De Wever, 2001 **Metastasis** Kurt Hellmann, P. Hilgard, Suzanne A. Eccles, 2013-03-09 The Metastasis Group of the European Organization for Research on Treatment of Cancer EORTC held an International Meeting at the Royal Institution in London on April 21st 23rd 1980 The subject was Clinical and Experimental Aspects of Metastasis and these Proceedings are the record of that Meeting Almost all of those who presented a paper or a poster have written up their contributions as chapters of the Proceedings and we have made no distinction here between posters and oral communications The Organizers and Editors owe a considerable debt of gratitude to all the contributors who without exception presented the results of their work in a clear and concise manner that did much to reveal the essence of the complex problems central to current thinking on met astasis Moreover most manuscripts arrived well within the deadline a circumstance which in our experience is unusual Of the large audience who attended the Meeting many had come from the far distant corners of the World and to them as well as to the presenters of papers the Organizers wish to express their deep appreciation *Brain Metastasis* L. Weiss, H.A. Gilbert, J.B. Posner, 2012-12-06 Of those people dying with cancer many die as a result of metastases In spite of this a surprisingly small number of texts have been devoted to this clinically important topic The present series of monographs originated in discussions which convinced us of the need for texts on metasasis which would contain not only basic and clinical observations on human beings and where neces sary on experimental animals but also discussions of the state of the art in diagnosis and therapy In order to achieve this in depth

approach for which publication was preceded by small workshops it was necessary to impose limitations on the scope of the topic Metastasis is therefore discussed by site and the series is organized accordingly The first volume in the series Pulmonary Metastasis was an expanded version of a Workshop held at Roswell Park Memorial Institute in 1977 This the second volume is based on a similar workshop on metastasis to the brain held at the Memorial Sloan Kettering Cancer Center in September 1978 In organizing both the workshop and in editing this volume we have been exceptionally fortunate to receive the generous cooperation of Dr Jerome B Posner a practicing neurologic oncologist who has given freely of his expertise in this specialized field
