Dictionary ... Thomas Lathrop Stedman, 1922 *The History of Modern Epilepsy* Walter J. Friedlander, 2001-05-30

Although the history of epilepsy one of the most common serious neurological disorders can easily be traced back to ancient times the modern understanding of the disease only began in the middle of the 19th century This history of the first fifty years of modern epileptology reflects the thinking accomplishments and failures of physicians between 1865 and 1914 This epoch presented a very bleak clinical picture diagnosis was difficult and often arbitrary treatment was poor and at times worse than the disease and patients who were usually viewed as having a progressive dementing condition were shunned by society Tradition physicians immaculate perceptions their thinking in analogies and the difficulty a doctor has in separating himself from his society are some of the important factors which led to a lack of clinical advancement during this time Nevertheless taking a longer view a foundation was being established for understanding the physiology of the brain and how that might be related to epilepsy This book should be of interest to any professional person concerned with or involved in exploring the neurophysiology of brain functions and its deviations the care and treatment of patience with epilepsy and the historical and social aspects of medicine Stedman's Medical Dictionary Thomas Lathrop Stedman, 1912 *Seizures: New Insights for the Healthcare Professional: 2012 Edition*, 2012-12-10 *Seizures New Insights for the Healthcare Professional* 2012 Edition is a ScholarlyEditions eBook that delivers timely authoritative and comprehensive information about Seizures The editors have built *Seizures New Insights for the Healthcare Professional 2012 Edition* on the vast information databases of ScholarlyNews You can expect the information about Seizures in this eBook to be deeper than what you can access anywhere else as well as consistently reliable authoritative informed and relevant The content of *Seizures New Insights for the Healthcare Professional 2012 Edition* has been produced by the world s leading scientists engineers analysts research institutions and companies All of the content is from peer reviewed sources and all of it is written assembled and edited by the editors at ScholarlyEditions and available exclusively from us You now have a source you can cite with authority confidence and credibility More information is available at <http://www.ScholarlyEditions.com> *Epilepsy and the Ketogenic Diet* Carl E. Stafstrom, Jong M. Rho, 2004-07-29 The Nutrition and Health series of books has an overriding mission to provide health professionals with texts that are considered essential because each includes 1 a synthesis of the state of the science 2 timely in depth reviews by the leading researchers in their respective fields 3 extensive up to date fully annotated reference lists 4 a detailed index 5 relevant tables and figures 6 identification of paradigm shifts and the consequences 7 suggestions of areas for future research and 8 balanced data driven answers to patient health professionals questions that are based upon the totality of evidence rather than the findings of any single study The series volumes are not the outcome of a symposium

Rather each editor has the potential to examine a chosen area with a broad perspective both in subject matter as well as in the choice of chapter authors The international perspective especially with regard to public health initiatives is emphasized where appropriate The editors whose trainings are both research and practice oriented have the opportunity to develop a primary objective for their book define the scope and focus and then invite the leading authorities from around the world to be part of their initiative The authors are encouraged to provide an overview of the field discuss their own research and relate the research findings to potential human health consequences

Rheumatology and Immunology Therapy Larry W. Moreland, 2004-07-20 Entries in a practical A to Z Format Highly therapy focused Uniform and clearly arranged entries for ease of reference Comprehensive information on symptoms and therapeutical possibilities of rheumatologic and musculoskeletal diseases as well as drugs Written by leading experts in the field

Representing Epilepsy Jeannette Stirling, 2010-01-01 Representing Epilepsy the latest volume in Liverpool University Press's acclaimed Representations series is the first book that looks at the cultural and literary history of epilepsy a condition that afflicts at least 50 million people worldwide Jeannette Stirling argues that neurological discourse about epilepsy from the late nineteenth century through to the mid twentieth century was forged as much by cultural conditions of the times as it is by the science of western medicine Stirling also explores narratives of epilepsy in works as diverse as David Copperfield and The X Files drawing out the many ideas of social disorder tainted bloodlines sexual deviance spiritualism and criminality they depict This pathbreaking book will be required reading for cultural disability studies scholars and for anyone seeking a better understanding of this very common condition

Complementary and Alternative Therapies for Epilepsy Orrin Devinsky, Steven V. Pacia, Steven C. Shachter, 2005-05-01 Epilepsy is a difficult illness to control up to 35% of patients do not respond fully to traditional medical treatments For this reason many sufferers choose to rely on or incorporate complementary and alternative medicine CAM into their treatment regimens Written for physicians knowledgeable laypersons and other professionals Complementary and Alternative Therapies for Epilepsy bridges the worlds of traditional medicine and CAM to foster a broader perspective of healthcare for patients The book respects cultural differences that may incorporate alternative medicine into a medical management program and encourages patients to safely continue receiving necessary medical treatments Wherever possible scientific evidence supports the choice of treatment modalities as well as the effectiveness of a combined traditional and CAM approach Readers will find incisive discussions in sections on Learning to Reduce Seizures Asian Herbal and Homeopathic Therapies Nutritional Therapies Alternative Medical Therapies Oxygen Therapies Manipulation and Osteopathic Therapies Music Art and Pet Therapies From stress and epilepsy to acupuncture massage craniosacral therapies homeopathy ketogenic diets aromatherapy hypnosis and more the book is all inclusive and enlightening Additional commentary by the editors provides a critical vantage point from which to interpret the data and viewpoints of the contributors all experts in the therapies presented This balanced scientific

approach will appeal to even those most skeptical of alternative therapies making the book essential for every professional who seeks to provide the broadest range of effective patient care *Psychiatric Manifestations of Neurotoxins, An Issue of Psychiatric Clinics* Michael R. S. Fisher, MD, Peter W. Kaplan, 2004-12-01 Many patients referred for an epilepsy evaluation actually suffer from one of many conditions that can imitate it. Imitators of epilepsy are a diverse group that involve consideration of many areas of internal medicine, neurology, and psychiatry. The most important imitators of epileptic seizures are dizziness, vertigo, syncope, complicated migraine, and somewhat less frequently, sleep disorders, transient cerebral ischemia, paroxysmal movement disorders, endocrine or metabolic dysfunction, delirium, psychiatric conditions, or transient global amnesia. Clearly under-recognized are hyperventilation episodes, panic attacks, and other psychogenic and psychiatric paroxysmal disorders that may simulate epileptic seizures. This volume provides a comprehensive review of the differential diagnosis of seizures: how do the imitators of epilepsy present clinically? what are their particular distinguishing historical features and what tests are helpful with diagnosis? Expanding beyond the first edition, this second edition is divided into four sections. The first deals with an introduction and approach; diagnosing spells; the electroencephalography of epilepsy and its imitators; and specialized tests of diagnosis such as measurement of serum prolactin. There are chapters on epileptic seizures that do not look like typical epileptic seizures and conversely, apparent epileptic seizures that are not. A second section approaches imitators of epileptic seizures along age-based lines, i.e., what sorts of spells are likely to beset infants, children, or the elderly? A third section addresses individual imitators of epilepsy, ranging from the common to the rare, from dizziness and faintness to startle disease, arranged according to whether they might simulate partial, generalized, or both types of epileptic seizures. The volume finishes off with hyperventilation syndrome, psychogenic seizures with or without epilepsy, and panic disorders. Most chapters review the basic definitions and physiology of the respective imitator, followed by the clinical characteristics. Emphasis is given to those features that may differentiate it from an epileptic event but also mark it for what it is and give possible criteria for an alternate diagnosis. Case vignettes are used to illustrate particular aspects, along with tables that compare and contrast phenotypically similar conditions. Based on their extensive clinical experience, the authors provide a personal perspective on diagnosis and treatment.
