Mesoamerican Lithic Technology Experimentation And Interpretation:

Mesoamerican Lithic Technology Kenn Hirth, 2003 Any overview of prehispanic society in the Americas would identify its obsidian core blade production as a unique and highly inventive technology Normally termed prismatic blades these long parallel sided flakes are among the sharpest cutting tools ever produced by humans Their standardized form permitted interchangeable use and such blades became the cutting tool of choice throughout Mesoamerica between 600 800 B C Because considerable production skill is required increased demand may have stimulated the appearance of craft specialists who played an integral role in Mesoamerican society Some investigators have argued that control over obsidian also had a significant effect on the development and organization of chiefdom and state level societies While researchers have long recognized the potential of obsidian studies recent work has focused primarily on compositional analysis to reconstruct trade and distribution networks Study of blade production has received much less attention and many aspects of this highly evolved craft are still lost This volume seeks to identify current research questions in Mesoamerican lithic technology and to demonstrate that replication studies coupled with experimental research design are valuable analytical approaches to such questions

The Emergence of Pressure Blade Making Pierre M. Desrosiers, 2012-03-13 Human development is a long and steady process that began with stone tool making Because of this skill humans were able to adapt to climate changes discover new territories and invent new technologies Pressure knapping is the common term for one method of creating stone tools where a larger device or blade specifically made for this purpose is used to press out the stone tool Pressure knapping was invented in different locations and at different points in time representing the adoption of the Neolithic way of life in the Old world Recent research on pressure knapping has led for the first time to a global thesis on this technique The contributors to this seminal work combine research findings on pressure knapping from different cultures around the globe to develop a cohesive theory This contribution to this volume represents a significant development to research on pressure knapping as well as the field of lithic studies in general This work will be an important reference for anyone studying the Paleolithic Mesolithic and Neolithic periods lithic studies technologies and more generally cultural transmission

The Technology of Maya Civilization Zachary X. Hruby, Geoffrey E. Braswell, Oswaldo Chinchilla Mazariegos, 2014-10-14 The ancient Maya shaped their world with stone tools Lithic artifacts helped create the cityscape and were central to warfare and hunting craft activities cooking and ritual performance The Technology of Maya Civilization examines Maya lithic artefacts made of chert obsidian silicified limestone and jade to explore the relationship between ancient civilizations and natural resources The volume presents case studies of archaeological sites in Guatemala Mexico Belize and Honduras The analysis draws on innovative anthropological theory to argue that stone artefacts were not merely cultural products but tools that reproduced modified and created the fabric of society

Fractures in Knapping Are Tsirk, 2014-11-17 This book is for students and practitioners of not only knapping lithic technology and archaeology but also of fractography and fracture

mechanics In general understanding of fractures provides a sounder basis for lithic analysis and use of more recent scientific tools opens new avenues for lithic studies

Classic Maya Polities of the Southern Lowlands Damien B. Marken, James L. Fitzsimmons, 2015-11-02 Classic Maya Polities of the Southern Lowlands investigates Maya political and social structure in the southern lowlands assessing comparing and interpreting the wide variation in Classic period Maya polity and city composition development and integration Traditionally discussions of Classic Maya political organization have been dominated by the debate over whether Maya polities were centralized or decentralized With new largely unpublished data from several recent archaeological projects this book examines the premises strengths and weaknesses of these two perspectives before moving beyond this long standing debate and into different territory The volume examines the articulations of the various social and spatial components of Maya polity the relationships strategies and practices that bound households communities institutions and dynasties into enduring or short lived political entities By emphasizing the internal negotiation of polity the contributions provide an important foundation for a more holistic understanding of how political organization functioned in the Classic period

Perspectives on the Ancient Maya of Chetumal Bay Debra S. Walker, 2016-10-04 Brings novel synthetic insight to understanding a region that was a hub of waterborne trade and an important locus of production for some of the Maya's most valued crops Cynthia Robin author of *Everyday Life Matters Maya Farmers at Chan* This one of a kind volume shows us how important this region was to the ancient Maya with detailed and vivid descriptions of sociopolitical and economic organization and their relation to the unique landscape and geography of Chetumal Bay Laura J Kosakowsky author of *Preclassic Maya Pottery at Cuello Belize* Chetumal Bay is central to discussions of ancient Maya politics warfare economy exchange and communication because of its unique location Although the ancient Maya invested prodigious amounts of labor in the construction of road systems called *sacbeob* for communication and trade recent archaeological discoveries around Chetumal Bay in both Belize and Mexico reveal an economic alternative to these roads an extensive network of riverine and maritime waterways Focusing on sites ringing the bay such as Cerro Maya Oxtankah and Santa Rita Corozal the contributors to this volume explore how the bay and its feeder rivers affected all aspects of Maya culture from settlement food production and the production and use of special goods to political relationships and social organization Besides being a nexus for long distance exchange in valuable materials such as jade and obsidian the region was recognized for its high quality agricultural produce including cacao achiote vanilla local fruits honey and salt and for its rich marine environment The Maya living on the fringes of the bay perceived the entire region as a single resource procurement zone Waterborne trade brought the world to them providing a wider horizon than would have been available to inland cities dependent only on Maya roads for news of the world The research reveals that trade relations played a central role in the organization of human social life on Chetumal Bay Contributors James Aimers Timothy Beach Clifford Brown Beverly A Chiarulli Lisa G Duffy Dori Farthing David A Freidel Elizabeth Graham Thomas Guderjan Elizabeth

 Technologies in Sedentary Societies** Rachel A. Horowitz, Grant S. McCall, 2019-06-21 Lithic Technologies in
 Sedentary Societies examines lithic technology from ancient societies in Mesoamerica the Near East South Asia and North
 America showcasing the important contributions in depth lithic analysis can make to the study of sedentary societies around
 the world Using cutting edge analytical techniques these case studies address difficult anthropological questions concerning
 economic social and political issues as well as global trends in lithic production Lithic analysis focused on sedentary societies
 especially in places like Mesoamerica has previously been neglected mostly because of the high frequency of informal tools
 but such bias limits the ways in which both lithic production and economic organization are investigated Bringing the
 importance of studying such technologies to the fore and emphasizing the vital anthropological questions that lithics can
 answer Lithic Technologies in Sedentary Societies is a valuable resource for scholars and students of lithic technology and

 Theodore Marks Jayur Madhusudan Mehta Jason S R Paling Steve Rosen John Whittaker *The Real Business of Ancient
 Maya Economies* Marilyn A. Masson, David A. Freidel, Arthur A. Demarest, 2020-08-25 A timely synthesis of the latest research
 and perspectives on ancient Maya economics this volume illuminates the sophistication and intricacy of economic systems in
 the Preclassic Classic and Postclassic periods Contributors from a wide range of disciplines move beyond paradigms of elite
 control and centralized exchange to focus on individual agency highlighting production and exchange that took place at all
 levels of society Case studies draw on new archaeological evidence from rural households and urban marketplaces to
 reconstruct the trade networks for tools ceramics obsidian salt and agricultural goods throughout the empire They also
 describe the ways household production integrated with community regional and interregional markets Redirecting the field
 of ancient Maya economic studies away from simplistic characterizations of the past by fully representing the range of
 current views on the subject this volume delves deeply into multiple facets of a complex interdependent material world
