

The party exerts dominance over the private sector – accepting significant economic costs

The waves of regulatory action against major Chinese companies have obliterated more than USD one trillion in stock value. One of the most prominent examples was the regulators' willingness to derail a major IPO with an investigation into cross-border data security at China's ride-hailing giant Didi, just days after its USD 4.4 billion New York listing in mid-2021. New rules on data transfer followed.³⁴

Concerns over what can be peeked into from abroad have been an underlying concern in a series of cases. Chinese companies, including state-owned enterprises, are under pressure to delist from US stock exchanges over data provision and auditing requirements, although negotiations are under way. A security review of information shared by China's biggest scientific publication platform, CNKI, in mid-2022 is another case in point.³⁵

Security Of China A Chinese Approach To Problems Of War And Strategy:

The Security of China Arthur Huck,1970 The security of China : Chinese approaches to problems of war and strategy Arthur Huck,1970 China's Foreign Aid and Investment Diplomacy, Volume I John F. Copper,2016-04-29 Today by many accounts China is the world s foremost purveyor of foreign aid and foreign investment to developing countries This is the product of China s miracle economic growth over a period of more than three decades together with China s drive to become a major player in world affairs and accomplish this through economic rather than military means This three volume work is the first comprehensive study of China s aid and investment strategy to trace how it has evolved since Beijing launched its foreign aid diplomacy at the time of the founding of the People s Republic of China in 1949 Volume I examines the definitions origins nature and scope of foreign aid and investment by other countries Using that background John F Copper then traces China s financial assistance to developing countries from the Mao period when China gave meaningful foreign aid despite its own economic struggles through the beginning of China s post 1978 economic boom and during subsequent decades of rapid economic growth Copper shows that China has a more salient history in giving foreign assistance than any other country in the world while China s objectives in giving foreign assistance have changed markedly over time China has always been driven by efforts to realize its foreign policy objectives and expand China s external influence **China, a Country Study** Frederica M. Quarterly Review of Military Literature ,1973 **China and the Major Powers in East Asia** A. Doak Barnett,2001-09-19 The foreign policy of the People s Republic of China has been dominated in recent decades by the problems of dealing with the other major powers in East Asia Although many ideological political and economic aims have shaped particular Chinese policies Peking s dominant concern has been national security Since the late 1960s its leaders have viewed the Soviet Union as the primary threat to China and have pursued a distinctive Maoist balance of power strategy against it China s post Mao leaders continue to give priority to strategic considerations and the problems of relations with the other major powers It cannot be assumed however that they will simply continue past policies The recent changes both within China and in the broad pattern of international relations in East Asia have created a new situation In this study A Doak Barnett analyzes in detail China s bilateral relations with the Soviet Union Japan and the United States He also examines the changing nature of the four power relationship in East Asia On this basis he discusses possible future trends in Chinese policy and the prospects for achieving a more stable regional equilibrium National Security Seminar; Background Readings Industrial College of the Armed Forces (U.S.),1971 **National security seminar: background readings** U.S. Industrial College of the Armed Forces,1972 The Two Chinese Political Systems and Security in the Western Pacific Shen-Yu Dai,1984 China's Nuclear Weapons Strategy Chong-Pin Lin,1988 Kinas nukleare strategi analyseres p baggrund

Towards the Indian Ocean Region Joshy M. Paul, 2025-02-03 This book examines China s naval and airpower strategic direction towards the Indian Ocean region It discusses China s military modernization program along with naval and airpower capabilities including expeditionary nature It analyses China s attempt to gain a strategic dominance in the IOR by means of investments and trade with the littoral countries military diplomatic relationship with friendly countries permanent presence of naval systems in the Indian Ocean and delivering public goods throughout the region A comparative analysis of People s Liberation Army Air Force PLAAF expeditionary capabilities and Indian Air Force s IAF deterrence mechanisms is also included Print edition not for sale in South Asia India Sri Lanka Nepal Bangladesh Pakistan and Bhutan **Professional Journal of the United States Army** ,2007 **China's Search for Security** Andrew J. Nathan, Andrew Scobell, 2012-11-06

Despite its impressive size and population economic vitality and drive to upgrade its military China remains a vulnerable nation surrounded by powerful rivals and potential foes Understanding China s foreign policy means fully appreciating these geostrategic challenges which persist even as the country gains increasing influence over its neighbors Andrew J Nathan and Andrew Scobell analyze China s security concerns on four fronts at home with its immediate neighbors in surrounding regional systems and in the world beyond Asia By illuminating the issues driving Chinese policy they offer a new perspective on the country s rise and a strategy for balancing Chinese and American interests in Asia Though rooted in the present Nathan and Scobell s study makes ample use of the past reaching back into history to illuminate the people and institutions shaping Chinese strategy today They also examine Chinese views of the United States explain why China is so concerned about Japan and uncover China s interests in such problematic countries as North Korea Iran and the Sudan The authors probe recent troubles in Tibet and Xinjiang and explore their links to forces beyond China s borders They consider the tactics deployed by mainland China and Taiwan as Taiwan seeks to maintain autonomy in the face of Chinese advances toward unification They evaluate the strengths and weaknesses of China s three main power resources economic power military power and soft power The authors conclude with recommendations for the United States as it seeks to manage China s rise Chinese policymakers understand that their nation s prosperity stability and security depend on cooperation with the United

