Reflections on Slope Stability Engineering Edward N. Bromhead,2023-09-19 Slope stability engineering is both an art and a science practised by many civil and geotechnical engineers involved in work on landslides earth dams breakwaters coastal defence earthworks slopes for roads canals railways pipelines housing developments and other related developments This book contains the detailed reflections of its author who has practised and researched in the field for over a half century It is written in an informal style that makes it an interesting and thought provoking practitioner guide to landslides and slope problems and their investigation analysis and remediation considering both natural and man made slopes and earthworks and without the need for the usual equations and illustrations Reflections on Slope Stability Engineering is targeted primarily at practitioners working in the investigations of slope instability and the design and construction of treatments of the problem especially those early in their careers but the accessible style also suits students who are developing an interest in the subject and even those engineers with only a casual interest in this branch of geotechnics *Mill Tailings Dam Break at Church Rock, New Mexico* United States. Congress. House. Committee on Interior and Insular Affairs. Subcommittee on Energy and the Environment,1980 *Cost-effective and Sustainable Road Slope Stabilization and Erosion Control* Laura Fay,Michelle Akin,Xianming Shi,National Cooperative Highway Research Program,2012 In the United States it is estimated that 75 percent of all roads are low volume roads maintained by some 35 000 local agencies Low volume roads often omit surface slope protection and this can lead to slope failure erosion and maintenance safety and ecological issues This report presents information on cost effective and sustainable road slope stabilization techniques with a focus on shallow or near surface slope stabilization and related erosion control methods used on low volume roads To fully address this topic planning and site investigation are discussed as well as erosion control techniques soil bioengineering and biotechnical techniques mechanical stabilization and earthwork techniques Information presented in this report was obtained through an extensive literature review and from survey and interview responses From the survey responses 30 individuals were interviewed based on the information they made available in the survey A total of 25 interviews were conducted over the phone and in two cases written responses were received Preface **Technology and Practice in Geotechnical Engineering** Adeyeri, Joseph B.,2014-09-30 Knowledge surrounding the behavior of earth materials is important to a number of industries including the

mining and construction industries Further research into the field of geotechnical engineering can assist in providing the tools necessary to analyze the condition and properties of the earth Technology and Practice in Geotechnical Engineering brings together theory and practical application thus offering a unified and thorough understanding of soil mechanics Highlighting illustrative examples technological applications and theoretical and foundational concepts this book is a crucial reference source for students practitioners contractors architects and builders interested in the functions and mechanics of sedimentary materials Selected Water Resources Abstracts ,1990-07 *Proceedings of the Second National Ground Water Quality Symposium* ,1974 **Karst Geohazards** Barry F. Beck,2018-12-19 Geologists and geographers study how to develop how and where karst develops and how sinkholes form but engineers must use this information to develop karst terrane Over the past ten years these multidisciplinary conferences on the applied aspects of karst hydrogeology and engineering have been successful in bringing together engineers geologists other scientists and government regulators who must safely establish human infrastructure on karst terrane whilst protecting the environment The essences of these conferences has always been communication between geologists and engineers with an emphasis on practical applications and case studies This text contains the proceedings of the fifth conference on karst geohazards It presents 65 papers that cover topics such as groundwater contamination through sinkholes and the karst surface stormwater drainage and flooding problems and foundation considerations and improvements in karst Architecture, Building and Engineering Deloris Lawrence,1970 **Pavement Subsurface Drainage Systems** Barry Rodney Christopher, Verne C.
