Discourse and Early English Religious Writing discusses the role of sexuality in medieval devotional practice looking in particular at religious writings circulating in England in the tenth to thirteenth centuries The Cult of St Katherine of Alexandria in Early Medieval Europe Christine Walsh, 2017-05-15 St Katherine of Alexandria was one of the most popular saints in both the Orthodox and Latin Churches in the later Middle Ages yet there has been little study of how her cult developed before c 1200 This book redresses the balance providing a thorough examination of the way the cult spread from the Greek speaking lands of the Eastern Mediterranean and into Western Europe The author uses the full range of source material available including liturgical texts hagiographies chronicles and iconographical evidence bringing together these often disparate sources to map the way in which the cult of St Katherine grew from its early stages in the Byzantine Empire up to c 1100 its transmission to Italy and the introduction and development of the cult in Normandy and England up to c 1200 The book also includes appendices listing early manuscripts containing Katherine s Passio and including key original texts on St Katherine of the period This study will be welcomed by scholars of medieval history and the history of medieval art and as a case study for all those with an interest in the development of medieval saint s cults **Anchoritism in the Middle Ages** Catherine Innes-Parker, Naoë Kukita Yoshikawa, 2013-04-30 This volume explores medieval anchoritism the life of a solitary religious recluse from a variety of perspectives The individual essays conceive anchoritism in broadly interpretive categories challenging perceived notions of the very concept of anchoritic rule and guidance studying the interaction between language and linguistic forms addressing the connection between anchoritism and other forms of solitude particularly in European tales of sanctity and exploring the influence of anchoritic literature on lay devotion As a whole the volume illuminates the richness and fluidity of anchoritic texts and contexts and shows how anchoritism pervaded the spirituality of the Middle Ages for lay and religious alike It moves through both space and time ranging from the third century to the sixteenth from England to the Continent and back **Mysticism and Spirituality in Medieval England** William F. Pollard, Robert Boenig, 1997 The late fourteenth and early fifteenth centuries in England were a golden age of mysticism the major figures could draw on and allude to a host of treatises as the Cloud author acknowledges when he explains how the works of St Denis validate all he writes about Without Denis without the theologians of the eleventh and twelfth centuries without the anchoritic writings of the thirteenth century Richard Rolle Julian of Norwich Walter Hilton Margery Kempe could not have written as they did Likewise those who followed them the Wycliffites the Brigittines the writers of religious lyrics responded to those who had gone before The articles presented here identify major themes and the web of influence that link them new but solid interpretations are offered of the key figures and their backgrounds and the emphasis is on the rich variety of mysticism these authors and texts embody *The Unspeakable, Gender and Sexuality in Medieval Literature, 1000-1400* Victoria Blud, 2017 Frontcover Contents Acknowledgements Abbreviations Introduction Words and Other Fragments 1 Speaking Up and Shutting Up Expression and Suppression in the Old English Mary of Egypt

[Promised Bodies](#) Patricia Dailey, 2013-08-27 In the Christian tradition especially in the works of Paul Augustine and the exegetes of the Middle Ages the body is a twofold entity consisting of inner and outer persons that promises to find its true materiality in a time to come A potentially transformative vehicle it is a dynamic mirror that can reflect the work of the divine within and substantially alter its own materiality if receptive to divine grace The writings of Hadewijch of Brabant a thirteenth century beguine engage with this tradition in sophisticated ways both singular to her mysticism and indicative of the theological milieu of the twelfth and thirteenth centuries Crossing linguistic and historical boundaries Patricia Dailey connects the embodied poetics of Hadewijch's visions writings and letters to the work of Julian of Norwich Hildegard of Bingen Marguerite of Oingt and other mystics and visionaries She establishes new criteria to more consistently understand and assess the singularity of women's mystical texts and by underscoring the similarities between men's and women's writings of the time collapses traditional conceptions of gender as they relate to differences in style language interpretative practices forms of literacy and uses of textuality

The Guardianship of the Soul. These works are important witnesses to the development of Middle English writing after the Conquest and to the rigorous anchoritic spiritual life pursued by female recluses in medieval England The Milieu and Context of the Wooing Group Susannah M. Chewning, 2009-03-01 This book brings together the most current interpretations of the Wooing Group from scholars currently working on the fields of medieval spirituality, gender, and the anchoritic tradition, providing literary, theological, linguistic, and cultural context for the works associated with the Wooing Group, a collection of texts in English written by an unknown author in the late twelfth to early thirteenth centuries. These works are unique in their context, written almost certainly for a group of women living as anchoresses and recluses who were literate in English and were interested in guidance both in spiritual and worldly issues. The book discusses and explains the impact and significance of these works and situates them within the continuum of medieval theological and literary culture **The Cambridge History of the English Language** Norman Blake, Richard M. Hogg, 1992-08-13 Volume II of The Cambridge History of the English Language covers the Middle English Period, describing and analyzing developments in the language from the Norman Conquest to the introduction of printing.
