From Morality to Mental Health Mike W. Martin, 2006-04-20 Morality and mental health are now inseparably linked in our view of character Alcoholics are sick yet they are punished for drunk driving Drug addicts are criminals but their punishment can be court ordered therapy The line between character flaws and personality disorders has become fuzzy with even the seven deadly sins seen as mental disorders In addition to pathologizing wrong doing we also psychologize virtue self respect becomes self esteem integrity becomes psychological integration and responsibility becomes maturity Moral advice is now sought primarily from psychologists and therapists rather than philosophers or theologians In this wide ranging accessible book

Mike W Martin asks are we replacing morality with therapy in potentially confused and dangerous ways or are we creatively integrating morality and mental health According to him it s a little bit of both He surveys the ways in which morality and mental health are related touching on practical concerns like love and work self respect and self fulfillment guilt and depression crime and violence and addictions Terming this integrative development the therapeutic trend in ethics Martin uses examples from popular culture various moral controversies and draws on a line of thought that includes Plato the Stoics Freud Nietzsche and contemporary psychotherapeutic theories Martin develops some interesting conclusions among them that sound morality is indeed healthy and that moral values are inevitably embedded in our conceptions of mental health In the end he shows how both morality and mental health are inextricably intertwined in our pursuit of a meaningful life This book will be of interest to philosophers psychologists psychiatrists and sociologists as well as the general reader

The Psychology of Ultimate Concerns Robert A. Emmons, 2003-07-16 This volume makes a powerful case for the inclusion of ultimate concerns spiritual and religious themes in personal strivings in an attempt to build a motivational theory of personality The book first reviews the growing body of empirical and clinical literature on goal seeking and its relationship to subjective well being life satisfaction and personality description Emmons then sets forth an

innovative framework for the assessment and measurement of ultimate concerns **Autobiographical Memory and the Construction of a Narrative Self** Robyn Fivush, Catherine A. Haden, 2003 First Published in 2003 Routledge is an imprint of Taylor Francis an informa company **Constructing the Self** Valerie Gray Hardcastle, 2008 Constructing the Self analyzes the narrative conception of self filling a serious gap in philosophy and grounding discussion in other disciplines It answers the questions What are the connections between our interpretations selfhood and conscious phenomenal experience Why do we believe that our interpretations of our life defining events are narrative in nature From the myriad of thoughts actions and emotions which constitute our experiences how do we choose what is interpretively important the tiny subset that composes the self By synthesizing the different approaches to understanding the self from philosophy of mind developmental psychology psychopathology and cognitive science this monograph gives us deeper insight into what being minded being a person and having a self are as well as clarifies the difference and relation between conscious and unconscious mental states and normal and abnormal minds The explication also affords new perspectives on human development and human emotion Series A Storying Mental Illness and Personal Recovery Dorthe Kirkegaard Thomsen, Tine Holm, Rikke Jensen, Majse Lind, Anne Mai Pedersen, 2023-02-09 An exploration of the interplay between mental illness and narrative identity offering pathways to personal recovery **Addiction** Robert P. Vande Kappelle, 2019-05-24 What is addiction and how do we know if we are addicted Speaking sociologically we are addicted because we live in addictive societies that turn us into consumers and materialists Speaking biologically we are addicted because that is how we are hardwired Speaking spiritually we are addicted because we seek spiritual satisfaction through things other than God Humans can be addicted to most any object ideology and belief but they cannot be addicted to the true God for reasons disclosed in this text As this book demonstrates addiction is a pattern of learned behavior that utilizes ancient mental pathways designed to promote survival and reproduction When neural connections intended to promote eating reproduction parenting and social relationships are diverted into addiction their blessings can become curses While heredity parenting trauma and additional psychological and sociological factors play significant roles in compulsive behavior addiction is essentially a developmental disorder a way to manage an environment that feels threatening and overwhelming Change getting unstuck is possible but it requires five ingredients acknowledgment resolution substitution human help and divine help Because addictions represent complex interactions between biological psychological social and spiritual forces the solution must be holistic as well Designed as a study guide for groups or individual use this book approaches the topic comprehensively examining the nature of addiction its cause symptoms consequences and means of recovery *Strengths-Based Approaches to Crime and Substance Use* David Best, Charlotte Colman, 2019-09-30 Although there is a strong and growing literature in the two areas of desistance and addiction recovery they have developed along parallel pathways with little systematic assessment of the empirical evidence about the co occurrence of the relationship or how one area can learn from the other This book aims to fill that gap by

bringing together emerging literature on the relationship between offending and substance use Instead of focusing on the active period of its onset and persistence this book examines the mechanisms that support desistance addiction recovery and the common themes of reintegration and rehabilitation With contributions from a wide range of international experts in the fields of desistance and addiction recovery the book focuses on a strengths based relational and community focused approach to long term change in offending and drug using populations as well as the shared barriers to effective reintegration for both This book will be highly informative for a wide audience from academics and students interested in studying desistance and recovery to those working in addiction services and the criminal justice system as well as policy makers and the people undertaking their own journeys to desistance and recovery

Voices of Mental Health Martin Halliwell, 2017-10-02. This dynamic and richly layered account of mental health in the late twentieth century interweaves three important stories: the rising political prominence of mental health in the United States since 1970; the shifting medical diagnostics of mental health at a time when health activists, advocacy groups, and public figures were all speaking out about the needs and rights of patients; and the concept of voice in literature, film, memoir, journalism, and medical case study that connects the health experiences of individuals to shared stories. Together, these three dimensions bring into conversation a diverse cast of late century writers, filmmakers, actors, physicians, politicians, policy makers, and social critics. In doing so, Martin Halliwell's *Voices of Mental Health* breaks new ground in deepening our understanding of the place, politics, and trajectory of mental health from the moon landing to the millennium.

Memories That Matter Jefferson A. Singer, 2005. A leading researcher into the role that self-defining memories play in the development of personality and identity teaches readers how to use their memories as tools for personal exploration, goal achievement, and better mental health.
