Randall Bollinger, Alfred E. Chang, Stephen F. Lowry, 2012-12-06 had a dream My dream was to assemble the current and future leaders in surgery and ask them to develop an evidence based surgical textbook that would provide the reader with the most up to date and relevant information on which to base decisions in modern surgical practice In other words the dream was to create the best most comprehensive textbook of surgery Fortunately I met Laura Gillan of Springer Verlag New York who had a similar dream As our editor she has provided the foundation and structure for this dream She has made this dream a reality Because surgery is a highly specialized and diverse discipline with significant complexity I also needed a commitment from outstanding surgeons to serve as coeditors I was fortunate to have a diverse group of exceptional young in spirit energetic cutting edge surgical investigators share in this project and I wish to thank them for their invaluable contribution to this undertaking The Editorial Board including Randy Bollinger Fred Chang Steve Lowry

Sean Mulvihill Harvey Pass and Robert Thompson met for the first time at the American College of Surgeons meeting in Chicago in October 1997 Fig 1 There this book was conceived Each of us developed the plan and content for his specific surgical discipline The common thread is that all decisions and recommendations are based on the best available evidence and that the reader can clearly see the evidence in our Evidence based tables specifically marked for the reader's reference

*Geriatrics 1* D. Platt, 2012-12-06 In 1909 a short contribution entitled Geriatrics was published in the New York Medical Journal According to this article old age represents a distinct period of life in which the physiologic changes caused by aging are accompanied by an increasing number of pathologic changes We now know that the organs of the body age neither at the same rate nor to the same extent and that physiologic alterations are indeed superimposed by pathologic changes as a result of the latter phenomenon the origins and course of illnesses in the elderly

can present unusual characteristics The frequency of concurrent disorders in the elderly entails the danger of polypragmatic pharmacotherapy i e the use of various drugs to combat various disorders while neglecting the possibly adverse combined effects of these drugs To obviate this danger special knowledge in the field of geriatrics the medical branch of gerontology is necessary Geriatrics is constantly increasing in importance owing to the near doubling of life expectancy over the past 130 years and to the improved diagnostic and therapeutic techniques made available by medical progress The rapid recent development of experimental gerontology has played an essential role in enabling us to understand the special features of geriatrics This progress has however been accompanied by such a vast increase in the volume of literature on the subject that specialists in the field can scarcely maintain an overall perspective of new publications

*Current Critical Problems in Vascular Surgery* Frank J. Veith, 1993 This volume covers current information in vascular surgery presented at the 1992 Montefiore Einstein Vascular Symposium Topics include controversies and progress in surgery for the lower extremity ischemia endovascular diagnostic and therapeutic techniques and other topics

Current Bibliography of Epidemiology, 1974 Monthly with annual cumulations Comprehensive current index to periodical medical literature intended for use of practitioners investigators and other workers in community medicine who are concerned with the etiology prevention and control of disease Citations are derived from MEDLARS tapes for Index medicus of corresponding date Arrangement by 2 sections i e Selected subject headings and Diseases organisms vaccines No author index

Step-Up to Medicine Steven S. Agabegi, Elizabeth D. Agabegi, 2012-08-23 The questions serve as a self assessment tool allowing students to think through clinical scenarios without answer choices influencing their thought process Most questions end in what are the appropriate next steps in managing this patient Imagine yourself as the clinician taking care of these patients What test s if any would you order next Provided by publisher
