Mesolithic Lives In Scotland:

Mesolithic Lives in Scotland Graeme Warren, 2005 Scotland's mesolithic past is varied and complex yet its stories are rarely told This book seeks to redress some of this loss

Scotland's Islands Richard Clubley, 2014-05-12 This is not a guide to the islands of Scotland This is not a tour to be followed nor is it travel advice This is a richly anecdotal and personal exploration Richard Clubley shares the sense of freedom he finds in the Scottish islands as he discovers their individual character beauty and diversity He meets locals and learns a few realities of island life He almost perished on Ailsa Craig before finding fresh water dripping from the roof of a cave but spends two idyllic nights alone on Mingulay with a fabulous coal fire in a bothy His passion for Scottish islands shines through every chapter Curl up by the fire pull the blanket close and sip on your dram You're about to escape to the islands Prepare for addiction A book for islanders to savour in sips Night caps are suggested that way the addiction can be controlled MAIRI HEDDERWICK

The Archaeology of Britain John Hunter, Ian Ralston, 2009-12-16 The Archaeology of Britain is the only concise and up to date introduction to the archaeological record of Britain from the reoccupation of the landmass by Homo sapiens during the later stages of the most recent Ice Age until last century This fully revised second edition extends its coverage including greater detail on the first millennium AD beyond the Anglo Saxon domain and into recent times to look at the archaeological record produced by Britain's central role in two World Wars and the Cold War The chapters are written by experts in their respective fields Each is geared to provide an authoritative but accessible introduction supported by numerous illustrations of key sites and finds and a selective reference list to aid study in greater depth It provides a one stop textbook for the entire archaeology of Britain and reflects the most recent developments in archaeology both as a field subject and as an academic discipline No other book provides such comprehensive coverage with such a wide chronological range of the archaeology of Britain This collection is essential reading for undergraduates in archaeology and all those interested in British archaeology history and geography

The Oxford Handbook of the Archaeology and Anthropology of Hunter-Gatherers Vicki Cummings, Peter Jordan, Marek Zvelebil, 2014-04-24 For more than a century the study of hunting and gathering societies has been central to the development of both archaeology and anthropology as academic disciplines and has also generated widespread public interest and debate The Oxford Handbook of the Archaeology and Anthropology of Hunter-Gatherers provides a comprehensive review of hunter-gatherer studies to date including critical engagements with older debates new theoretical perspectives and renewed obligations for greater engagement between researchers and indigenous communities Chapters provide in depth archaeological historical and anthropological case studies and examine far reaching questions about human social relations attitudes to technology ecology and management of resources and the environment as well as issues of diet health and gender relations all central topics in hunter-gatherer research but also themes that have great relevance for modern global society and its future challenges The Handbook also provides a strategic vision for how the

integration of new methods approaches and study regions can ensure that future research into the archaeology and anthropology of hunter gatherers will continue to deliver penetrating insights into the factors that underlie all human diversity From Bann Flakes to Bushmills Nyree Finlay, Sinead McCartan, Nicky Milner, Caroline

Wickham-Jones, 2009-06-01 This volume of papers is dedicated to Peter Woodman in celebration of his contribution to archaeology providing a glimpse of the many ways in which he has touched the lives of so many. The twenty one contributions cover many aspects of predominantly Mesolithic archaeology in Ireland mainland Britain and North west Europe reflecting the range and breadth of Peter's own interests and the international esteem in which his work is held. His particular interest in antiquarians and the material they collected began early in his career and Part 1 presents papers which deal with artefacts and finds by antiquarians. Part 2 is concerned with papers on fieldwork projects both new sites and sites which have been re-investigated predominantly focusing on the Mesolithic period. Part 3 presents papers on the theme of people and animals particularly the topic of the Mesolithic Neolithic transition from different angles **The Birth of Neolithic Britain** Julian

