## **Seeing Eye Hermeneutical Phenomenology In The Study Of Religion:**

*The Seeing Eye* Walter L. Brennenman, Stanley O. Yarian, Alan M. Olson, 1982 Establishing a link between phenomenology and hermeneutics as seen by philosophers notably Heidegger and Husserl and as applied by students of religion notably Eliade and van der Leeuw is the pioneering aim of this book No existing book ties together the cross disciplinary strands in a way that is useful for religious studies A phenomenological and therefore hermeneutical approach to religion prides itself on being aware of its own presuppositions and those of others that are brought to bear on data to be interpreted Thus it seeks to gain an access to the religious worlds of other peoples in as pure a form as possible Phenomenological hermeneutics differs from the traditional comparative study of religion in an important way the new method attempts an empathic understanding of religious experiences before making any comparisons or drawing any inferences Part I shows how the phenomenological approach must arise from a crisis of doubt within the prevailing tradition It goes on to compare this approach to the mystics understanding of the scope and limitations of rational consciousness contrasting it with the nominalists dichotomy between faith and reason Part II starts with Eliade s creative hermeneutics which holds that an object or an act becomes real only insofar as it imitates or repeats an archetype particularly the archetype of the sacred It goes on to develop Cassirer s point that myth is a particular way of seeing Part III starts by showing how art like religion is an imitation of an archetype It goes on to apply hermeneutical phenomenology to the interpretation of ritual Ritual gesture Chapter 6 argues thematizes the world establishing a mystical symbolic relationship between body and world the seen and the unseen Part III continues with a critique of the writings of Carlos Castaneda arguing that these contain the symbolic elements of both archaic shamanism and classical mysticism The final chapter treats the three tiered cosmos that is universal in folklore the tier of family home land artifacts the tier of clan tribe nation and the tier of weather seasons natural forces Each tier has its loric power and these powers are united by shamans and mystics in one sacred kingdom of power

*Aesthetics and Analysis in Writing on Religion* Daniel Gold, 2003-06-10 This book addresses a fundamental dilemma in religious studies Exploring the tension between humanistic and social scientific approaches to thinking and writing about religion Daniel Gold develops a line of argument that begins with the aesthetics of academic writing in the field He shows that successful writers on religion employ characteristic aesthetic strategies in communicating their visions of human truths Gold examines these strategies with regard to epistemology and to the study of religion as a collective endeavor

*Interpreting Masonic Ritual* Oscar Patterson III, 2016-11-28 Interpreting Masonic Ritual endeavors to address the depth of the ritualistic experience through a discussion of what ritual means to man as well as what man means to ritual Ritual teaches us about reality but we will not come to a full understanding of it if we disparage what others do and view their actions from a position of pseudo intellectual or cultural superiority Ritual is the core of

Freemasonry and is that thing which sets it apart from so many organizations It is the key to the Freemason s secrets and the manner through which they transmit our beautiful system of morality It is something to be treasured maintained taught elevated evaluated and above reinforced through proper performance decorum and setting **A Pragmatist Philosophy of Life in Ortega Y Gasset** John Thomas Graham,1994 Over ten years in preparation A Pragmatist Philosophy of Life in Ortega y Gasset reveals how open adaptable and inventive was pragmatism as Ortega elaborated its philosophical implications and applications for Spain Europe and the Americas It is based on extensive use of the twelve volumes of Ortega s Obras Completas the eighty microfilm reels of his archive in the Library of Congress and his large private library in Madrid

Taisekwa Taringa,2014-04-17 This book is a critical comparative study of African Shona and Christian attitudes to nature The purpose of initiating this discussion is to review the existing attitudes to nature in these two religions This has important implications in an attempt to formulate a public environmental ethic in which traditional Shona and Christian adherents participate This is crucial in the light of the ongoing inequity and ecological imbalance in Zimbabwe **Dwelling, Place**

**Bodies in Society** Margaret R. Miles, 2008-08-01 Education is about learning to think Much of what we call thinking however is a hodge podge of repetitious self talk opinion and cutting and pasting of second hand ideas Moreover thinking in the present has often been alien to scholars who were tempted to think abstractly But life and thought belong together and require each other as Plotinus pointed out many centuries ago T he object of contemplation is living and life and the two together are one Ennead 3 8 8 Presently many women and men in the academic world are thinking concretely within the context of their own lives and with acknowledged accountability to broader communities with whom they think and to whom they are answerable The essays in this volume consider Christianity as an aspect of North American culture bringing the critical tools of the academy to thinking about some of the perplexing and pressing problems of contemporary public life Three interactive and interdependent themes traverse these essays gender the effects of media culture and institutions Each of these themes has been central to Margaret Miles s work for thirty years Each understands corporeality as fundamental both to subjectivity and society Miles finds that Christianity critically appropriated provides ideas and methods for thinking concretely about life in North American society The Illusion of Trust E.R. DuBose, 2012-12-06 This book is about trust and its implications for a medical theological ethics Beginning with its earliest work there has been attention to trust running through the bioethics literature in the United States and much of this discussion has examined its theological elements Clearly trust is indispensable when describing the patient physician relationship so why is there a need for yet another study There is no doubt that people generally trust physicians Traditionally the physician is the patient s fiduciary agent whose sole obligation is to act only in the patient s best interest In recent times however there is a perception on the part of people within and without health care that physicians have other obligations that compete with their obligation to the patient If we

acknowledge that one price for the successes of technological biomedicine is high in terms of financial cost another price of success seems to be distrust cynicism and suspicion directed by the public toward the medical profession If this uneasiness is the price society pays for medical success what is the price of success for the doctor Because of their role within the social order physicians have claimed and been granted autonomy authority and special status In return the profession has pledged to serve the well being and interests of humankind This fiduciary commitment becomes a taken for granted aspect of the physician's identity both for the physician for whom this dedication is definitional and for the public which expects trustworthy service from this person

**Reimagining America** Charles Mabee, 1985 The American character Charles Mabee writes is grounded in the metaphor of universal scientific and technological experiment an experiment in which some may see God at work and others may not Americans are a religious people but they are also scientific Both theologians and scientists must confront the antagonism between the particularistic world view inherited from the Judeo Christian tradition and the fundamentally universal orientation of science Modern study of the Bible grounded in scientific method has liberated the text from the imperatives of ecclesiastical dogma its practitioners have constructed elaborate safeguards against subjective interpretation Yet the subjective component of biblical study remains only now the name of this component is science itself Book jacket
