narrative structures HIs approach overthrows the primacy of character and plot on the one hand by showing them to be emanations of the spectral materiality of capital and on the other hand by allowing for an opening into the utopian dimension implying engagement in the rethinking of our attachments to the world Vermeer's Family Secrets Benjamin Binstock, 2013-03-07 Johannes Vermeer one of the greatest Dutch painters and for some the single greatest painter of all produced a remarkably small corpus of work In Vermeer's Family Secrets Benjamin Binstock revolutionizes how we think about Vermeer's work and life Vermeer The Sphinx of Delft is famously a mystery in art despite the common claim that little is known of his biography there is actually an abundance of fascinating information about Vermeer's life that Binstock brings to bear on Vermeer's art for the first time he also offers new interpretations of several key documents pertaining to Vermeer that have been misunderstood Lavishly illustrated with more than 180 black and white images and more than sixty color plates the book also includes a remarkable color two page spread that presents the entirety of Vermeer's oeuvre arranged in chronological order in 1 20 scale demonstrating his gradual formal and conceptual development No book on Vermeer has ever done this kind of visual comparison of his complete output Like Poe s purloined letter Vermeer s secrets are sometimes out in the open where everyone can see them Benjamin Binstock shows us where to look Piecing together evidence the tools of art history and his own intuitive skills he gives us for the first time a history of Vermeer's work in light of Vermeer's life On almost every page of Vermeer's Family Secrets there is a perception or an adjustment that rethinks what we know about Vermeer his oeuvre Dutch painting and Western Art Perhaps the most arresting revelation of Vermeer's Family Secrets is the final one in response to inconsistencies in technique materials and artistic level Binstock posits that several of the paintings accepted as canonical works by Vermeer are in fact not by Vermeer at all but by his eldest daughter Maria How he argues this is one of the book s many pleasures **Scenes of Projection** Jill H. Wilson asks why the dramatist remained so enigmatic about his own beliefs and so silent on the atrocities he survived Shakespeare constructed a drama not of discovery like his rivals but of darkness deferral evasion and disguise where for all his hopes of a golden time of future toleration What's to come is always unsure Whether or not He died a papist it is because we can never pluck out the heart of his mystery that Shakespeare's plays retain their unique potential to resist This is a fascinating work which will be essential reading for all scholars of Shakespeare and Renaissance studies Beholder: Johannes Vermeer, Antoni van Leeuwenhoek, and the Reinvention of Seeing Laura J. Snyder, 2015-03-16 The remarkable story of how an artist and a scientist in seventeenth century Holland transformed the way we see the world On a summer day in 1674 in the small Dutch city of Delft Antoni van Leeuwenhoek a cloth salesman local bureaucrat and self taught natural philosopher gazed through a tiny lens set into a brass holder and discovered a never before imagined world of microscopic life At the same time in a nearby attic the painter Johannes Vermeer was using another optical device a camera obscura to experiment with light and create the most luminous pictures ever beheld See for yourself was the clarion call of the 1600s Scientists peered at nature through microscopes and telescopes making the discoveries in astronomy physics chemistry and anatomy that ignited the Scientific Revolution Artists investigated nature with lenses mirrors and camera obscuras creating extraordinarily detailed paintings of flowers and insects and scenes filled with realistic effects of light shadow and color By extending the reach of sight the new optical instruments prompted the realization that there is more than meets the eye But they also raised questions about how we see and what it means to see In answering these questions scientists and artists in Delft changed how we perceive the world In Eye of the Beholder Laura J Snyder transports us to the streets inns and guildhalls of seventeenth century Holland where artists and scientists gathered and to their studios and laboratories where they mixed paints and prepared canvases ground and polished lenses examined and dissected insects and other animals and invented the modern notion of seeing With charm and narrative flair Snyder brings Vermeer and Van Leeuwenhoek and the men and women around them vividly to life The story of these two geniuses and the transformation they engendered shows us why we see the world and our place within it as we do today Eye of the Beholder was named A Best Art Book of the Year by Christie's and A Best Read of the Year by New Scientist in 2015