Thomas, 2013-11 The beginning of the Neolithic in Britain marks the end of a hunter gatherer way of life with the introduction of domesticated plants and animals polished stone tools and a range of new monuments. Julian Thomas offers a coherent argument to explain the process of transition between the Mesolithic and Neolithic periods **Britain Begins**

Barry Cunliffe, 2013 The story of the origins of the British and the Irish peoples from the end of the last Ice Age around 10 000BC to the eve of the Norman Conquest: who they were where they came from and how they related to one another

Forms of Dwelling Ulla Rajala, Phil Mills, 2017-01-31 The concept of a socially constructed space of human activity in areas of everyday actions as initially proposed in the field of anthropology by Tim Ingold has actually been much more applied in archaeology. In this wide ranging collection of 13 papers including a re-assessment by Ingold himself contributors show why it has been so influential with papers ranging from the study of Mesolithic to historic and contemporary archaeology revisiting different research themes such as Ingold's own Lapland study and the development of landscape archaeology. A series of case studies demonstrates the value and strength of the taskscape concept applied to a variety of contexts and scales across wide geographical and temporal situations. While exploring new frontiers the papers contrast British Nordic and Mediterranean archaeologies to showcase the study of material culture and landscape and conclude with an assessment of the concept of taskscape and its further developments The Neolithic of Britain and Ireland Vicki

Cummings, 2017-05-18 The Neolithic of Britain and Ireland provides a synthesis of this dynamic period of prehistory from the end of the Mesolithic through to the early Beaker period. Drawing on new excavations and the application of new scientific approaches to data from this period this book considers both life and death in the Neolithic. It offers a clear and concise introduction to this period but with an emphasis on the wider and on going research questions. It is an important text for students new to the study of this period of prehistory as well as acting as a reference for students and scholars already

researching this area The book begins by considering the Mesolithic prelude specifically the millennium prior to the start of the Neolithic in Britain and Ireland It then goes on to consider what life was like for people at the time alongside the monumental record and how people treated the dead This is presented chronologically with separate chapters on the early Neolithic middle Neolithic late Neolithic and early Beaker periods Finally it considers future research priorities for the study of the Neolithic

A View from the West Vicki Cummings,2009-11-13 At the heart of this study are the early Neolithic chambered tombs of the Irish Sea zone defined as west Wales the west coast of northern Britain coastal south and western Scotland the western isles and the Isle of Man and the eastern coast of Ireland In order to understand these monuments there must be a broader consideration of their landscape settings The landscape setting of the chambered tombs is considered in detail both overall and through a number of specific case studies incorporating a much wider area than has been previously considered Cummings investigates the background against which the Neolithic began in the Irish Sea zone and what led to the adoption of Neolithic practices such as the construction of monuments Following on from this she considers what the chambered tombs and landscape can add to our understanding of the Mesolithic Neolithic transition This volume aims to incorporate landscape analysis into a broader understanding of the Neolithic sequence in this area and beyond It will provide an introduction to the Mesolithic and Neolithic of the Irish Sea zone as well as a summary of previous work on this subject It also offers a starting point for future research and a better understanding of this area

The Gathering Night Margaret Elphinstone,2020-01-16 A vivid tale of prehistoric Scotland rival kin groups loyalty love and betrayal salted by dangerous hunts and equally risky shamanistic ceremonies Adam Thorpe The Guardian UK In the Mesolithic period Alaia and her family live off the land between Grandmother Mountain and the cold sea But when one of her brothers goes hunting and never returns the fragile balance of life is upset Half starved and maddened with grief Alaia's mother follows her visions and goes in search of her lost son in this complex tale of love revenge murder and honor The List UK The Gathering Night is a story of conflict loss love adventure and devastating natural disaster This gripping novel by the acclaimed author of The Sea Road is set deep in our stone age past but resonates as a parable for our troubled planet 8 000 years on Employing her considerable skills as a historical novelist Elphinstone imagines the lives of the hunter gatherers who thrived in the period from the end of the Ice Age until the adoption of agriculture Imagination is well woven with avid research in Elphinstone's beguiling prose Anita Sethi Independent on Sunday UK

