on multiple sources including archival and historical material and a wide

range of survey data he develops a distinctive approach that combines key concepts in original institutional economics such as reasonable value property and the distribution of wealth with other insights into Africa's development and underdevelopment. While looking at the Africa-wide situation, Obeng Odoom also analyzes the experiences of inequalities within specific countries. Comprehensive and engaging, *Property Institutions and Social Stratification in Africa* is a useful resource for teaching and research on Africa and the Global South.

**Human Rights: Universality and Diversity** Eva Brems, 2021-10-18 Human rights are by definition universal. Yet in a world characterized by enormous diversity, there is no consensus about the implications of the universality of human rights. In several regions of the world, human rights conceptions are promoted that challenge the mainstream, largely Western-dominated discourse on this subject. This volume offers an analysis of context-specific human rights discourses from East Asia, Sub-Saharan Africa, and the Muslim World. Rather than interpreting these as threats to universality, the author examines how and to what extent the claims that are advanced can and should be accommodated in order to further the universality of human rights. A theory of inclusive universality is developed, and its implications are translated into legal techniques. On the one hand, there are flexibility techniques allowing for contextual diversity in the interpretation and application of human rights norms. On the other hand, giving credit to non-Western views also implies that there should be room for transformation of those human rights norms.

**Socialism** C. M. Hann, 2003-09-02 Socialism as a political system may be on the wane, yet no one can doubt that its cultural legacies will make themselves felt for years to come, and on a worldwide scale. The contributors to this volume adopt a variety of anthropological approaches to illuminate changes which have removed socialists from power in many countries. Presenting detailed ethnographic accounts across a wide range of countries, they bring out the factors which have given socialism such a profound worldwide impact, including a substantial impact upon the discipline of anthropology itself. The first sustained and wide-ranging investigation of socialism by social anthropologists, this volume will enable readers to understand better how socialism has been experienced by millions of people and thereby to now better understand how they may cope with post-socialist dilemmas.

**The Claims of Kinfolk** Dylan C. Penningroth, 2004-07-21 In *The Claims of Kinfolk*, Dylan Penningroth uncovers an extensive informal economy of property ownership among slaves and sheds new light on African American family and community life from the heyday of plantation slavery to the freedom generation of the 1870s. By focusing on relationships among blacks as well as on the more familiar struggles between the races, Penningroth exposes a dynamic process of community and family definition. He also includes a comparative analysis of slavery and slave property ownership along the Gold Coast in West Africa, revealing significant differences between the African and American contexts. Property ownership was widespread among slaves across the antebellum South as slaves seized the small opportunities for ownership permitted by their masters. While there was no legal framework to protect or even recognize slaves' property rights, an informal system of acknowledgment recognized by both blacks and whites enabled slaves to mark the boundaries of possession. In turn,

property ownership and the negotiations it entailed influenced and shaped kinship and community ties Enriching common notions of slave life Penningroth reveals how property ownership engendered conflict as well as solidarity within black families and communities Moreover he demonstrates that property had less to do with individual legal rights than with constantly negotiated extralegal social ties A Revolutionary for Our Time Leo Zeilig,2022-03-22 Walter Rodney was a scholar working class militant and revolutionary from Guyana Strongly influenced by Marxist ideas he remains central to radical Pan Africanist thought for large numbers of activists today Rodney lived through the failed though immensely hopeful socialist experiments in the 1960s and 1970s in Tanzania and elsewhere The book critically considers Rodney s contribution to Marxist theory and history his relationship to dependency theory and the contemporary significance of his work in the context of movements and politics today The first full length study of Rodney s life this book is an essential introduction to Rodney s work *Human Rights And The Search For Community* Rhoda E. Howard-hassmann,2018-02-20 In this book Rhoda E Howard argues that communities can exist in modern Western societies if they protect the whole spectrum of individual human rights not only civil and political but also economic rights **Readings in African Politics** Tom Young,2003 Table of contents Classroom in Conflict John A. Williams,1994-01-01 This book transcends recent debates about political correctness to address the underlying problems of teaching controversial subjects in the college and university history classroom The author criticizes both sides of the debate rejecting on the one hand calls for a uniform chronological history curriculum and on the other hand claims that only ethnic or racial insiders are qualified to teach about their communities In chapters on colonial comparative and African history Williams applies the concept of Gandhian truth to historical subjects moving through tentative and flexible perspectives to achieve a complex picture of historical episodes And in chapters on imperialism nationalism racism and the problem of the other he discusses the difficult and contingent nature of conceptual language In the second half of the book he addresses framing rules of discussion by which sensitive issues can be discussed with diverse audiences the relationship of American pluralism to a world perspective and what can be accomplished through an education in pluralism **Imperialism and Colonialism** Alan Macfarlane,2022-03-24 Imperialism and Colonialism Christopher Bayly Richard Rathbone and Richard Drayton is a collection of interviews that are being published as a book for the first time These interviews have been conducted by one of England s leading social anthropologists and historians Professor Alan Macfarlane Filmed over a period of several years the three conversations in this volume are part of the series Creative Lives and Works These transcriptions form a part of a larger set of interviews that cut across various disciplines from the social sciences and the sciences to the performing and visual arts The current volume is on three foremost imperial and global historians Colonialism is intrinsically linked to its imperial past Christopher Bayly Richard Rathbone and Richard Drayton come alive through these conversations in this book They offer a refreshing perspective to the actions of the colonizer and the colonized often deriding the actions of the former Bayly talks at great

length about his Indian experience Rathbone talks about the tempered indifference of the larger academic community towards African history and its oral tradition and Drayton engages his readers with anecdotes and interesting insights into Creole culture The book will be of enormous value not just to those interested in the subject of History Culture Studies Ethnography and Comparative Studies and Literature but also to the uninitiated because of the lucidity which conversations bring to even otherwise opaque discussions Please note This title is co published with Social Science Press New Delhi Taylor Francis does not sell or distribute the Hardback in India Pakistan Nepal Bhutan Bangladesh and Sri Lanka
