**Doing Discourse Research** Reiner Keller, 2012-12-18 This book provides an introduction to the basic principles of discourse research offering practical research strategies for doing discourse analyses in the social sciences The book includes guidance on developing a research question selecting data and analyzing it and presenting the results The author has extensive practical experience in the field of discourse research and shows throughout how the methods suggested are compatible with numerous research questions and problems in sociology cultural political and social studies and related disciplines

**The History of Cartography, Volume 6** Mark Monmonier, 2015-05-18 For more than thirty years the History of Cartography Project has charted the course for scholarship on cartography bringing together research from a variety of disciplines on the creation dissemination and use of maps Volume 6 Cartography in the Twentieth Century continues this tradition with a groundbreaking survey of the century just ended and a new full color encyclopedic format The twentieth century is a pivotal period in map history The transition from paper to digital formats led to previously unimaginable dynamic and interactive maps Geographic information systems radically altered cartographic institutions and reduced the skill required to create maps Satellite positioning and mobile communications revolutionized wayfinding Mapping evolved as an important tool for coping with complexity organizing knowledge and influencing public opinion in all parts of the globe and at all levels of society Volume 6 covers these changes comprehensively while thoroughly demonstrating the far reaching effects of maps on science technology and society and vice versa The lavishly produced volume includes more than five hundred articles accompanied by more than a thousand images Hundreds of expert contributors provide both original research often based on their own participation in the developments

they describe and interpretations of larger trends in cartography Designed for use by both scholars and the general public this definitive volume is a reference work of first resort for all who study and love maps Multimodal Film Analysis John Bateman, Karl-Heinrich Schmidt, 2013-06-17 This book presents a new basis for the empirical analysis of film Starting from an established body of work in film theory the authors show how a close incorporation of the current state of the art in multimodal theory including accounts of the syntagmatic and paradigmatic axes of organisation discourse semantics and advanced layout structure builds a methodology by which concrete details of film sequences drive mechanisms for constructing filmic discourse structures The book introduces the necessary background the open questions raised and the method by which analysis can proceed step by step Extensive examples are given from a broad range of films With this new analytic tool set the reader will approach the study of film organisation with new levels of detail and probe more deeply into the fundamental question of the discipline just how is it that films reliably communicate meaning Women and Images of Men in Cinema Andreas Hamburger, 2018-05-08 Women and men in cinema are imaginary constructs created by filmmakers and their audiences The film psychoanalytic approach reveals how movies subliminally influence unconscious reception On the other hand the movie is embedded in a cultural tradition Jean Cocteau's film *La Belle et la Bête* 1946 takes up the classic motif of the animal groom from the story of Cupid and Psyche in Apuleius The Golden Ass originally a tale about the stunning momentum of genuine female desire liberates it from its baroque educational moral a girl's virtue and prudence will help her to overcome her sexual fears and turns it into a boyhood story inside the ugly rascal there is a good but relatively boring prince at least in comparison to the monsters of film history In the seventy years since it was made *La Belle et la Bête* has inspired numerous interpretations and has been employed by theorists of all genres and interests **Discourse and Communication** Teun A. van Dijk, 2011-07-13 No detailed description available for Discourse and Communication **The Pragmatics of Discourse Coherence** Helmut Gruber, Gisela Redeker, 2014-11-15 Over the past four decades discourse coherence has been studied from linguistic psycholinguistic computational and applied perspectives This volume identifies current issues and under researched topics in the pragmatics of discourse coherence Nine studies from various disciplines address the realization and signalling of coherence relations in various genres and languages their acquisition and use by first and second language learners and university students the relationship between coherence relations and genre specific discourse structure and extensions of the coherence paradigm to multimodal discourse and visual art This collection will be of interest to researchers from linguistics applied linguistics psychology communication and multimodal semiotics Jena Review, 1976 The Film of the Islamic State Yorck Beese, 2024-05-27 The film of the so called Islamic State is part of the still relatively opaque history of radical Sunni Islamist video propaganda a field in which it is simultaneously its strongest exponent Through its imports of aesthetics in the age of digitalization and the concurrent de professionalization of film this violent propaganda film has interestingly drawn attention for its seeming likeness to Hollywood film an odd comparison that

the Islamic State itself opposes through its own filmic antagonisms to commercial cinema In an intermittent attempt at attacking cinematic illusionism it has made increasing use of cinematic devices in order to communicate its violent and anti humanist ideology and has thereby entered a state of filmic self contradiction This book analyzes and uncovers the mechanisms and dynamics of ideological communication in the Islamic State s videos through a combined historical and neoformalist approach making them predictable for future researchers

