Gehlbach, 2002-03-15 Seeking a closer connection with nature than the manicured lawns of suburbia naturalist Fred Gehlbach and his family built a house on the edge of a wooded ravine in Central Texas in the mid 1960s On daily walks over the hills creek hollows and fields of the ravine Gehlbach has observed the cycles of weather and seasons the annual migrations of birds and the life cycles of animals and plants that also live in the ravine In this book Gehlbach draws on thirty five years of journal entries to present a composite day by day almanac of the life cycles of this semiwild natural island in the midst of urban Texas Recording such events as the hatching of Eastern screech owl chicks the emergence of June bugs and

the first freeze of November he reminds us of nature's daily, monthly and annual cycles from which humans are becoming ever more detached in our unnatural urban environments. The long span of the almanac also allows Gehlbach to track how local and even global developments have affected the ravine from scars left by sewer construction to an increase in frost-free days probably linked to global warming. This long-term record of natural cycles provides one of only two such baseline data sets for North America. At the same time, the book is an eloquent account of one keen observer's daily interactions with his wild and human neighbors and of the lessons in connectedness and the play of life that they teach. *The Expository Times* James Hastings, Ann Wilson Hastings, Edward Hastings, 1913

When Sparrows Fall Valerie Lee, 2016-09-20 Robin Carter was ready for the best school year yet. Now a sophomore at Sunnyside Adventist Academy in Centralia, Missouri, she felt she had the whole world in front of her. Even her crush was paying attention to her. Surrounded by the best of friends and supportive teachers, she was looking forward to having the time of her life. But only a couple months into the school year and Robin is blindsided by the greatest tragedy she's ever faced. What started out as one of the greatest years ever turned out to be the most heartbreaking. Would Robin ever be able to recover from such a great loss? How could God allow such terrible things to happen to such good people? Didn't He care about her at all? Robin slowly journeys through the stages of grief, trying her best to maintain the friendships she has left, survive school and work on her relationship with God, a God she wanted to blame for her sorrow. But sometimes the one we want to blame is the only One who provides the chance to heal. Join Robin as she discovers God's true nature and finds peace despite her heartache. *Flight Calls* John R. Nelson, 2020-01-15

The paths of different birds look like double helices, flowing strands of hair and migrating serpents, and they beckon with calls that have definite meanings. These mysterious creatures inspire growing numbers of birders in their passionate pursuit of new species, and writer John R. Nelson is no exception. In *Flight Calls*, he takes readers on explorations to watch, hear, and know Massachusetts's hummingbirds, hawks, and herons along the coasts and in the woodlands, meadows, and marshes of Cape Ann, Cape Cod, the Great Marsh, Mount Auburn Cemetery, the Quabbin wilderness, Mount Wachusett, and elsewhere. With style, humor, and a sense of wonder, Nelson blends his field adventures with a history of the birding community, natural and cultural history, bird stories from authors such as Henry David Thoreau, Emily Dickinson, and Mary Oliver, current scientific research, and observations about the fascinating habits of birds and their admirers. These essays are capped off with a plea for bird conservation in Massachusetts and beyond. *Jesus: the Man, the Mission, and the Message* C. Milo Connick, 1974

Keeping All the Pieces Whit Gibbons, 2010 With scholarly expertise and infectious enthusiasm, Whit Gibbons explores the many pieces that support our natural environment. Whether describing caterpillar disguises, fish that produce antifreeze, the mutual reliance of rhinoceroses and Trewea trees, or the origins of tumbleweed, he affirms the delicate and intricate biological relationships between species and encourages a deeper knowledge of our natural world. In these essays, Gibbons celebrates the beauty of biodiversity and laments the tragedy of ecovoids, a term he coined to describe missing components of

our environment that we wish were still present but can never be replaced **Journal** Henry David Thoreau,1906
