Metacognition A Special Issue Of The Personality And Social Psychology Review:

Metacognition Janet Metcalfe, 2013-11-26 This special issue on the psychology of knowing about knowing bridges the parallels between social and cognitive psychology. It further illustrates the benefits of pursuing in depth these connections and the phenomena and implications associated with them. **Social Metacognition** Pablo Briñol, Kenneth

DeMarree, 2012-04-27 Metacognition refers to thinking about our own thinking. It has assumed a prominent role in social judgment because our thoughts about our thoughts can magnify, attenuate, or even reverse the impact of primary cognition. Metacognitive thoughts can also produce changes in thought, feeling, and behavior and thus are critical for a complete understanding of human social behavior. The present volume presents the most important and advanced research areas in social psychology where the role of metacognition has been studied. Specifically, the chapters of this book are organized into four substantive content areas: Attitudes and Decision Making, Self and Identity, Experiential and Interpersonal. Each section consists of several chapters summarizing much of the work done in recent decades on critical topics such as attitude strength, persuasion, bias correction, self-regulation, subjective feelings, embodiment, and prejudice, among others. This book also emphasizes interpersonal aspects of metacognition as they play an essential role in close relationships, groups, consumer and clinical interactions. Each chapter is written by an expert in the field and presents a state-of-the-art view of the many ways metacognition has been examined by social psychologists. Handbook of Metacognition in Education Douglas J.

Hacker, John Dunlosky, Arthur C. Graesser, 2009-06-15 Providing comprehensive coverage of the theoretical bases of metacognition and its applications to educational practice, this compendium of focused and in-depth discussions from leading scholars in the field represents an intersection of education, cognitive science, and technology. It serves as a gateway to the literature for researchers and practitioners interested in one or more of the wide array of topics included and sets the standard for scholarship for theoretical research and practical applications in this field. The Handbook of Metacognition in Education, covering Comprehension Strategies, Metacognitive Strategies, Metacomprehension, Writing, Science, and Mathematics, Individual Differences, Self-Regulated Learning, Technology, Tutoring, and Measurement, is an essential resource for researchers, faculty, students, curriculum developers, teachers, and others interested in using research and theory on metacognition to guide and inform educational practice. The Social Psychology Of Consumer Behaviour Bagozzi,

Richard, Gurhan-Canli, Zeynep, Priester, Joseph, 2002-08-01 Ouvrage th orique permettant d'appréhender les attitudes et comportement des consommateurs et examinant comment le marketing peut influencer les processus. *Control of Human Behavior, Mental Processes, and Consciousness* Walter J. Perrig, Alexander Grob, 2013-05-13 In this book, an international group of leading scientists present perspectives on the control of human behavior, awareness, consciousness, and the meaning and function of perceived control or self-efficacy in people's lives. The book breaks down the barriers between subdisciplines and thus constitutes an occasion to reflect on various facets of control in human life. Each expert reviews his or her field.

through the lens of perceived control and shows how these insights can be applied in practice *Handbook of Brand Relationships* Deborah J. MacInnis, C. Whan Park, Joseph W. Priester, 2014-12-18 Brand relationships are critical because they can enhance company profitability by lowering customer acquisition and retention costs This is the first serious academic book to offer a psychological perspective on the meaning of and basis for brand relationships as well as their effects The Handbook of Brand Relationships includes chapters by well known marketing and psychology scholars on topics related to the meaning significance and measurement of brand relationships the critical connections between consumers and the brand how brand relationships are formed through both thoughtful and non thoughtful processes and how they are built repaired and leveraged through brand extensions An integrative framework introduces the book and summarizes the chapters key ideas The handbook also identifies several novel metrics for measuring various aspects of brand relationships and it includes recommendations for further research **International Handbook of Metacognition and Learning Technologies**

Engineering Education: Delivering Non-Technical Knowledge and Skills Yu, Ligu, 2014-03-31 Computer science graduates often find software engineering knowledge and skills are more in demand after they join the industry However given the lecture based curriculum present in academia it is not an easy undertaking to deliver industry standard knowledge and skills in a software engineering classroom as such lectures hardly engage or convince students Overcoming Challenges in Software Engineering Education Delivering Non Technical Knowledge and Skills combines recent advances and best practices to improve the curriculum of software engineering education This book is an essential reference source for researchers and educators seeking to bridge the gap between industry expectations and what academia can provide in software engineering education **Intrusive Thoughts in Clinical Disorders** David A. Clark, 2005-01-01 Advancing our understanding of the cognitive underpinnings of psychopathology this is the first volume dedicated exclusively to the role of UITS unwanted intrusive thoughts across a wide range of psychological disorders This volume will inform the work of researchers and clinicians alike In addition the scope and scientific grounding of the book make it an excellent resource for students in graduate clinical training programs to use in their studies and throughout their careers It will serve as a unique supplemental text in courses in psychotherapy abnormal psychology and psychopathology and cognitive behavioral theory

The Psychology of Economic Decisions Isabelle Brocas, Juan D. Carrillo, 2003 Psychologists and economists often ask similar questions about human behaviour This volume brings together contributions from leaders in both disciplines The editorial introduction discusses methodological differences between the two which have until now limited the development of mutually beneficial lines of research Psychologists have objected to what they see as an excessive formalism in economic modelling and an unrealistic degree of sophistication in the behaviour of individuals while economists criticize the absence of a general psychological framework into which most results can be fitted and the lack of welfare implications in their theories The editors encourage scholars to exploit the strengths of each discipline the ability of psychologists to understand the

feelings and motivation of individuals and the experience of economists to develop normative frameworks The editors then highlight the links between the contributions by grouping them according to central themes in the study of rationality and well being 1 The causes and consequences of irrational behaviour 2 The role of anticipatory feelings and imperfect self knowledge on decision making 3 The way in which memory of past events and cost of thinking affect current decisions 4 The interaction between anticipated and remembered utility and its effects on the welfare of individuals 5 Experimental practice on how to perform controlled experiments to test hypotheses This exciting volume provides an excellent point of entry for anyone interested in the interface between economics and psychology