**Hermeneutics of the Film World**

Alberto Baracco,2017-10-09 This book identifies a new methodological strategy for the interpretation of film philosophizing Many recent works in film philosophy adopting the approach identified with the term film as philosophy have considered film as capable of doing philosophy Focused on the basic relationship between film and filmgoer the proposed method is founded on the concept of the film world Combining Merleau Ponty s and Ric ur s philosophies and reconsidering Goodman s theory of worldmaking the film world becomes the hermeneutic horizon from which film philosophical thought can emerge The book shows how Ric urian methodology has the potential to provide a valuable resource for film studies by inviting scholars to consider film interpretation in terms of film world hermeneutics

*Intelligent Audio Analysis* Björn W. Schuller,2014-07-08

This book provides the reader with the knowledge necessary for comprehension of the field of Intelligent Audio Analysis It firstly introduces standard methods and discusses the typical Intelligent Audio Analysis chain going from audio data to audio features to audio recognition Further an introduction to audio source separation and enhancement and robustness are given After the introductory parts the book shows several applications for the three types of audio speech music and general sound Each task is shortly introduced followed by a description of the specific data and methods applied experiments and results and a conclusion for this specific task The books provides benchmark results and standardized test beds for a broader range of audio analysis tasks The main focus thereby lies on the parallel advancement of realism in audio analysis as too often today s results are overly optimistic owing to idealized testing conditions and it serves to stimulate synergies arising from transfer of methods and leads to a holistic audio analysis

*Computational Paralinguistics* Björn Schuller,Anton Batliner,2013-12-04

This book presents the methods tools and techniques that are currently being used to recognise automatically the affect emotion personality and everything else beyond linguistics paralinguistics expressed by or embedded in human speech and language It is the first book to provide such a systematic survey of paralinguistics in speech and language processing The technology described has evolved mainly from automatic speech and speaker recognition and processing but also takes into account recent developments within speech signal processing machine intelligence and data mining Moreover the book offers a hands on approach by integrating actual data sets software and open source utilities which will make the book invaluable as a teaching tool and similarly useful for those professionals already in the field Key features Provides an integrated presentation of basic research in phonetics linguistics and humanities with state of the art engineering approaches for speech signal processing and machine intelligence Explains the history and state of the art of all of the sub

fields which contribute to the topic of computational paralinguistics C covers the signal processing and machine learning aspects of the actual computational modelling of emotion and personality and explains the detection process from corpus collection to feature extraction and from model testing to system integration Details aspects of real world system integration including distribution weakly supervised learning and confidence measures Outlines machine learning approaches including static dynamic and context sensitive algorithms for classification and regression Includes a tutorial on freely available toolkits such as the open source openEAR toolkit for emotion and affect recognition co developed by one of the authors and a listing of standard databases and feature sets used in the field to allow for immediate experimentation enabling the reader to build an emotion detection model on an existing corpus New Studies in Multimodality Ognyan Seizov, Janina

Wildfeuer, 2017-07-27 Multimodality is one of the most popular and influential semiotic theories for analysing media However the application and conceptual anchoring of multimodality often remains geographically and disciplinarily grounded within local systems of thought New Studies in Multimodality combines the expertise of multimodalists from around the globe offering novel readings and applications of central concepts in multimodality and inviting innovative synergies between previously disparate schools Combining perspectives from the most actively developing traditions of theory and research this book progresses from classic concepts to more empirically and practice motivated contributions Contributors engage in mutual dialogue to present new theoretical perspectives and compelling applications to a variety of old and new media Expanding the basis and scope of multimodality this volume shows awareness and experience of this field in many disciplines and illustrates how versatile pervasive and relevant it is for studying today's communication phenomena **The Technical**

