A. Rey, 1998-04 Opening the folded pages of the book reveals the activities of the circus *Fire as an Agent in Human Culture* Walter Hough, 1926 This work undertakes the presentation of salient features of an encyclopedic subject in a more or less condensed fashion The importance of the study of heating and illumination is thought to be its contribution to the history of culture as connected with the inventiveness displayed by man in the adaptation of the primary natural key force nearest to his needs in all the earlier stages of progress The history also suggests the intellectual esthetic and religious reactions marking the several stages of culture gradually attained by man *Bird Parasites of the Nematode Suborders Strongylata, Ascaridata, and Spirurata* Eloise Blaine Cram, 1927 The present work attempts to assemble under one cover the descriptions of the species of nematodes of the suborders Strongylata Ascaridata and Spirurata exclusive of the Filarioidea found in birds Until now no such compilation has been made for the nematodes of these hosts although special groups have been worked up

McClanan, 2016-04-30 This book reconsiders a wide array of images of Byzantine empresses on media as diverse as bronze coins and gold mosaic from the fifth through to the seventh centuries A D The representations have often been viewed in terms of individual personas but strong typological currents frame their medieval context Empress Theodora the target of political pornography has consumed the bulk of past interest but even her representations fit these patterns Methodological tools from fields as disparate as numismatics as well as cultural and gender studies help clarify the broader cultural significance of female imperial representation and patronage at this time *Bulletin* United States National Museum, 1926

Bird Migration Eberhard Gwinner, 2012-12-06 E GWINNER The phenomenon of bird migration with its large scale dimensions has attracted the attention of naturalists for centuries Worldwide billions of birds leave their breeding grounds every autumn to migrate to areas with seasonally more favorable conditions Many of these migrants travel only over a few hundred kilometers but others cover distances equivalent to the circumference of the earth Among these long distance migrants are several billion birds that invade Africa every autumn from their West and Central Palaearctic breeding areas In the Americas and in Asia the scope of bird migration is of a similar magnitude Just as impressive as the numbers of birds are their achievements They have to cope with the enormous energetic costs of long distance flying particularly while crossing oceans and deserts that do not allow replenishment of depleted fat reserves They have to appropriately time the onset and end of migrations both on a daily and annual basis And finally they have to orient their migratory movements in space to reach their species or population specific wintering and breeding grounds irrespective of the variable climatic conditions along their migratory routes *Billboard* , 1958-04-21 In its 114th year Billboard remains the world s premier weekly music publication
