Dolphin Mysteries Kathleen M. Dudzinski, Toni Frohoff, 2008-10-14 Dolphins have fascinated humans for millennia giving rise to an abundance of stories and myths about them yet the actual details of their lives in the sea have remained elusive In this enthralling book Kathleen M Dudzinski and Toni Frohoff take us into the dolphins aquatic world to witness firsthand how they live their lives communicate and interact with one another and with other species including people Kathleen M Dudzinski and Toni Frohoff are scientists who have collectively dedicated more than 40 years to studying dolphins beneath the ocean's surface frequently through a close up underwater lens Drawing on their own experiences and on up to the minute research the authors show that dolphins are decidedly not just members of a group but distinct individuals able to communicate with one another and with humans Dudzinski and Frohoff introduce a new way of looking at and listening to the vocabulary of dolphins in the sea and they even provide an introductory dolphin dictionary listing complex social signals that dolphins use to share information among themselves and with people Unveiling an intimate and scientifically accurate portrait of dolphins this book will appeal to everyone who has wanted a closer glimpse into the hearts and minds of these amazing creatures

Our Dolphin Ancestors Frank Joseph, 2016-03-17 Reveals the shared ancestry behind our affinity with dolphins and our shared destiny Explains how we are both descendants of the aquatic ape and still share many physiological features with dolphins that set us apart from other primates Explores dolphins communication with other species and how dolphin therapy has miraculous effects on people with autism cancer stroke and depression Explores the connections between dolphins and Atlantis and Lemuria Wild animals avoid contact with humans but wild dolphins seek us out to play and socialize even going so far as to voluntarily rescue people from drowning What explains this remarkable natural affinity Revealing the evolutionary basis for our special relationship with dolphins Frank Joseph explains how we are both descendants of the same ancient branch of humanity Building upon the aquatic ape theory he details how we both began on land but devastating floods forced our distant ancestors into the seas where humanity developed many of the traits that set us apart from other primates such as our instinctive diving reflex and our newborns ability to swim But while some of the aquatic apes returned to land later evolving into modern humans some remained in the cradle of Mother Ocean and became our dolphin cousins Integrating scientific research on dolphin intelligence

communication and physiology with enduring myths from some of the world's oldest cultures such as the Aborigines Norse Greeks and Celts the author examines our physical commonalities with dolphins including their vestigial thumbs and legs birth processes and body temperature He explores dolphins uncanny ability to diagnose disease such as cancer in humans and how dolphin therapy has had miraculous effects on children with autism victims of stroke and those suffering from depression He provides evidence for dolphins different attitudes toward men women and children their natural affinity with cats and dogs and their telepathic communication with other species including ours He explores dolphins mysterious role in the birth of early civilization and their connections with the Dog Star Sirius and Atlantis and Lemuria a bond still commemorated by annual gatherings of millions of dolphins As Frank Joseph shows if we can learn to fully communicate with dolphins accessing their millennia old oral tradition we may learn the truth about humanity's origins and our shared future when humankind may yet again quit the land for a final return to the sea Everything Dolphins Elizabeth Carney,2012 Provides information about different species of dolphins including anatomy behavior and life cycles *Light List* ,1941
