Russian Enterprise Reform Policies To Further The Transition:

Unleashing Russia's Business Potential Harry G. Broadman, 2002-01-01 Russia needs to continue to assess and improve its business environment in order to ensure continuing investment and sustained growth. Currently many of the new businesses are being established in the larger urban areas but similar new businesses need to develop at the regional level. This book based on in depth case studies of more than 70 companies across 13 regions in Russia examines four areas key to institutional development and formulates policy recommendations. Topics include the determinants of inter enterprise competition and market structure at the local level, the regulatory regime governing the price supply and access to local infrastructure services, access to corporate finance in regional markets and the legal system for resolution of commercial disputes.

Russian Enterprise Reform Harry G. Broadman, 1998-01-01 To enhance and sustain economic prosperity Russian authorities must improve the business climate so that firms restructure and the private sector thrives within a market environment. Meeting this challenge requires actions on several fronts. The Russian government asked the World Bank to write policy papers to address this issue. This volume contains those policy papers which were then presented at a high level workshop in Moscow. The topics include removing impediments to robust interfirm competition such as structural concentration, arbitrary regulatory practices and entry barriers, strengthening corporate governance incentive systems, enhancing the nascent institutional framework for the exercise of creditor rights and implementation of enterprise bankruptcy procedures, reducing barter and other nonmonetary forms of business transactions and fostering enterprise restructuring. The volume also contains formal comments on these papers presented by senior Russian officials at the workshop.

Russian Trade Policy Reform for WTO Accession Harry G. Broadman, 1998-01-01 Russia has manifested considerable interest in accession to the World Trade Organization (WTO). This volume contains four policy papers that focus on the most prominent topics during the ongoing WTO accession process: 1) the dispersion of Russia's tariff structure, 2) trade and investment in the service sectors, 3) the treatment of state trading enterprises and 4) the policy regime governing foreign direct investment. Bringing the Russian Federation into the rules based WTO system is an objective broadly shared by the world community. Accession to the WTO comes at a critical juncture for the Russian government to focus on many important policy issues to stimulate growth. As part of the process of making liberalization commitments as required by the existing members of the WTO, accession provides an opportunity to lock in reforms.

Assisting Russia's Transition Gianni Zanini, 2002-01-01 This evaluation assesses the development effectiveness of the World Bank's lending and non lending assistance to the Russian Federation since 1991, a 10 year period of tumultuous political, economic and social change. This report concludes that an assistance strategy concentrating on analytical and advisory services with limited financial support for Russia would have been more appropriate than one involving large volumes of adjustment lending.
