Naturalism's Philosophy of the Sacred Martin O. Yalcin, 2013-11-05 Naturalism s Philosophy of the Sacred Justus Buchler Karl Jaspers and George Santayana offers an interpretation of the sacred based on the ordinal naturalism of Justus Buchler one of the most important philosophers of the twentieth century whose work is experiencing a renaissance This book seeks to find common ground between theists and atheists by arguing that religious beliefs should be retained because they provide a poetic response to nature s mysteries while also addressing the atheist s concerns regarding the tendency of religious believers to demonize nonbelievers and to idolize their own conceptions of the sacred The heart of Martin O Yalcin s argument is that religious violence can be traced to the belief that God is far more real and therefore far more valuable than nature In contrast to this view he develops a philosophy of the sacred from the perspective of ontological parity which holds that all things are equally real He argues that when the sacred is leveled to the plane of nature as one of its innumerable orders then the virtues of piety and charity replace the vices of demonization and idolization so evident in religions that insist on the utter incommensurability of God with respect to the created order In the course of developing an aesthetic interpretation of the sacred Yalcin explores not only the metaphysical categories of Justus Buchler but also those of Karl Jaspers and George Santayana The dialogue with Jaspers unearths the absolute otherness of the sacred as the intrinsically unethical dimension of any variant of theism Having undermined the total absolution of the sacred Naturalism s Philosophy of the Sacred suggests an alternative aesthetic form of sacred engagement that piggybacks on Santayana s thoroughly natural poetic rendition of the sacred This book will be of great value to students and scholars working in departments of religion

This book is a study in a new form of religious naturalism called Deep Pantheism which has roots in American Transcendentalism but also in phenomenology and Asian thought It argues that the great divide within nature is that between nature naturing and nature natured the former term defined as Nature creating itself out of itself alone while the latter term defined as The innumerable orders of the World Explorations are made of the connections among the unconscious of nature the archetypes and the various layers of the human psyche The Selving process is analyzed using the work of C G Jung and Otto Rank Evolution and involution are compared as they relate to the Encompassing and the priority of art over

American Immanence Michael S. Hogue, 2018-04-24 The Anthropocene marks the age of significant human impact on the Earth's ecosystems dramatically underscoring the reality that human life is not separate from nature but an integral part of it. Culturally, ecologically, and socially destructive practices such as resource extraction have led to this moment of peril. These practices, however, implicate more than industrial and economic systems; they are built into the political theology of American exceptionalism, compelling us to reimagine human social and political life on Earth. American Immanence seeks to replace the dominant American political tradition, which has resulted in global social, economic, and environmental injustices, with a new form of political theology: its dominant feature, a radical democratic politics. Michael S. Hogue explores the potential of a dissenting immanent tradition in American religion based on philosophical traditions of naturalism, process thought, and pragmatism. By integrating systems theory and concepts of vulnerability and resilience into the lineages of American immanence, he articulates a political theology committed to democracy as an emancipatory and equitable way of life. Rather than seeking to redeem or be redeemed, Hogue argues that the vulnerability of life in the Anthropocene calls us to build radically democratic communities of responsibility, resistance, and resilience. American Immanence integrates an immanent theology of by and for the planet with a radical democratic politics of by and for the people.

A Philosophy of Sacred Nature Leon Niemoczynski, Nam T. Nguyen, 2014-11-12 A Philosophy of Sacred Nature introduces Robert Corrington's philosophical thought: ecstatic naturalism, which seeks to recognize nature's self-transforming potential. Ecstatic naturalism is a philosophical-theological perspective deeply seated in a semiotic cosmology and psychosemiosis and it radically and profoundly probes into the mystery of nature's perennial self-fissuring of nature, natured, and nature-naturing. Edited by Leon Niemoczynski and Nam T. Nguyen, this collection aims to allow readers to see what can be done with ecstatic naturalism and what directions, interpretations, and creative uses that doing can take. A thorough exploration of the prospects of ecstatic naturalism, this book will appeal to scholars of Continental philosophy, religious naturalism, and American pragmatism.

Educational Theory and Jewish Studies in Conversation Harvey Shapiro, 2013 Educational Theory and Jewish Studies in Conversation: From Volozhin to Buczacz by Harvey Shapiro PhD brings together two different fields of study: modern Jewish studies and contemporary educational theory to provide new theoretical frameworks for their interaction. Although Jewish studies and education programs at secular universities have joined denominational and transdenominational institutions of higher learning in adopting a dual or parallel course structure, there has been little scholarly attention given to the basis for doing so. Shapiro provides alternative theoretical frameworks for the relationship between Jewish studies and educational theory and discusses different ways of developing and articulating these relationships between disciplines. Shapiro shows what is at stake when students and faculty think and communicate together across discourses, in particular between the fields of education and Jewish studies. Presenting an alternative to conventional notions of interdisciplinarity, this book's import extends to virtually all relationships between the