States If handled wisely the authors believe relations between the two countries can produce mutually beneficial outcomes for both Asia and the world

China's Strategic Arsenal James M. Smith, Paul J. Bolt, 2021-04-01 This volume brings together an international group of distinguished scholars to provide a fresh assessment of China's strategic military capabilities, doctrines and its political perceptions in light of rapidly advancing technologies, an expanding and modernizing nuclear arsenal and increased great power competition with the United States

China's Aerospace Strategy, 2013-02-15

China has emerged as a major regional power and has clear aspirations to be a global power in the not too distant future. Comprehensive military modernisation programs, sustained economic, scientific and technological developments have substantially elevated China's international profile. For the past three decades, China has been modernising its strategic weaponry and enhancing the capabilities of its nuclear warheads. It has also been developing new and complex military platforms that would be of great value to joint operations warfare. The decade from 2011 through 2020 will prove critical to the PLA as it attempts to integrate many new and complex platforms and to adopt modern operational concepts including network-centric warfare. China's air force is in the midst of a transformation. A decade ago it was an antiquated service equipped almost exclusively with weapons based on 1950s era Soviet designs and operated by personnel with questionable training according to outdated employment concepts. Today the PLAAF appears to be on its way to becoming a modern, highly capable air force for the 21st century. The PLA Air Force has continued expanding its inventory of long range advanced SAM systems and now possesses one of the largest such forces in the world. The January 2011 flight test of China's next generation fighter prototype, the J-20, highlights China's ambition to produce a fighter aircraft that incorporates stealth attributes, advanced avionics and super-cruise capable engines. Over the next several years, China is upgrading its B-6 bomber fleet with a new longer range variant that will be armed with a new long range cruise missile. China's aviation industry is developing several types of airborne early warning and control system (AWACS) aircraft. These include the KJ-200 based on the Y-8 airframe for AWACS as well as intelligence collection and maritime surveillance and the KJ-2000 based on a modified Russian IL-76 airframe. China can decisively defeat India in any nuclear confrontation but is currently unable to match the IAF in any conventional conflict, specifically along the border region of the Himalayas. Also, the IAF has greater experience than the PLAAF in actual combat operations with its many conflicts. India is gradually building powerful military capabilities in tune with its expanding geopolitical interests even as the eastern and western fronts are being strengthened to deter the twin Pakistan-China threat. The IAF is on the path to transform into a true aerospace power with the capability to rapidly deploy and operate at great distances. As for the two-front challenge, apart from progressively basing Sukhoi-30MKI fighters and missile squadrons in the two theatres, the plan also includes upgrading the airfields and advanced landing grounds in the sectors in order to give both defensive and offensive options. It is important for India to realise the relevance of Chinese achievements in space technologies and to critically view and analyse Chinese achievements in the area of manned space missions. In order to

achieve further success in the space arena developments in cryogenic technology are important for India These should be pursued in order to develop the capability of launching 4 5 ton satellites which will help in achieving a greater commercial edge Programmes like moon and mars missions using robotic technologies are also important in order to know more about the nature of resources especially minerals available on these bodies and undertaking their mining It is also important to work towards launching satellites for India s armed forces which will help gain an advantage over adversaries The book is an attempt to analyse the strategic importance of rising economic political and military stature of China with a view to understand its regional and global implications in a new world order As a rational actor in a chaotic world China will defend its security interests at all costs Besides undertaking a comprehensive modernisation of its armed forces China is developing a series of offensive space capabilities while advocating the peaceful use of outer space The book will be of immense value not only to the readers of the countries in the immediate neighbourhood of China but to the strategic community across the globe since rise of China and other major Asian players including India will shape the strategic international environment in the decades to come during this century It is hoped that the book will contribute to the understanding of the growing importance of integration of air and space and the fact that aerospace has truly become the new theatre of war and thereby establishing a new milestone in mankind s history of warfare The unifying space dimension will remain the single most important source for information and communication which can be used in multiple forms Hence China s aerospace strategy and its implications for India assume greater military importance

Red Star over the Pacific, Second Edition Toshi Yoshihara, James Holmes, 2018-12-15 Combining a close knowledge of Asia and an ability to tap Chinese language sources with naval combat experience and expertise in sea power theory the authors assess how the rise of Chinese sea power will affect U S maritime strategy in Asia They argue that China has laid the groundwork for a sustained challenge to American primacy in maritime Asia and to defend this hypothesis they look back to Alfred Thayer Mahan s sea power theories now popular with the Chinese The book considers how strategic thought about the sea shapes Beijing s deliberations and compares China s geostrategic predicament to that of the Kaiser s Germany a century ago It examines the Chinese navy s operational concepts tactics and capabilities and appraises China s missile force The authors conclude that China now presents a challenge to America s strategic position of such magnitude that Washington must compete in earnest
