**Mail and Messages** ,1986      **The Material Subject** Urmila Mohan,Laurence Douny,2020-11-01 The Material Subject emphasises how bodily and material cultures combine to make and transform subjects dynamically The book is based on the French *Matre Penser* MaP school of thought which draws upon the ideas of Mauss Schilder Foucault and Bourdieu among others to enhance the anthropological study of embodiment practices techniques materiality and power Through theoretical sophistication and empirical field research case studies from Europe Africa and Asia bring MaP s ideas into dialogue with other strands of material culture studies in the English speaking world These studies mediate different scales of engagement through a sensori motor affective and cognitive focus on practices of making and doing Examples range from the precarity of

professional divers in French public works to the gendered subjectivity of female carpet weavers in Morocco from the ways Swiss watchmakers transmit craft knowledge to how Hindu devotees in India make efficacious use of altars and from the enskilment of Paiwan indigenous people in Taiwan to the prestige of women's wild silk wrappers in Burkina Faso The chapters are organised according to domains of practice defined as matter of work and technology heritage politics religion and knowledge Scholars and students with an interest in material culture will gain valuable access to global research rooted in a specific intellectual tradition

**The Messages to the Seven Churches of Asia Minor** Andrew Tait, 1884 The Photosystems J. Barber, 2015-12-04 There is very little in this eleventh volume of Topics in Photosynthesis which could have been written when the first volume was published fifteen years ago Advances over the last decade have been spectacular most particularly in our understanding of the photosystems that is the subject of this volume After a comparative introduction of bacterial and plant photosystems the book begins with a consideration of what is theoretically possible in energy conversion This is followed by light harvesting in photosystems II followed by its molecular biology protein engineering thermoluminescence photoinhibition the effect of herbicides and heat shock and most important function of all and one about which so little is yet understood at the molecular level the process by which it evolves oxygen The last three chapters deal with the equivalent processes of photosystem I The whole volume tells the story of a natural system of incredible ingenuity and complexity but which as the chapters unfold is seen to be within our grasp and eventual ability to comprehend

**Redefining Nature** Roy Ellen, Katsuyoshi Fukui, 2021-01-07 How can anthropology improve our understanding of the interrelationship between nature and culture What can anthropology contribute to practical debates which depend on particular definitions of nature such as that concerning sustainable development Humankind has evolved over several million years by living in and utilizing nature and by assimilating it into culture Indeed the technological and cultural advancement of the species has been widely acknowledged to rest upon human domination and control of nature Yet by the 1960s the idea of culture in confrontation with nature was being challenged by science philosophy and the environmental movement Anthropology is increasingly concerned with such issues as they become more urgent for humankind as a whole This important book reviews the current state of the concepts of nature we use both as scientific devices and ideological constructs and is organised around three themes nature as a cultural construction the cultural management of the environment and relations between plants animals and humans Congressional Record United States.
