Selected Classical Papers:

Selected Classical Papers David Roy Shackleton Bailey, 1997 The present volume collects in one place the most important of Shackleton Bailey's very numerous papers on classical topics which were originally published in a wide variety of journals around the world. The papers cover the chronological spread of the author's work and are centered around the fields of Roman history, textual criticism, studies of classical scholars, and important reviews of the textual or historical work of contemporary classicists. The Selected Classical Papers of Basil Lanneau Gildersleeve Basil Lanneau Gildersleeve, 1992

Classic Papers in Orthopaedics Paul A. Banaszkiewicz, Deirdre F. Kader, 2014-01-10 Orthopedic experts in their field have carefully chosen what they consider to be the key papers in their respective domains. Every paper is carefully described and evaluated by its strengths, weaknesses, and its contribution to the field. Papers have been chosen by number of citations, academic importance, articles that have changed our whole way of thinking, or that have simply stood the test of time.

Select Undergraduate Papers Jude K. Selected Papers from IEEE ICKII 2018 Teen-Hang Meen, Wenbing Zhao, 2019-08-02 This book is a printed edition of the Special Issue Selected Papers from IEEE ICKII 2018 that was published in Sensors. Selected Papers of Léon Rosenfeld Robert S. Cohen, J.J. Stachel, 2012-12-06

The decision to undertake this volume was made in 1971 at Lake Como during the Varenna summer school of the Italian Physical Society where Professor Leon Rosenfeld was lecturing on the history of quantum theory. We had long been struck by the unique blend of epistemological, historical, and social concerns in his work on the foundations and development of physics and decided to approach him there with the idea of publishing a collection of his papers. He responded enthusiastically and agreed to help us select the papers. Furthermore, he also agreed to write a lengthy introduction and to comment separately on those papers that he felt needed critical re-evaluation in the light of his current views. For he was still vigorously engaged in both theoretical investigations and critical reflections on the foundations of theoretical physics. We certainly did conceive of the volume as a memorial to a living saint but rather more practically as a useful tool to place in the hands of fellow workers and students engaged in wrestling with these difficult problems. All too sadly fate has added a memorial aspect to our labors. We agreed that in order to make this book most useful for the contemporary community of physicists and philosophers we should translate all non-English items into English. **Selected Papers** Jacob Wolfowitz, 1980 **Classic Papers in**

Control Theory Richard Bellman, Robert Kalaba, 2017-11-08 Historically and technically important papers range from early work in mathematical control theory to studies in adaptive control processes. Contributors include J. C. Maxwell, H. Nyquist, H.

W Bode other experts 1964 edition **Classic Papers in Coronary Angioplasty** Clive Handler, Michael Cleman, 2006-12-22

This book assembles a distinguished team of international contributors to identify analyze and collate the research articles that have earned recognition as the defining literature on coronary angioplasty It is a unique reference providing not only a single source for reviewing the most important papers in the discipline but also a critical analysis of the strengths weaknesses and the impact of each paper on the development of coronary angioplasty Language, Truth, and Literature Richard Gaskin, 2013-04-18 According to the literary humanist works of imaginative literature have an objective meaning which is fixed at the time of their production and which is the same for all readers then and thereafter not subject to the vagaries of individual readers responses Such works refer to the real world and make statements about that world which are of cognitive as well as aesthetic value the two kinds of value are indeed intimately connected Richard Gaskin offers a defence of literary humanism so understood against assault from two directions On the one hand some analytic aestheticians have argued that works of literature do not bear referentially on the world and do not make true statements about it others hold that such works do not make a contribution to knowledge others again allow that works of literature may have cognitive value but deny that this depends on their having truth or reference On the other hand reception theorists and deconstructionists have rejected the humanist s objectivist conception of literary meaning and typically take a pragmatist and anti realist approach to truth and meaning This latter poststructuralist treatment of literature has often been accompanied by a radical politicization of its study In defending literary humanism against these various forms of attack Gaskin shows that the reading and appreciation of literature is a cognitive activity fully on a par with scientific investigation and that we can and should engage in it disinterestedly for the sake of what can be learnt about the world and our place in it **Horace and**

Housman R. Wisdom's Workshop James Axtell, 2023-03-07 An essential history of the modern research university When universities began in the Middle Ages Pope Gregory IX described them as wisdom's special workshop He could not have foreseen how far these institutions would travel and develop Tracing the eight hundred year evolution of the elite research university from its roots in medieval Europe to its remarkable incarnation today **Wisdom's Workshop** places this durable institution in sweeping historical perspective In particular James Axtell focuses on the ways that the best American universities took on Continental influences developing into the finest expressions of the modern university and enviable models for kindred institutions worldwide Despite hand-wringing reports to the contrary the venerable university continues to renew itself becoming ever more indispensable to society in the United States and beyond Born in Europe the university

did not mature in America until the late nineteenth century. Once its heirs proliferated from coast to coast, their national role expanded greatly during World War II and the Cold War. Axtell links the legacies of European universities and Tudor Stuart Oxbridge to nine colonial and hundreds of pre-Civil War colleges and delves into how U.S. universities were shaped by Americans who studied in German universities and adapted their discoveries to domestic conditions and goals. The graduate school, the PhD, and the research imperative became and remain the hallmarks of the American university system, and higher education institutions around the globe. A rich exploration of the historical lineage of today's research universities. *Wisdom's Workshop* explains the reasons for their ascendancy in America and their continued international preeminence. **Critica** Egil Kraggerud, 2020-09-03. Gathering together over 60 new and revised discussions of textual issues, this volume represents notorious problems in well-known texts from the classical era by authors including Horace, Ennius, and Vergil. A follow-up to *Vegiliana*. **Critical Studies on the Texts of Publius Vergilius Maro**, 2017. The volume includes major contributions to the discussion of Horace's *Carmen* IV 8 and IV 12, along with studies on Catullus *Carmen* 67 and Hadrian's *Animula vagula*, as well as a new contribution on Livy's text at IV 20 in connection with Cossus's *spolia opima* and on Vergil's *Aeneid* 3.147-152 and 11.151-153. On Ennius, the author presents several new ideas on *Ann.* 42 Sk and 220-221, and in editing Horace, he suggests new principles for the critical apparatus and tries to find a balance by weighing both sides in several studies comparing a conservative and a radical approach. *Critica* will be an important resource for students and scholars of Latin language and literature. The Open Access version of this book is available at <http://www.taylorfrancis.com> and has been made available under a Creative Commons Attribution-NonCommercial-NoDerivatives (CC BY-NC-ND) 4.0 license. **The Lost Elements** Marco Fontani, Mariagrazia Costa, Mary Virginia Orna, 2015. The story of the false entries, good faith errors, retractions, and mistakes that occurred during the formation of the Periodic Table of Elements as we know it. **Classic Papers in Critical Care** Mitchell P.
