wherein the placements of the cutting planes have been explained in various positions like perpendicular parallel and inclined to HP and VP Having thus trained the drafter in handling the drafting tools the book graduates to more complicated material like fusion of one solid shape into another It explores various types of them so that development of lateral surfaces of solids can be made and depicted isometrically and projected orthographically Lastly the book describes 3D modelling using CATIA where solid models are drawn and how 2D analysis is done using ANSYS