Prehistoric Britain Joshua Pollard,2008-06-23 Informed by the latest research and in depth analysis Prehistoric Britain provides students and scholars alike with a fascinating overview of the development of human societies in Britain from the Upper Paleolithic to the end of the Iron Age Offers readers an incisive synthesis and much needed overview of current research themes Includes essays from leading scholars and professionals who address the very latest trends in current research Explores the interpretive debates surrounding major transitions in British prehistory

The Anthropology of Hunter-Gatherers Vicki

Cummings,2020-07-12 This book provides a basic introduction to key debates in the study of hunter gatherers specifically from an anthropological perspective but designed for an archaeological audience Hunter gatherers have been the focus of intense anthropological research and discussion over the last hundred years and as such there is an enormous literature on communities all over the world Yet among the diverse range of peoples studied there are a number of recurrent themes including not only the way in which people make a living hunting gathering and fishing but also striking similarities in other areas of life such as belief systems and social organisation These themes are described and then explored through archaeological case studies The overarching theme throughout the volume is the use of ethnographic analogy and how archaeologists should be critical in its use Shades of Green Ruth Tittensor,2016-10-31 This book takes a fresh look at the most disliked tree in Britain and Ireland explaining the reasons it was introduced and why it became ubiquitous in the archipelagos of northwest Europe Sitka spruce has contributed to the Pacific Coast landscapes of North America for over ten millennia For the Tlingit First Nation it is the most important tree in terms of spiritual relationships art and products in daily use such as canoes containers fish traps and sweet cakes Since the late nineteenth century it has also been the most important tree to the timber industry of west coast North America The historical background to the modern use of Sitka spruce is explored The lack of cultural reference may explain negative public response when treeless uplands in the UK and Ireland were afforested with introduced conifer species particularly Sitka spruce following two World Wars The multipurpose forestry of today recognizes that Sitka spruce is the most important tree to the timber industry and to a public which uses its many products but fails to recognize the link between growing trees and bought goods The apparently featureless and wildlife less Sitka spruce plantations in UK uplands are gradually developing recognizable ecological features Sitka spruce has the potential to form temperate rain forests this century as well as to produce much needed goods for society The major contribution of Sitka spruce to landscapes and livelihoods in western North America is by contrast widely accepted But conserving natural old growth forests sustaining the needs of First Nations and producing materials for the modern timber industry will be an intricate task **The Origins of the Irish** J. P. Mallory,2013-04-01 An essential new history of ancient Ireland and the Irish written as an engrossing detective story About eighty million people today can trace their descent back to the occupants of Ireland But where did the occupants of the island themselves come from and what do we even mean by Irish in the first place This is the first major attempt to deal with the core issues of how the Irish came into being J P Mallory emphasizes that the Irish did not have a single origin but are a product of multiple influences that can only be tracked by employing the disciplines of archaeology genetics geology linguistics and mythology Beginning with the collision that fused the two halves of Ireland together the book traces Ireland's long journey through space and time to become an island The origins of its first farmers and their monumental impact on the island is followed by an exploration of how metallurgists in copper bronze and iron brought Ireland into increasingly wider orbits of European culture Assessments of traditional

explanations of Irish origins are combined with the very latest genetic research into the biological origins of the Irish

Hunter-Gatherer Ireland Graeme Warren, 2022-02-03 Explores the Irish Mesolithic the period after the end of the last Ice Age when Ireland was home to hunter gatherer communities mostly from about 10 000 6 000 years ago At this time Ireland was an island world with striking similarities and differences to its European neighbours not least in terms of the terrestrial ecology created by its island status To understand the communities of hunter gatherers who lived there it is essential that we consider the connections established between people and the other beings and materials with which they shared the world and through which they grew into it Understanding the Mesolithic means paying attention to the animals plants spirits and things with which hunting and gathering groups formed kinship relationships and in collaboration with which they experienced life The book closes with a reflection on hunting and gathering in Ireland today The overriding aim of the book is to provide a point of entry into the lives of the Irish Mesolithic to show the different ways in which people have lived on this island and to show how we might narrate those lives

