Security in a Changing World Volker Franke, 2002-03-30 The end of the Cold War has brought about significant changes in the political economic social and cultural structure of the international system Absent a distinct enemy and the threat of global thermonuclear war the United States today faces a host of new security challenges that require policymakers to make difficult decisions with significant domestic and international implications The range of conflicting goals expectations and capabilities demands fresh solutions to international conflicts and civil unrest new strategies for conducting peace support operations and the preparation of America s forces for completing operational assignments under increasingly uncertain conditions The case studies and exercises constructed for this book examine some of the most pertinent management leadership and accountability issues related to U S national security Each case places readers at the center of difficult decisions illustrates more general policy dilemmas and is designed to stimulate discussion of those issues beyond the classroom Cases highlight dilemmas at two levels pertaining specifically to the case and pertaining to its larger policy implications The absence of a one sided argument specific policy recommendations or logical conclusions enables readers to recognize the importance of the issues at hand and their greater policy implications and to discern lessons that might apply more generally to public policy administration and management Particularly useful in courses dealing with national security international relations public policy administration civil military relations and organizational management An instructor s manual is available upon request

years is a comprehensive review providing an authoritative picture of the state of the world's freshwater resources. It offers best practices as well as in-depth theoretical analyses to help stimulate ideas and actions for better stewardship in the water sector. It is the only report of its kind resulting from the collaboration and contributions of the 26 UN agencies' commissions, program funds, secretariats, and conventions that have a significant role in addressing global water concerns. The news media are full of talk of crises in climate change, energy, and food, and troubled financial markets. These crises are linked to each other and to water resources management. Unresolved, they may lead to increasing political insecurity and conflict. Water is required to meet our fundamental needs and rising living standards and to sustain our planet's fragile ecosystems. Pressures on the resource come from a growing and mobile population, social and cultural change, economic development, and technological change. Adding complexity and risk is climate change with impacts on the resource as well as on the sources of pressure on water. The challenges, though substantial, are not insurmountable. The Report shows how some countries have responded. Progress in providing drinking water is heartening with the Millennium Development Goal target on track in most regions. But other areas remain unaddressed, and after decades of inaction, the problems in water systems are enormous and will worsen if left unattended. Leaders in the water sector can inform decisions outside their domain and manage water resources to achieve agreed socioeconomic objectives and environmental integrity. Leaders in government, the private sector, and civil society determine these objectives and allocate human and financial resources to meet them. Recognizing this responsibility, they must act now. Two-volume set, 336/96 pages, case studies. Includes CD-ROM. Published jointly with UNESCO Publishing.

EU Geopolitical Actorness in a Changing World Liridon Lika, Dealan Riga, 2025-02-24. This book elaborates on the assumption that the European Union's actorness might be shifting from normative to geopolitical and strategic focus. Over the past few years, the EU has faced growing challenges such as disruptions in its vicinity, diffusion of global power, and renewed geopolitical competition. These external pressures have significantly impacted the EU, prompting it, among other measures, to announce a Geopolitical Commission. Academic literature has acknowledged the EU's shift from normative power to an increasingly geoeconomic and geopolitical approach. However, the notion of geopolitical actorness warrants closer scrutiny of its implications on foreign policy. This edited volume critically examines the EU's evolving strategy in a changing world. It provides a conceptual framework for rethinking the Union's global role and the renewal of foreign policy tools. The book offers a fresh and innovative perspective on whether the EU's ambition to assert new geopolitical leadership is actually backed by the effective implementation of policies and strategies needed to address emerging global challenges.
