Scientific and Technical Aerospace Reports ,1995 **Recursive Estimation and Time-Series Analysis** Peter C. Young,2011-08-04 This is a revised version of the 1984 book of the same name but considerably modified and enlarged to accommodate the developments in recursive estimation and time series analysis that have occurred over the last quarter century Also over this time the CAPTAIN Toolbox for recursive estimation and time series analysis has been developed at Lancaster for use in the Matlab™ software environment see Appendix G Consequently the present version of the book is able to exploit the many computational routines that are contained in this widely available Toolbox as well as some of the other routines in Matlab™ and its other toolboxes The book is an introductory one on the topic of recursive estimation and it demonstrates how this approach to estimation in its various forms can be an impressive aid to the modelling of stochastic dynamic systems It is intended for undergraduate or Masters students who wish to obtain a grounding in this subject or for

practitioners in industry who may have heard of topics dealt with in this book and while they want to know more about them may have been deterred by the rather esoteric nature of some books in this challenging area of study **Activity Report**

Sandham,M. Leggett,2013-06-29 The past fifteen years has witnessed an explosive growth in the fundamental research and applications of artificial neural networks ANNs and fuzzy logic FL The main impetus behind this growth has been the ability of such methods to offer solutions not amenable to conventional techniques particularly in application domains involving pattern recognition prediction and control Although the origins of ANNs and FL may be traced back to the 1940s and 1960s respectively the most rapid progress has only been achieved in the last fifteen years This has been due to significant theoretical advances in our understanding of ANNs and FL complemented by major technological developments in high speed computing In geophysics ANNs and FL have enjoyed significant success and are now employed routinely in the following areas amongst others 1 Exploration Seismology a Seismic data processing trace editing first break picking deconvolution and multiple suppression wavelet estimation velocity analysis noise identification reduction statics analysis dataset matching prediction attenuation b AVO analysis c Chimneys d Compression I dimensionality reduction e Shear wave analysis f Interpretation event tracking lithology prediction and well log analysis prospect appraisal hydrocarbon prediction inversion reservoir characterisation quality assessment tomography 2 Earthquake Seismology and Subterranean Nuclear Explosions 3 Mineral Exploration 4 Electromagnetic I Potential Field Exploration a Electromagnetic methods b Potential field methods c Ground penetrating radar d Remote sensing e inversion **Energy Research Abstracts** ,1978