Star Carr Volume 1 Nicky Milner, Chantal Conneller, Barry Taylor, 2018-04-12 This first volume of Star Carr provides an interpretation of the Star Carr site one of the most important Mesolithic sites in Europe Discovered in the late 1940s by John Moore and then excavated by Grahame Clark from 1949 1951 the site is famous in the archaeological world for its wealth of rare organic remains including significant wooden artefacts However since the original excavations there has been much debate about how the site was used was it a residential base camp a hunting camp or even a ritual site The 2003 2015 excavations directed by Conneller Milner and Taylor aimed to answer these questions In use for around 800 years the Star Carr site is much larger and more complex than ever imagined The excavations show that Mesolithic groups were highly invested in this place and continued to occupy the site despite changes in climate The findings include the oldest evidence for houses in Britain large wooden platforms along the edge of the lake antler headdresses and a unique engraved shale pendant which represents the earliest form of Mesolithic art in Britain There is evidence for activity areas such as crafts and tool repair associated with structures an axe factory as well as a number of caches New finds of antler frontlets have increased our understanding of the diversity of human interactions with animals If these do not get a gong something will have to be done about archaeology book awards Mike Pitts British Archaeology Despite the degradation these excavations have provided a new understanding of life in the Early Mesolithic particularly enhancing our understanding of how important wood a material rarely recovered was for Mesolithic people The findings challenge many of the preconceived views of this period in terms of the character and scale of activity and the degree of investment in a particular place in the landscape

Human Interactions with the Geosphere Lucy Wilson, 2011 Human impact on our environment is not a new phenomenon For millennia humans have been coping with or provoking environmental change We have exploited extracted over used but also in many cases nurtured the resources that the geosphere offers Geoarchaeology studies the traces of human interactions with the geosphere and provides the key to

recognizing landscape and environmental change human impacts and the effects of environmental change on human societies This collection of papers from around the world includes case studies and broader reviews covering the time period since before modern human beings came into existence up until the present day To understand ourselves we need to understand that our world is constantly changing and that change is dynamic and complex Geoarchaeology provides an inclusive and long term view of human geosphere interactions and serves as a valuable aid to those who try to determine sustainable policies for the future

Prehistoric Materialities Andrew Meirion Jones, 2012-07-05 Humans occupy a material environment that is constantly changing Yet in the twentieth century archaeologists studying British prehistory have overlooked this fact in their search for past systems of order and pattern Artefacts and monuments were treated as inert materials which were the outcomes of social ideas and processes As a result materials were variously characterized as stable entities such as artefact categories styles or symbols in an attempt to comprehend them In this book Jones argues that on the contrary materials are vital mutable and creative and archaeologists need to attend to the changing character of materials if they are to understand how past people and materials intersected to produce prehistoric societies Rather than considering materials and societies as given he argues that we need to understand how these entities are performed Jones analyses the various aspects of materials including their scale colour fragmentation and assembly in a wide ranging discussion that covers the pottery metalwork rock art passage tombs barrows causewayed enclosures and settlements of Neolithic and Early Bronze Age Britain and Ireland

Woodland in the Neolithic of Northern Europe Gordon Noble, 2017-02-15 The Neolithic period is one of the great transformations in human history when agriculture first began and dramatic changes occurred in human society These changes occurred in environments that were radically different to those that exist today and in northern Europe many landscapes would have been dominated by woodland Yet wood and woodland rarely figures in the minds of many archaeologists and it plays no part in the traditional Three Age system that has defined the frameworks of European prehistory This book explores how human environment relations altered with the beginnings of farming and how the Neolithic in northern Europe was made possible through new ways of living in and understanding the environment Drawing on a broad range of evidence from pollen data and stone axes to the remains of timber monuments and settlements the book analyzes the relationship between people their material culture and their woodland environment
