Meteor Burst Communications Theory And Practice:

Meteor Burst Communications Donald L. Schilling, 1993-04-12 Explores the meteor burst channel Leading experts in the communications field cover the research military and commercial applications of this subject Following an introduction to the technology early chapters describe this channel the theory and modeling techniques used to simulate it and the use of variable data rate transmission for efficient communication Later chapters present a method for implementing such a system using FM techniques compare experimental results with theory offer additional theoretical results obtained for the variable data rate techniques and discuss the improvement obtained through the use of forward error correction coding To See the Unseen Andrew J. Butrica, 1996 *Preferential Emergency Communications* Ken Carlberg, Robert Desourdis, James Polk, Ian Brown, 2012-12-06 *Preferential Emergency Communications* From Telecommunications to the Internet a professional monograph is divided into three sections The first describes systems and protocols that have been deployed as private networks for use by government agencies like the U S Department of Defense This section also presents an in depth discussion on MLPP We then present current work in the area of Land Mobile Radio commonly used by local emergency personnel such as police and fireman This second section also describes systems that have been deployed over the public switched telephone network Finally the third section presents insights on trying to support emergency communications over TCP IP networks and the Internet In this last item we look into what IETF protocols can be considered candidates for change as well as those protocols and applications that should not be altered *Meteors in the Earth's Atmosphere* Edmond Murad, Iwan P.