humanities and professional education when these different discourses illuminate and challenge one another Pragmatism with Purpose Peter Hare, Douglas R. Anderson, Steven A. Miller, 2015-05-01 Pragmatism with Purpose collects essays by the late Peter Hare a leading proponent of the American philosophical tradition The volume includes essays on holistic pragmatism that Hare developed in conversation with Morton White as well as historical articles on William James and C S Peirce and commentaries on the profession Suffering and Evil in Nature Joseph E. Harroff, Jea Sophia Oh, 2021-12-27 Suffering and Evil in Nature Comparative Responses from Ecstatic Naturalism and Healing Cultures edited by Joseph E Harroff and Jea Sophia Oh provides many unique experiments in thinking through the implications of ecstatic naturalism This collection of essays directly addresses the importance of values sustaining cultures of healing and offers a variety of perspectives inducing radical hope requisite for cultivating moral and political imaginings of democracy to come as a regulative ideal Through its invocation of healing cultures the collection foregrounds the significance of the active gerundive and processual nature of ecstatic naturalism as a creative horizon for realizing values of intersubjective flourishing while also highlighting the significance of culture as an always unfinished project of making discursive interpretive and ethical space open for the subaltern and voiceless Each contribution gives voice to the tensions and contradictions felt by living participants in emergent communities of interpretation namely those who risk replacing authoritarian tendencies and fascist prejudices with a faith in future oriented archetypes of healing to make possible truth and reconciliation between oppressor and oppressed victimizers and victims of violence and trauma These essays then let loose the radical hope of healing from suffering in a ceaseless community of communication within a horizon of creative democratic interpretation Nature's Primal Self Nam T. Nguyen, 2011-12-28 Nature's Primal Self examines Corrington's thought called ecstatic naturalism in juxtaposition to both C S Peirce's pragmatic and semiotic concept of the self and Karl Jaspers' existential elucidation of Existenz Peirce's and Jaspers' anthropocentrism is thus corrected by Corrington's ecstatic naturalism Ecstatic naturalism as a new movement is both a semiotic theoretical method and a metaphysics that probes deeply into the ontological divide between nature naturing and nature natured Author Nam T Nguyen attempts to achieve three goals first to present and elucidate the underlying philosophical concepts of Charles Peirce Karl Jaspers and Robert Corrington second to critique the anthropocentric self of Peirce's semiotic pragmatism and of Jaspers' existential anthropology periechontology from the standpoint of ecstatic naturalism and third to introduce the concept of nature's primal self radically grounded in the perspective of ecstatic naturalism as a judicious more encompassing and richer framework compared to Peirce's semiotic construction of the self and Jaspers' existential concept of Existenz Creativity in American Philosophy Charles Hartshorne, 1985-06-30 The reader will find that I combine hearty enthusiasm for the philosophical traditions of my country with sharp partial disagreement with nearly all their representatives My effort throughout my career has been to think about philosophical that is essentially a priori or metaphysical issues using the history of ideas as a primary resource This is the

second of two volumes dealing with the history of philosophy especially of metaphysics The first *Insights and Oversights of Great Thinkers* discusses some thirty European philosophers from Democritus to Wittgenstein and Merleau Ponty In both volumes I try to learn and teach truth about reality by arguing in a fashion with those who in the past have sought such truth Charles Hartshorne In a remarkable tour de force Charles Hartshorne presents a lively and illuminating study of what major American philosophers have said about creativity With a special talent for perceiving and elegantly expressing the essence of a position Dr Hartshorne details his reactions to friend and foe demonstrating that philosophy at its best is dialogue Noting that metaphysics is a major theme in the American philosophical tradition he states that nowhere has the topic been more persistently and searchingly investigated than in this country

The Orders of Nature Lawrence Cahoon, 2013-01-29

Winner of the 2015 John N Findlay Award in Metaphysics presented by the Metaphysical Society of America Reviving and modernizing the tradition of post Darwinian naturalism *The Orders of Nature* draws on philosophy and the natural sciences to present a naturalistic theory of reality Conceiving of nature as systems processes and structures that exhibit diverse properties that can be hierarchically arranged Lawrence Cahoon sketches a systematic metaphysics based on the following orders of nature physical material biological mental and cultural Using recent work in the science of complexity hierarchical systems theory and nonfoundational approaches to metaphysics Cahoon analyzes these orders with explanations of the underlying science covering a range of topics that includes general relativity and quantum field theory chemistry and inorganic complexity biology and telonomic explanation or purpose the theory of mind and mental causation as an animal phenomenon and the human mind's unique cultural abilities The book concludes with an exploration of what answers such a theory of naturalism can provide to questions about values and God

The Emergence of Value Lawrence

Cahoon, 2023-09-01 Philosophers social scientists and natural scientists argue over whether a natural scientific account of human being is compatible with uniquely human norms like ethics justice art and the concern for truth Many attempts at such an account have been tried and failed others like evolutionary psychology have tried but stumbled *The Emergence of Value* argues that a broad enough understanding of nature and human nature can incorporate human values and norms without reducing them to inhuman processes Lawrence Cahoon advances the position that nature includes values as well as facts and human uniqueness is therefore compatible with nature as it must be To demonstrate this we must consider multiple sciences and recent philosophical traditions and their impact on our notions of truth morality justice and beauty
