Russian Labour Market Between Transition And Turmoil:

The Russian Labour Market Vladimir Gimpelson, Douglas Lippoldt, 2002-07-15 Labour markets are a central element of any transition from planned economy to market oriented system This groundbreaking book examines the plight of Russian workers and employers during the first decade of post Soviet reforms The authors argue that higher than expected labour market flexibility early in the transition provided an important cushion for workers who would have been displaced with little recourse to social protection However over time this flexibility reduced pressure for enterprise restructuring and accommodated policy drift Although many workers were quite mobile often this translated into a loss of human capital for older enterprises even potentially viable ones and to churning in the labour market accompanied by only limited restructuring There was little job creation labour hoarding persisted and many workers saw their wages eroded by inflation and late payment of wages The authors show this situation was largely the result of insufficient structural reforms poor institutional development and misplaced incentives First providing an overview of the economic situation key labour market trends and the institutional situation during the 1990s the book then reviews labour market dynamics The authors assess changes in old jobs at former state enterprises and evaluate new job creation mostly in private businesses They examine the evolution of wages and the availability of social protection to workers A special thematic section considers the political economy of labour market policy that brought the Russian approach to labour market adjustment to life The conclusion presents an integrated picture of the Russian labour market in the aftermath of the early transition period and highlights the implications of the experience for current policy *OECD Reviews of Labour Market and Social Policies: Russian Federation 2011* OECD, 2011-12-12 This report finds that the Russian labour market remains characterised by significant structural imbalances resulting in widespread segmentation and large earnings inequalities and makes recommendations for improving the situation

Putin's Labor Dilemma Stephen Crowley,2021-07-15 In Putin s Labor Dilemma Stephen Crowley investigates how the fear of labor protest has inhibited substantial economic transformation in Russia Putin boasts he has the backing of workers in the country s industrial heartland but as economic growth slows in Russia reviving the economy will require restructuring the country s industrial landscape At the same time doing so threatens to generate protest and instability from a key regime constituency However continuing to prop up Russia s Soviet era workplaces writes Crowley could lead to declining wages and economic stagnation threatening protest and instability Crowley explores the dynamics of a Russian labor market that generally avoids mass unemployment the potentially explosive role of Russia s monotowns conflicts generated by massive downsizing in Russia s Detroit Tol yatti and the rapid politicization of the truck drivers movement Labor protests currently show little sign of threatening Putin s hold on power but the manner in which they are being conducted point to substantial chronic problems that will be difficult to resolve Putin s Labor Dilemma demonstrates that the Russian economy must either find new sources of economic growth or face stagnation Either scenario market reforms or economic stagnation raises the possibility even probability of destabilizing social unrest *The Challenges for Russia's Politicized Economic System*

Susanne Oxenstierna,2015-04-10 During the early 2000s the market liberalization reforms to the Russian economy begun in the 1990s were consolidated But since the mid 2000s economic policy has moved into a new phase characterized by more state intervention with less efficiency and more structural problems Corruption weak competitiveness heavy dependency on energy exports an unbalanced labour market and unequal regional development are trends that have arisen and which this book argues will worsen unless the government changes direction The book provides an in depth analysis of the current Russian economic system highlighting especially structural and institutional defects and areas where political considerations are causing distortions and puts forward proposals on how the present situation could be remedied Structural Change
