Universal Basic Income in Historical Perspective Peter Sloman, Daniel Zamora Vargas, Pedro Ramos Pinto, 2021-11-19 This new edited collection brings together historians and social scientists to engage with the global history of Universal Basic Income UBI and offer historically rich perspectives on contemporary debates about the future of work In particular the book goes beyond a genealogy of a seemingly utopian idea to explore how the meaning and reception of basic income proposals

has changed over time The study of UBI provides a prism through which we can understand how different intellectual traditions political agents and policy problems have opened up space for new thinking about work and welfare at critical moments Contributions range broadly across time and space from Milton Friedman and the debate over guaranteed income in the post war United States to the emergence of the European basic income movement in the 1980s and the politics of cash transfers in contemporary South Africa Taken together these chapters address comparative questions why do proposals for a guaranteed minimum income emerge at some times and recede into the background in others What kinds of problems is basic income designed to solve and how have policy proposals been shaped by changing attitudes to gender roles and the boundaries of social citizenship What role have transnational networks played in carrying UBI proposals between the global north and the global south and how does the politics of basic income vary between these contexts In short the book builds on a growing body of scholarship on UBI and lays the groundwork for a much richer understanding of the history of this radical proposal Chapter 3 is available open access under a Creative Commons Attribution 4 0 International License via link [springer.com](https://www.springer.com)

**Political Economy from Below** Rob Knowles,2017-07-05 Communitarian anarchism is a generic form of socialism that denies the need for a state or any other authority over the individual from above and which requires absolute belief that the individual cannot exist outside of a community of others This book suggests that the communitarian anarchists of the nineteenth century developed and articulated a distinct tradition of economic thought The period of this study begins with the first major writing of the French communitarian anarchist Pierre Joseph Proudhon in 1840 and ends with the temporary burial of anarchist theorizing at the beginning of the First World War in 1914 However he tradition of communitarian anarchist economic thought did not end in 1914 The economic thought explored in this book provides a fresh perception of the fragmentation evident in many societies today especially where there is a substantial informal economy

**Posthuman International Relations** Doctor Erika Cudworth,Doctor Stephen Hobden,2013-04-04 In

this bold intervention Cudworth and Hobden draw on recent advances in thinking about complexity theory to call for a profound re envisioning of the study of international relations As a discipline IR is wedded to the enlightenment project of overcoming the hazards of nature and thus remains constrained by its blinkered human centred approach Furthermore as a means of predicting major global political events and trends it has failed consistently Instead the authors argue it is essential we develop a much more nuanced and sophisticated analysis of global political systems taking into account broader environmental circumstances as well as social relations economic practices and formations of political power Essentially the book reveals how the study of international politics is transformed by the understanding that we have never been exclusively human An original work that is sure to provoke heated debate within the discipline Posthuman International Relations combines insights from complexity theory and ecological thinking to provide a radical new agenda for a progressive twenty first century International Relations

*Anarchy and Art* Allan Antliff, 2007-04-01 One of the powers of art is its ability to convey the human aspects of political events In this fascinating survey on art artists and anarchism Allan Antliff interrogates critical moments when anarchist artists have confronted pivotal events over the past 140 years The survey begins with Gustave Courbet s activism during the 1871 Paris Commune which established the French republic and ends with anarchist art during the fall of the Soviet empire Other subjects include the French neoimpressionists the Dada movement in New York anarchist art during the Russian Revolution political art of the 1960s and gay art and politics post World War II Throughout Antliff vividly explores art s potential as a vehicle for social change and how it can also shape the course of political events both historic and present day it is a book for the politically engaged and art aficionados alike Allan Antliff is the author of *Anarchist Modernism*
