Tumors and Tumorlike Lesions of Bone Fritz Schajowicz, 2012-07-26 More than ten years have elapsed since the publication of the first edition of Tumors and Tumorlike Lesions of Bone and Joints in 1981 During this period significant progress has been made in diagnosis and particularly in staging and treatment of bone tumors In most centers limb sparing surgery has replaced the more radical ablative surgery with or without preoperative chemotherapy This became possible due to the introduction and increased application of newer high quality imaging techniques CT and MRI and in particular the use of new cytomorphologic methods of diagnosis especially immunohistochemistry These advances in diagnosis and treatment have been reflected by the publication of new editions of several important text books since their authors pathologists orthopedic surgeons and radiologists felt the necessity of updating their works in recent years However in these publications different criteria of classification were adopted The number of cases compiled at the Latin American Registry of Bone Pathology increased from 4913 primary bone tumors and more than 1100 tumorlike lesions at the time of publication of the first edition of this book to 5274 bone tumors and 1665 tumorlike lesions by the end of December 1985 when I finished my work as head of the Registry and occupied the positions of Professor of Orthopedic Pathology at St Louis University Medical Center and Distinguished Visiting Professor at Rush Presbyterian St Luke's Medical Center in Chicago

Tumors and Tumorlike Lesions of Bone and Joints F. Schajowicz, 2012-12-06 In the past 50 years considerable progress has been made in orthopedics and traumatology One of the principal reasons for these advances has undoubtedly been the separation of these specialties from general surgery Alongside this development the number of those devoted to the study and treatment of locomotor disabilities

who could formerly be counted on the fingers of one hand at least in our country has multiplied by thousands and even more have subspecialized This accelerated growth has encouraged the sharpening of diagnostic skills technical improvement and the application of advances in other fields of medicine to orthopedics However paradoxically enough one of the most important aspects of orthopedics bone pathology has not attracted enough specialists worldwide to handle the complex problems encountered daily that only an expert and experienced pathologist is capable of resolving Within the modern milieu the personality and accomplishments of Professor Fritz Schajowicz stand out distinctly Dr Schajowicz of Austrian origin studied with Professor J Erdheim of Vienna Having afterwards been granted a fellowship to extend his knowledge of bone pathology at the Rizzoli Orthopedic Institute of Bologna under the direction of Professor Vittorio Putti he complemented this work with the study of clinical orthopedics at that prestigious institution In 1938 Professor Jose Valls visited the Rizzoli Institute and recognizing the outstanding training of Professor Schajowicz invited him to move to Argentina where we were in need of an expert pathologist
