Metapolis Dictionary Of Advanced Architecture:

The Metapolis Dictionary of Advanced Architecture Manuel Gausa, 2003 A dictionary for a world whose cities are linked by fiber optic cables and whose citizens are virtually global a world where airports are meeting places and meetings take place via web conference the Metapolis Dictionary of Advanced Architecture in the Information Age The Metapolis Dictionary of Advanced Architecture Manuel Gausa, 2003 A dictionary for a world whose cities are linked by fiber optic cables and whose citizens are virtually global a world where airports are meeting places and meetings take place via web conference the Metapolis Dictionary of Advanced Architecture identifies a new architectural will and a new social and cultural panorama From abduction to zoom radical definitions abound Collected together they form a global cross disciplinary multi voiced vision of new architectural action They define an architecture that is inscribed in information society that is influenced by new technologies and new economies and that concerns itself with the environment and sustainability Entries have been written by the six main authors Gausa Guallart Mller Morales Porras and Soriano plus dozens of international contributors including Iaki Abalos the dictionary of aphorisms see synthetical synthesizes some of the key definitions from the main dictionary in the form of mottos Finally please note that this is an illustrated dictionary with images used to facilitate quick explanations of related terms The Threefold Logic of Advanced Architecture Manuel Gausa, Jordi Vivaldi, 2021-04-15 During the last 30 years Advanced Architecture has consolidated an interactive and informational logic that differs from that of Modernity and Postmodernity This logic is threefold it is modulated through three coexisting protocols modes of action whose peaks of intensity occur in three different decades Conformative Protocols 1990 2000 Distributive Protocols 2000 2010 and Expansive Protocols 2010 2020 This work proposes a threefold cultural narrative whose interactive and informational logic differs from that of modernity and postmodernity It positions three different ethos by critically approaching the architectural side of a cultural mutation that has been affecting the Western experimental areas of knowledge and practice since the end of the last century A transformative process constituted by a constellation of transdisciplinary manifestations accelerations turns shortcuts and clusterizations that by no means can be read under one single epistemological umbrella In this sense rather than approaching the practice of architecture focusing on its disciplinary inner specificity this book approaches the research of experimental architecture focusing on its extra disciplinary entanglements It argues that a vast multiplicity of fields of knowledge participates in a cultural endeavour modulated through three protocols forms of action that singularize three decades Conformative Protocols 1990 2000 Distributive Protocols 2000 2010 and Expansive Protocols 2010 2020 These three periods shouldn't be read as three hermetic and concatenated monades but as three different modulations of the same narrative that is as three overlapping and coexisting systems whose peaks of intensity occur in three different decades However the main purpose of this book is not limited to unveiling the ethos of these three conjugations It also aims at using this framework as a time field a narrative map that

moves from the classificatory to the cartographical in order to vectorize the last 30 years of experimental architecture In this sense this book argues that this threefold set of protocols represents the progressive attempt to constitute critical interiorities looking for and produced through interactions that are increasingly more intimate and whose agents are increasingly more diverse A tendency oriented towards the consolidation of an intimacy between strangers that highly resonates with the cultural and technological landscape in which experimental architecture operates *Large Parks* John Beardsley, 2007-07-26 Publisher description **Arquitectura y virtualidad** Josep Muntanola Thonberg, 2010-12-15 Es bien sabido que la arquitectura es un tipo muy específico de arte de ciencia o de acto ético porque los edificios las ciudades y los territorios son artefactos físicos y sociales no representaciones virtuales como sucede en el cine en la literatura etc Mijail Bajtin era consciente de esta especificidad cuando afirmaba que la arquitectura toda la arquitectura solamente tiene sujetos estéticos potenciales no héroes estéticos reales 1 Sin embargo estas cualidades específicas de la arquitectura no significan que el proyecto arquitectónico virtual es decir un proyecto aun no construido aun no usado sea real See more at <http://ebooks.upc.edu/product/arquitectura-y-virtualidad-architecture-virtuality-sthash-qKiK1LUK.dpuf> Architecture Depends Jeremy Till, 2013-02-08 Polemics and reflections on how to bridge the gap between what architecture actually is and what architects want it to be Architecture depends on what On people time politics ethics mess the real world Architecture Jeremy Till argues with conviction in this engaging sometimes pugnacious book cannot help itself it is dependent for its very existence on things outside itself Despite the claims of autonomy purity and control that architects like to make about their practice architecture is buffeted by uncertainty and contingency Circumstances invariably intervene to upset the architect's best laid plans at every stage in the process from design through construction to occupancy Architects however tend to deny this fearing contingency and preferring to pursue perfection With *Architecture Depends* architect and critic Jeremy Till offers a proposal for rescuing architects from themselves a way to bridge the gap between what architecture actually is and what architects want it to be Mixing anecdote design social theory and personal experience Till's writing is always accessible moving freely between high and low registers much like his suggestions for architecture itself Ugly, Useless, Unstable Architectures Miguel Paredes Maldonado, 2019-11-04 *Ugly Useless Unstable Architectures* traces productive intersections between architecture and the discourses of Post Structuralism and New Materialism It investigates how their unique ontological regimes can be mobilised to supersede the classical framework that still informs both the production and the evaluation of architecture Throughout its three main chapters this enquiry challenges one of the most prevalent tropes of architectural assessment Beauty Utility and Stability Author Miguel Paredes Maldonado critically unpacks the spatial and operational qualities of these three idealised concepts before setting out an alternative framework of spatial practice that draws from Gilles Deleuze's post structuralist take on the production of the real and Manuel DeLanda's model based branch of New Materialism This book reads and situates a series of spatial works through the lens of this critical methodology to

contest the conceptual aspects traditionally underpinning architectural value It posits that architecture can operate as a continuous generative spectrum encompassing a broad range of potential configurations Written for academics and students in architectural theory design and contemporary philosophical thought alike this book should appeal to a wide audience