**Image** Horst Bredekamp, Vera Dünkel, Birgit Schneider, 2019-04-10 In science and technology the images used to depict ideas data and reactions can be as striking and explosive as the concepts and processes they embody both works of art and generative forces in their own right Drawing on a close dialogue between the histories of art science and technology The Technical Image explores these images not as mere illustrations or examples but as productive agents and distinctive multilayered elements of the process of generating knowledge Using beautifully reproduced visuals this book not only reveals how scientific images play a constructive role in shaping the findings and insights they illustrate but also however mechanical or detached from individual researchers choices their appearances may be how they come to embody the styles of a period a mindset a research collective or a device Opening with a set of key questions about artistic representation in science technology and medicine The Technical Image then investigates historical case studies focusing on specific images such as James Watson's models of genes drawings of Darwin's finches and images of early modern musical automata These case studies in turn are used to illustrate broad themes ranging from Digital Images to Objectivity and Evidence and to define and elaborate upon fundamental terms in the field Taken as a whole this collection will provide analytical tools for the interpretation and application of scientific and technological imagery **Realities in Pedagogical and**

**Phenomenological Contexts** Malte Brinkmann, Johannes Türistig, Martin Weber-Spanknebel, 2025-05-28 What is real What is evident What is true These questions of the constitution of reality in our experiences are among the key questions of phenomenology since its beginning Lately they become especially relevant under conditions of digitalisation acceleration optimisation crises and pandemics In this volume these questions are taken up in different interdisciplinary and intercultural phenomenological perspectives from a pedagogical point of view Starting from a critique of instrumental scientism and optimisation the contributions in this book ask about the theoretical empirical methodological and practical constitution of reality within experiences of learning Bildung and education as well as the subjects materialities and mediality of such experiences in different pedagogical fields and institutions The contributions show how Phenomenological Pedagogy is fruitful to explore the realities of pedagogical practices by grasping lifeworldly lived bodily and social experiences in a qualitatively meaningful empirical and experience oriented way It can thus serve as an alternative to positivistic scientific idealistic or psychologistic approaches *Catalog of Copyright Entries. Multimodality John Bateman, Janina Wildfeuer, Tuomo Hiippala, 2017-04-10 This textbook provides the first foundational introduction to the practice of analysing multimodality covering the full breadth of media and situations in which multimodality needs to be a concern Readers learn via use cases how to approach any multimodal situation and to derive their own specifically tailored sets of methods for conducting and evaluating analyses Extensive references and critical discussion of existing approaches from many disciplines and in each of the multimodal domains addressed are provided The authors adopt a problem oriented perspective throughout showing how an appropriate foundation for understanding multimodality as a phenomenon can be used to derive strong methodological guidance for analysis as well as supporting the adoption and combination of appropriate theoretical tools Theoretical positions found in the literature are consequently always related back to the purposes of analysis rather than being promoted as valuable in their own right By these means the book establishes the necessary theoretical foundations to engage productively with today s increasingly complex combinations of multimodal artefacts and performances of all kinds *Images of Nations and International Public Relations* Michael Kunczik, 2016-05-06 This volume addresses the importance of images of nations in international relations One fundamental assumption is that the behavior of states is not the same as that of individuals States are social systems whose behavior as a rule directly corresponds neither to the motives of their respective leaders nor to those of their populations However it is also self evident that international activities always depend on personal relationships The studies presented relate to more or less deliberate attempts to induce change in images Given the interdisciplinary nature of the subject matter findings made in public relations advertising research prejudice research and other fields are also taken into account Very often it is impossible to distinguish between the image of the nation state and the images of big enterprises such as Krupp

Ford or Coca Cola For this reason the country of origin effect is also discussed Industrial & Engineering Chemistry ,1928
